This is a proposed extension of the ICR, which is currently approved through August 31, 2023. Pursuant to section 3506(c)(2)(A) of the PRA, EPA is soliciting comments and information to enable it to: (i) evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility; (ii) evaluate the

accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (iii) enhance the quality, utility, and clarity of the information to be collected; and (iv) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses. EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval. At that time, EPA will issue another **Federal Register** notice to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB.

Abstract: Information collected under this rulemaking is necessary to implement the requirements of the Significant New Alternatives Policy (SNAP) program for evaluating and regulating substitutes for ozone-depleting substances (ODS) being phased out under the stratospheric ozone protection provisions of the Clean Air Act (CAA) and globally under the *Montreal Protocol on Substances that Deplete the Ozone Layer*. Under CAA section 612, EPA is authorized to identify and restrict the use of substitutes for class I and class II ODS (listed in 40 CFR part 82, subpart A, appendices A and B) where EPA determines other alternatives are available or potentially available that reduce overall risk to human health and the environment. Any producer of a new substitute must submit a notice of intent to introduce a substitute into interstate commerce 90 days prior to such introduction. The producer must also provide EPA with information covering a wide range of health and environmental factors. The SNAP program, based on information collected from the manufacturers, formulators, and/or sellers of such substitutes, identifies acceptable substitutes. Responses to the collection of information are mandatory under section 612 for anyone who sells or, in certain cases, uses substitutes for an ODS after April 18, 1994, the effective date of the final rule. Measures to protect confidentiality of information collected under the SNAP program are based on EPA's confidentiality regulations (40 CFR 2.201 *et seq.*, or Subpart B). Submitters may designate all or portions of their forms or petitions as confidential. EPA requires the
