

the applicable certification requirements.

Notification to Interested Parties

Interested parties must submit applications for disclosure under APO in accordance with 19 CFR 351.305. Parties wishing to participate in this investigation should ensure that they meet the requirements of 19 CFR 351.103(d) (e.g., by filing the required letters of appearance). Note that Commerce has temporarily modified certain of its requirements for serving documents containing business proprietary information, until further notice.⁴⁰

This notice is issued and published pursuant to sections 702 and 777(i) of the Act, and 19 CFR 351.203(c).

Dated: January 19, 2023.

Lisa W. Wang,

Assistant Secretary for Enforcement and Compliance.

Appendix

Scope of the Investigation

The merchandise covered by this investigation is gas powered pressure washers (also commonly known as pressure washers), which are machines that clean surfaces using water pressure that are powered by an internal combustion engine, air-cooled with a power take-off shaft, in combination with a positive displacement pump. This combination of components (*i.e.*, the internal combustion engine, the power take-off shaft, and the positive displacement pump) is defined as the “power unit.” The scope of the investigation covers cold water gas powered pressure washers, whether finished or unfinished, whether assembled or unassembled, and whether or not containing any additional parts or accessories to assist in the function of the “power unit,” including, but not limited to, spray guns, hoses, lances, and nozzles. The scope of the investigation covers cold water gas powered pressure washers, whether or not assembled or packaged with a frame, cart, or trolley, with or without wheels attached.

For purposes of this investigation, an unfinished and/or unassembled cold water gas powered pressure washer consists of, at a minimum, the power unit or components of the power unit, packaged or imported together. Importation of the power unit whether or not accompanied by, or attached to, additional components including, but not limited to a frame, spray guns, hoses, lances, and nozzles constitutes an unfinished cold water gas powered pressure washer for purposes of this scope. The inclusion in a third country of any components other than the power unit does not remove the cold water gas powered pressure washer from the scope. A gas powered pressure washer is within the scope of this investigation regardless of the origin of its engine. Subject

merchandise also includes finished and unfinished gas powered pressure washers that are further processed in a third country or in the United States, including, but not limited to, assembly or any other processing that would not otherwise remove the merchandise from the scope of this investigation if performed in the country of manufacture of the in-scope cold water gas powered pressure washers.

The scope excludes hot water gas powered pressure washers, which are pressure washers that include a heating element used to heat the water sprayed on the machine.

Also specifically excluded from the scope of this investigation is merchandise covered by the scope of the antidumping and countervailing duty orders on certain vertical shaft engines between 99cc and Up to 225cc, and parts thereof from the People’s Republic of China. *See Certain Vertical Shaft Engines Between 99 cc and Up to 225cc, and Parts Thereof from the People’s Republic of China: Antidumping and Countervailing Duty Orders*, 86 FR 023675 (May 4, 2021).

The cold water gas powered pressure washers subject to this investigation are classified in the Harmonized Tariff Schedule of the United States (HTSUS) at subheadings 8424.30.9000 and 8424.90.9040. Although the HTSUS subheadings are provided for convenience and customs purposes, the written description of the scope is dispositive.

DEPARTMENT OF COMMERCE

National Institute of Standards and Technology

National Advanced Spectrum and Communications Test Network: Citizens Broadband Radio Service Sharing Ecosystem Assessment Test Plan Community Outreach

AGENCY: National Institute of Standards and Technology, Department of Commerce.

ACTION: Notice of open meeting.

SUMMARY: The National Advanced Spectrum and Communications Test Network (NASCTN) is hosting a public meeting on NASCTN’s test plan for collecting emissions in the Citizen Broadband Radio Service (CBRS) band in ‘Always On’ Dynamic Protection Areas (DPAs), on February 22, 2023, from 10:00 a.m.–12:00 p.m. Mountain Standard Time. The purpose of this meeting is to brief federal, industry, and academic stakeholders and interested parties from the public on the details and approach to collecting emissions in the CBRS band for one of the three main tasks of the NASCTN CBRS Sharing Ecosystem Assessment (SEA) project.

