

Matters To Be Considered: Board members will discuss and vote on New Membership for the Board's Resilience and Social Justice Subcommittee and a Resilience and Social Justice Recommendations Report, as well as discuss and vote on membership for two new charges, Fellowships and Allocation Policy. <https://seagrant.noaa.gov/About/Advisory-Board>

Privacy Act Statement: Authority. The collection of information concerning nominations to the MCAM FAC is authorized under the FACA, as amended, 5 U.S.C. App. and its implementing regulations, 41 CFR part 102-3, and in accordance with the Privacy Act of 1974, as amended, (Privacy Act) 5 U.S.C. 552a. *Purpose.* The collection of names, contact information, resumes, professional information, and qualifications is required in order for the Under Secretary to appoint members to the MCAM FAC. *Routine Uses.* NOAA will use the nomination information for the purpose set forth above. The Privacy Act of 1974 authorizes disclosure of the information collected to NOAA staff for work-related purposes and for other purposes only as set forth in the Privacy Act and for routine uses published in the Privacy Act System of Records Notice COMMERCE/DEPT-11, Candidates for Membership, Members, and Former Members of Department of Commerce Advisory Committees, available at <https://www.osec.doc.gov/opog/PrivacyAct/SORNs/dept-11.html> and the System of Records Notice COMMERCE/DEPT-18, Employees Personnel Files Not Covered by Notices of Other Agencies, available at <https://www.osec.doc.gov/opog/PrivacyAct/SORNs/DEPT-18.html>.

Disclosure: Furnishing the nomination information is voluntary; however, if the information is not provided, the individual would not be considered for appointment as a member of the MCAM FAC.

David Holst,

Chief Financial Officer/Administrative Officer, Office of Oceanic and Atmospheric Research, National Oceanic and Atmospheric Administration.

Takes of Marine Mammals Incidental to Specified Activities; Taking Marine Mammals Incidental to U.S. Navy Construction at Naval Station Newport, Rhode Island

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; issuance of a modified Letter of Authorization.

SUMMARY: In accordance with the regulations implementing the Marine Mammal Protection Act (MMPA) as amended, notification is hereby given that NMFS has issued a modified Letter of Authorization to the U.S. Navy to incidentally harass, by Level B harassment only, marine mammals during construction activities associated with pile driving and bulkhead repair at Naval Station Newport in Newport, Rhode Island.

DATES: This Authorization is effective from January 25, 2023 to May 14, 2027.

FOR FURTHER INFORMATION CONTACT: Cara Hotchkin, Office of Protected Resources, NMFS, (301) 427-8401. Electronic copies of the original application and supporting documents (including NMFS **Federal Register** notices of the original proposed and final authorizations, and the previous IHA), as well as a list of the references cited in this document, may be obtained online at: <https://www.fisheries.noaa.gov/action/incidental-take-authorization-us-navy-construction-naval-station-newport-rhode-island>. In case of problems accessing these documents, please call the contact listed above.

SUPPLEMENTARY INFORMATION:

Background

The MMPA prohibits the "take" of marine mammals, with certain exceptions. Sections 101(a)(5)(A) and (D) of the MMPA (16 U.S.C. 1361 *et seq.*) direct the Secretary of Commerce (as delegated to NMFS) to allow, upon request, the incidental, but not intentional, taking of small numbers of marine mammals by U.S. citizens who engage in a specified activity (other than commercial fishing) within a specified geographical region if certain findings are made and either regulations are issued or, if the taking is limited to harassment, a notice of a proposed incidental take authorization may be provided to the public for review.

Authorization for incidental takings shall be granted if NMFS finds that the taking will have a negligible impact on the species or stock(s) and will not have an unmitigable adverse impact on the availability of the species or stock(s) for taking for subsistence uses (where relevant). Further, NMFS must prescribe the permissible methods of taking and other "means of effecting the least practicable adverse impact" on the affected species or stocks and their habitat, paying particular attention to rookeries, mating grounds, and areas of similar significance, and on the availability of such species or stocks for taking for certain subsistence uses (referred to in shorthand as "mitigation"); and requirements pertaining to the mitigation, monitoring and reporting of such takings are set forth.

