[Project No. 2570-034]

Eagle Creek Racine Hydro, LLC; Notice of Intent To Prepare an Environmental Assessment

On November 30, 2021, Eagle Creek Racine Hydro, LLC filed a relicense application for the 47.5-megawatt Racine Hydroelectric Project No. 2570 (Racine Project). The Racine Project is located at the U.S. Army Corps of Engineers' (Corps) Racine Locks and Dam on the Ohio River near the Town of Racine in Meigs County, Ohio. The project occupies 27.99 acres of federal land administered by the Corps.

In accordance with the Commission's regulations, on November 1, 2022, Commission staff issued a notice that the project was ready for environmental analysis (REA Notice). Based on the information in the record, including comments filed on the REA Notice, staff does not anticipate that relicensing the project would constitute a major federal action significantly affecting the quality of the human environment. Therefore, staff intends to prepare an Environmental Assessment (EA) on the application to relicense the project.

The EA will be issued and circulated for review by all interested parties. All comments filed on the EA will be analyzed by staff and considered in the Commission's final licensing decision.

The application will be processed according to the following schedule. Revisions to the schedule may be made as appropriate.

Milestone	Target date
Commission issues EA	July 2023. ¹

Milestone	Target date
Comments on EA	August 2023.

¹The Council on Environmental Quality's (CEQ) regulations under 40 CFR 1501.10(b)(1) require that EAs be completed within 1 year of the federal action agency's decision to prepare an EA. This notice establishes the Commission's intent to prepare an EA for the Racine Hydroelectric Project. Therefore, in accordance with CEQ's regulations, the EA must be issued within 1 year of the issuance date of this notice.

Any questions regarding this notice may be directed to Jay Summers at (202) 502-8764 or jay.summers@ferc.gov.

SUPPLEMENTARY INFORMATION:

≤Title: FERC-551, Reporting of Flow Volume and Capacity by Interstate Natural Gas Pipelines.

OMB Control No.: 1902-0243.

Type of Request: Three-year extension of the FERC-551 information collection requirements with no changes to the current reporting requirements.

Abstract: The Commission is authorized to facilitate price transparency in markets for the sale or transportation of natural gas in interstate commerce, regarding the public interest, the integrity of those markets, fair competition, and the protection of consumers. FERC-551 uses the information provided by pipelines as part of its overall implementation of the statutory

provisions of section 23 of the Natural Gas Act (NGA) and 16 U.S.C. 717t–2. More specifically, the Commission relies, in part, on section 23(a)(1) of the NGA, for the authority to collect this information and uses the pipelines’ FERC–551 postings as part of fulfilling the transparency provisions of section 23(a)(1) of the NGA. The data requirements for pipelines are listed in the Code of Federal Regulations (CFR) under 18 CFR 284.13 (Reporting requirements for interstate pipelines). The Commission has directed that the data requirements under FERC–551 are to be posted on interstate pipelines’ websites and provided in downloadable file formats, in conformity with 18 CFR 284.12.

The posting requirements are based on the Commission’s authority under section 23 of the NGA (as added by the

Energy Policy Act of 2005), which provides, in relevant part, that the Commission may issue such rules as necessary and appropriate to provide for the dissemination of “information about the availability and prices of natural gas at wholesale and in interstate commerce.”¹ This provision enhances the Commission’s authority to ensure confidence in the Nation’s natural gas markets. The Commission’s market-oriented policies for the wholesale natural gas industry require that interested persons have broad confidence that reported market prices accurately reflect the interplay of legitimate market forces. Without confidence in the efficiency of price formation, the true value of transactions is very difficult to determine. Further, price transparency facilitates ensuring

that jurisdictional prices are “just and reasonable.”²

The posting of FERC–551 information occurs on a daily basis. The data must be available for download for not less than 90 days from the date of posting and must be retained by the pipeline for three years.

The daily posting requirements for major non-interstate pipelines prescribed in the Commission’s Order No. 720 are no longer required. The number of respondents used to develop the burden estimates do not include any major non-interstate pipelines.

Type of Respondents: Interstate Natural Gas Pipelines.

*Estimate of Annual Burden:*³ The Commission estimates the total public reporting burden and cost for this information collection as follows:

FERC–551—REPORTING OF FLOW VOLUME AND CAPACITY BY INTERSTATE NATURAL GAS PIPELINES

	Number of respondents	Annual number of responses per respondent	Total number of responses	Average burden & cost per response ⁴	Total annual burden hours & total annual cost	Burden hours & cost per respondent (\$)
	(1)	(2)	(1) * (2) = (3)	(4)	(3) * (4) = (5)	(5) ÷ (1)
FERC–551	181	365	66,065	0.5 hours; \$37	33,032.50 hrs.; \$2,444,405.	182.5 hrs.; \$13,505.

Comments: Comments are invited on: (1) whether the collection of information is necessary for the proper performance of the functions of the Commission, including whether the information will have practical utility; (2) the accuracy of the agency’s estimate of the burden and cost of the collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information collection; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.