DATES: The NASCTN meeting on the CBRS SEA Project Aggregate Emissions

in Always-On DPA test plan will take place February 22, 2023 from 10:00 a.m.–12:00 p.m. Mountain Standard Time.

ADDRESSES: The meeting will be held both in-person at the NIST campus at 325 Broadway Street, Boulder, CO 80305 and via web conference. For instructions on how to participate in the meeting, please see the **SUPPLEMENTARY INFORMATION** section of this notice.

FOR FURTHER INFORMATION CONTACT: Keith Hartley at keith.hartley@nist.gov or 719.572.8256.

SUPPLEMENTARY INFORMATION: The NASCTN CBRS SEA project seeks to provide data-driven insight into the CBRS sharing ecosystem’s effectiveness between CBRS and DoD systems, and to track changes in the spectrum environment over time via three primary tasks: (1) Measure Aggregate Emissions in the CBRS Band in Coastal DPAs, (2) Measure Aggregate Emissions in Always-On DPA, and (3) Evaluate Environmental Sensing Capacity (ESC) performance in the Field.

NASCTN is hosting a public meeting on the CBRS SEA project’s Measure Aggregate Emissions in Always-On DPA test plan on February 22, 2023 from 10:00 a.m.–12:00 p.m. Mountain Standard Time. The purpose of this meeting is to brief federal, industry, and academic stakeholders and interested parties from the public on the details and approach to collecting emissions in the CBRS band for task 2 of the three main tasks of the NASCTN CBRS SEA project.

Approximately 30 minutes will be allocated for public comments and questions with speaking times assigned on a first-come, first-served basis. Public comments can be provided via in-person attendance, web conference attendance, or via email. The amount of time per speaker will be determined by the number of requests received. Speakers who wish to expand upon their questions or statements, those who wish to speak but cannot be accommodated during the meeting, and those who are unable to attend are invited to submit written statements by email to keith.hartley@nist.gov. Please note that all submitted comments will be treated as public documents.

Anyone wishing to attend this meeting in-person or via web conference must register by 5:00 p.m. Mountain Standard Time, February 15, 2023. Please submit your full name, email address, and phone number to Keith Hartley at keith.hartley@nist.gov.

⁴⁰ See *Temporary Rule Modifying AD/CVD Service Requirements Due to COVID-19: Extension of Effective Period*, 85 FR 41363 (July 10, 2020).

Authority: 15 U.S.C. 278t.

Alicia Chambers,

NIST Executive Secretariat.

National Oceanic and Atmospheric Administration

[RTID 0648-XC371]

Endangered and Threatened Species; Draft Recovery Plan for the Oceanic Whitetip Shark (*Carcharhinus Longimanus*)

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Department of Commerce.

ACTION: Notice of availability of draft recovery plan; request for comments.

SUMMARY: We, the National Marine Fisheries Service (NMFS), announce the availability of a Draft Endangered Species Act (ESA) Recovery Plan for the threatened oceanic whitetip shark (*Carcharhinus longimanus*) for public review. We are soliciting review and comment from the public and all interested parties on the Draft Recovery Plan, and will consider all substantive comments received during the review period before submitting the Recovery Plan for final approval.

DATES: Comments on the Draft Recovery Plan must be received by March 27, 2023.

ADDRESSES: You may submit comments on the Draft Recovery Plan, identified by NOAA-NMFS-2022-0097 by the following method.

- **Electronic Submissions:** Submit all electronic comments via the Federal eRulemaking Portal. Go to <https://www.regulations.gov> and enter NOAA-NMFS-2022-0097 in the Search box. Click on the "Comment" icon, complete the required fields, and enter or attach your comments.

Instructions: Comments sent by any other method, to any other address or individual, or received after the end of the comment period, may not be considered by NMFS. All comments received are a part of the public record and will generally be posted for public viewing on www.regulations.gov without change. All personal identifying information (e.g., name, address, etc.), confidential business information, or otherwise sensitive information submitted voluntarily by the sender will be publicly accessible. NMFS will accept anonymous comments (enter "N/

A" in the required fields if you wish to remain anonymous).