History of Request

On December 15, 2021, NMFS issued a final rule to the Navy (86 FR 71162) to incidentally harass, by Level A and Level B harassment only, marine mammals during construction activities associated with bulkhead replacement and repairs at Naval Station Newport (NAVSTA Newport) over the course of 5 years (2022-2027). Subsequently, on January 26, 2022, NMFS issued a Letter of Authorization (LOA) to the Navy (87 FR 6145) associated with the final rule. Species authorized for take included Atlantic white-sided dolphin (*Lagenorhynchus acutus*), common dolphin (*Delphinus delphis*), harbor porpoise (*Phocoena phocoena*), harbor seal (*Phoca vitulina*), gray seal (*Halichoerus grypus*), harp seal (*Pagophilus groenlandicus*), and hooded seal (*Cystophora cristata*). The effective dates of this LOA are May 15, 2022 through May 14, 2027.

On November 15, 2022, NMFS received a request from the Navy for a modification to the NAVSTA Newport bulkhead construction project due to a change in the construction contractor's plan. On December 15, 2022, the Navy revised their request to incorporate NMFS's DTH source level recommendations (available at: https://media.fisheries.noaa.gov/2022-11/PUBLIC%20DTH%20Basic%20Guidance_November%202022.pdf). In its initial request for incidental take regulations, the Navy did not anticipate the need for vibratory driving of steel pipe piles or DTH installation of any pile type. Vibratory driving of steel sheet and H-piles was included, and analyzed in the rule. However, the construction contractor for the first phase of the project (S45 bulkhead) has since

determined that vibratory driving of steel pipe piles will be required, and that DTH hammering may be necessary if obstructions are encountered that would prevent the use of impact or vibratory hammers to install piles. Therefore, the Navy requested, and NMFS proposed, to modify the 2022 LOA to include take incidental to potential vibratory driving of 30-in steel pipe piles and DTH hammering of 10-in diameter holes. These updates to the Navy's specified activity will increase estimated Level B harassment isopleths and, therefore, result in an increased estimate of exposures by Level B harassment for harbor seal, gray seal, and harp seal. NMFS has determined that the changes also necessitate revised shutdown mitigation provisions for vibratory and DTH pile driving scenarios for all species. The monitoring and reporting measures remain the same as prescribed in the initial LOA, and no additional take is authorized for other species. There have been no changes from the proposed modification.

Description of the Specified Activity and Anticipated Impacts

The modified LOA includes the same construction activities (*i.e.*, impact pile driving, vibratory pile driving and removal) in the same locations that were described in the 2022 final rule (86 FR 71162; December 15, 2021); for the S45 location, additional vibratory driving and DTH hammering are included. The monitoring and reporting measures remain the same as prescribed in the initial LOA, while revisions to the required mitigation measures have been made. NMFS refers the reader to relevant documents related to issuance of the initial LOA, including the Navy's application, the proposed rule and request for comments (86 FR 56857; October 13, 2021), final rule (86 FR 71162; December 15, 2021), and notice of issued LOA (87 FR 6145; February 3, 2022) (available at <https://www.fisheries.noaa.gov/action/incidental-take-authorization-us-navy-construction-naval-station-newport-rhode-island>) for more detailed description of the project activities.

Detailed Description of the Action

A detailed description of the planned construction activities is found in the aforementioned documents associated with issuance of the initial LOA. The location, time of year, and general nature of the activities are identical to those described in the previous documents. However, as noted in the History of Request section, the Navy anticipates that vibratory installation of 30-in steel pipe piles and DTH

hammering will be necessary to complete the S45 phase of the project on time.

A detailed description of the planned S45 bulkhead modifications is provided in the **Federal Register** notice for the proposed LOA Modification (88 FR 342; January 4, 2023). Since that time, no changes have been made to the planned construction activities. Therefore, a detailed description is not provided here. Please refer to that **Federal Register** notice for the description of the specific activity.

Comments and Responses

A notice of NMFS' proposal to issue a Modified LOA to the Navy was published in the **Federal Register** on January 4, 2023 (88 FR 342). That notice described, in detail, the Navy's modified activities. In that notice, we requested public input on the request for authorization described therein, our analyses, the proposed authorization, and any other aspect of the notice of proposed LOA modification, and requested that interested persons submit relevant information, suggestions, and comments. This proposed notice was available for a 15-day public comment period. NMFS received no public comments on the proposed modification.