Electronic copies of the Draft Recovery Plan and supporting documents are available online at: <https://www.fisheries.noaa.gov/species/oceanic-whitetip-shark#conservation-management>.

FOR FURTHER INFORMATION CONTACT:

Kristen Koyama, (301) 427-8456, kristen.koyama@noaa.gov or Chelsey Young, (808) 725-5154, chelsey.young@noaa.gov.

SUPPLEMENTARY INFORMATION:

Background

The Endangered Species Act of 1973 (ESA), as amended (16 U.S.C. 1531 *et seq.*), requires that NMFS develop and implement recovery plans for the conservation and survival of threatened and endangered species under our jurisdiction, unless it is determined that such plans would not promote the conservation of the species. Section 4(f)(1) of the ESA requires that recovery plans incorporate, to the maximum extent practicable: (1) site-specific management actions necessary to achieve the plan's goals; (2) objective, measurable criteria which, when met, would result in a determination that the species is no longer threatened or endangered; and (3) estimates of the time required and costs to implement recovery actions.

We listed the oceanic whitetip shark (*Carcharhinus longimanus*) as a threatened species under the ESA on January 30, 2018 (83 FR 4153).

The oceanic whitetip shark is a globally distributed, pelagic species of shark that is highly migratory, has low-moderate productivity, and relatively low reproductive rates. While the current population size is unknown, the best available information indicates the oceanic whitetip shark has experienced significant declines in abundance throughout its range over at least the last several decades due to overutilization in commercial fisheries resulting in high levels of fishing mortality. It is difficult to assess the global population status of the oceanic whitetip shark because stock assessments to date have only been conducted for the Western and Central Pacific stock. Therefore, it is unknown whether global population abundance has continued to decline, has stabilized, or has recently increased. Regardless of recent trends, the oceanic whitetip shark's large population decline is a cause for concern due to ongoing susceptibility to threats acting on the species.

Development of the Draft Recovery Plan

In September 2018, we developed a recovery outline to systematically and cohesively guide recovery for the oceanic whitetip shark until we completed a recovery plan. The recovery outline is available on our website at: <https://www.fisheries.noaa.gov/species/oceanic-whitetip-shark#conservation-management>.

In April and November of 2019, we held two 3-day recovery planning workshops for the oceanic whitetip shark in Honolulu, Hawaii and Miami, Florida, respectively. The purpose of these workshops was to gather expert input and perspectives on the best ways for recovering the oceanic whitetip shark, including identifying potential recovery criteria and actions to address the threats to the species. We invited experts in specific topic areas, including the species' biology/ecology, threats to the species, fisheries management, and the recovery planning process itself. Identified experts included representatives of Federal agencies, scientific experts, individuals from conservation partners and non-governmental organizations, and representatives from the commercial fishing industry. The workshop summaries were published in late 2019 and are available from our website at: <https://www.fisheries.noaa.gov/species/oceanic-whitetip-shark#conservation-management>.

The recovery planning components for the oceanic whitetip shark are divided into three separate documents. The first document, the Recovery Status Review, provides detailed information on the oceanic whitetip shark's biology, ecology, status and threats, and conservation efforts to date, which has typically been included in the background section of a species' recovery plan. This separate document is designed to inform all post-listing activities, including recovery planning, and is a comprehensive update to the original 2017 status review (Young *et al.* 2017). The Recovery Status Review may be revised as new information becomes available. The second document, the Draft Recovery Plan, focuses on the statutory components of a recovery plan, as required under the ESA to be incorporated to the maximum extent practicable: (1) a description of site-specific management actions necessary for the conservation and survival of the species (recovery actions); (2) objective, measurable criteria that, when met, will allow the species to be removed from the endangered and threatened species list; and (3) estimates of the time and cost required to achieve the plan's goals.