Description of Marine Mammals

A detailed description of the marine mammals in the area of the activities is found in relevant documents related to issuance of the initial LOA, including the Navy's application, and the proposed rule and request for comments (86 FR 56857; October 13, 2021). This information remains applicable to this modified LOA. A description of the modified construction activities at the S45 bulkhead, including brief introductions to the species and relevant stocks as well as available information regarding population trends and threats, and information regarding local occurrence, were provided in the **Federal Register** of proposed LOA Modification (88 FR 342; January 4, 2023); since that time, we are not aware of any changes in the status of these species and stocks; therefore, detailed descriptions are not provided here. Please refer to that **Federal Register** notice for these descriptions. Please also refer to NMFS' website (<https://www.fisheries.noaa.gov/find-species>) for generalized species accounts.

Potential Effects on Marine Mammals and Their Habitat

A description of the potential effects of the specified activities on marine mammals and their habitat may be

found in the documents supporting the final rule, which remains applicable to modification of the LOA. NMFS is not aware of new information regarding potential effects.

Estimated Take

A detailed description of the methods and inputs used to estimate authorized take for the specified activity are found in the proposed rule (86 FR 56857; October 13, 2021); the descriptions presented in the proposed rule did not change in the final rule (86 FR 71162; December 15, 2021). The types and sizes of piles, and marine mammal stocks taken remain unchanged from the final rule. This modification addresses the addition of vibratory driving of four 30-in steel pipe piles and ten instances of DTH hammering at the S45 bulkhead, which would result in increased harassment zone sizes. The Navy anticipates that up to four days of vibratory driving (up to two piles per day) and up to eight days of DTH hammering at one hole per day will be required. Acoustic effects on marine mammals during the specified activity can occur from impact and vibratory pile installation and removal, and DTH. The effects of underwater noise from the Navy's activities have the potential to result in Level A and Level B harassment of marine mammals in the action area.

The modification includes the use of DTH hammers, which were not evaluated in the final rule. A DTH hammer is essentially a drill bit that drills through the bedrock using a rotating function like a normal drill, in concert with a hammering mechanism operated by a pneumatic (or sometimes hydraulic) component integrated into the DTH hammer to increase speed of progress through the substrate (*i.e.*, it is similar to a "hammer drill" hand tool). The sounds produced by DTH methods contain both a continuous non-impulsive component from the drilling action and an impulsive component from the hammering effect. Therefore, NMFS treats DTH systems as both impulsive and continuous, non-impulsive sound source types simultaneously.

Ensonified Area

A detailed description of the operational and environmental parameters of the activity that are used in estimating the area ensonified above the acoustic thresholds, including source levels and transmission loss coefficient, can be found in the proposed rule (86 FR 56857; October 13, 2021), and did not change in the final rule (86 FR 71162; December 15, 2021).

The new activities include vibratory driving of 30-in pipe piles and DTH hammering; for those activities, we provide a description of the sound source levels and ensonified areas below.

Sound Source Levels of Construction Activities—The intensity of pile driving sounds is greatly influenced by factors such as the type of piles, hammers, and the physical environment (e.g., sediment type) in which the activity takes place. The Navy consulted with NMFS on the appropriate sound source

levels to use for vibratory driving, and NMFS recommended a value based on available measurements of vibratory driving of 30-in steel pipe piles (CALTRANS, 2020). Source data for the installation methods and pile types are provided in Table 2. Note that the source levels in this Table represent the SPL referenced at a distance of 10 m from the source.

NMFS recommends treating DTH systems as both impulsive and continuous, non-impulsive sound source types simultaneously. Thus,

impulsive thresholds are used to evaluate Level A harassment, and the continuous threshold is used to evaluate Level B harassment. The Navy consulted with NMFS to obtain the appropriate proxy values for DTH mono-hammers. NMFS recommended proxy levels for Level A harassment based on available data regarding DTH systems of similar sized piles and holes (Table 1) (Denes *et al.*, 2019; Guan and Miner, 2020; Reyff and Heyvaert, 2019; Reyff, 2020; Heyvaert and Reyff, 2021).

TABLE 1—SOURCE INFORMATION FOR MODIFIED PILE DRIVING AND DTH ACTIVITIES

	Average peak SPL (dB re 1 μPa)	Average RMS SPL (dB re 1 μPa)	Average SEL (dB re 1 μPa ² sec)	Strike rate (strikes per second)	Minutes to drive	Maximum number of piles per day
Vibratory Driving 30-in steel pipe piles	N/A	159	N/A	N/A	30	2
10-in DTH mono-hammer	172	167	146	10	240	1

The methods used to calculate the ensonified areas based on the sound source information in Table 2 are

identical to those used in the final rule; details are provided in the Proposed Rule (86 FR 56857; October 13, 2021).

The resulting Level A and Level B harassment isopleths are provided in Tables 2 and 3.

TABLE 2—CALCULATED DISTANCE AND AREAS OF LEVEL A AND LEVEL B HARASSMENT FOR IMPULSIVE NOISE (DTH)

Activity	Duration, count, size, and or rate	Total production days	Level A harassment ²			Level B harassment
			Mid-frequency cetaceans (dolphins)	High frequency cetaceans (harbor porpoise)	Phocid pinnipeds	Harbor porpoise and phocids
DTH (10-in holes)	4 hours/day (1 hole/day).	8	3.3 m/0.000034 km ² ...	111.6 m/0.019204 km ²	50.1 m/0.004657 km ²	See Table 4.

TABLE 3—CALCULATED DISTANCE AND AREAS OF LEVEL A AND LEVEL B HARASSMENT FOR NON-IMPULSIVE NOISE (VIBRATORY, DTH)

Activity	Duration, count, size, and or rate	Total production days	Level A harassment ²			Level B harassment
			Mid-frequency cetaceans (dolphins)	High frequency cetaceans (harbor porpoise)	Phocid pinnipeds	Harbor porpoise and phocids
DTH (10-in holes)	4 hours/day (1 hole/day).	8	See Table 3			13,594 m/7.80374 km ²
30-in Steel Pipe Vibratory.	1 hour/day (2 piles/day).	4	0.4 m/0.000001 km ² ...	7.4 m/0.000152 km ² ...	3.1 m/0.00003 km ²	3,981 m/6.741652 km ²

Marine Mammal Occurrence and Take Calculation and Estimation

A description of the methods used to estimate take anticipated to occur from

the project is found in the project's aforementioned documents. The methods of estimating take are identical to those used in the final rule. Table 4

shows the authorized takes at the S45 facility under the initial LOA (all in year 1) and the estimated takes from the modified activities.

TABLE 4—TAKE ESTIMATES AT S45 FACILITY UNDER THE INITIAL LOA AND THE MODIFICATION

	Initial LOA (year 1; S45)		Modified LOA	
	Level A	Level B	Level A	Level B
Atlantic White-sided Dolphin	0	1	0	1
Common Dolphin	0	3	0	3
Harbor Porpoise	1	4	1	4
Harbor Seal	15	188	15	244
Gray Seal	3	40	3	52
Harp Seal	1	16	1	20
Hooded Seal	0	0	0	0

TABLE 5—TAKE ESTIMATES AS A PERCENTAGE OF STOCK ABUNDANCE FOR THE MODIFICATION FOR YEAR 1 TAKES AT THE S45 FACILITY

Species	Stock (N _{EST})	Level A harassment	Level B harassment	Percent of stock
Atlantic White-sided Dolphin	Western North Atlantic (93,233)	0	3	Less than 1 percent.
Common Dolphin	Western North Atlantic (172,947)	0	3	Less than 1 percent.
Harbor Porpoise	Gulf of Maine/Bay of Fundy (95,543)	1	4	Less than 1 percent.
Harbor Seal	Western North Atlantic (61,336)	15	244	Less than 1 percent.
Gray Seal	Western North Atlantic (451,431)	3	52	Less than 1 percent.
Harp Seal	Western North Atlantic (7.6 million)	1	20	Less than 1 percent.
Hooded Seal	Western North Atlantic (593,500)	0	0	Less than 1 percent.

Description of Mitigation, Monitoring and Reporting Measures

The reporting measures are identical to those included in the initial LOA included in 2022 final rule. The monitoring and mitigation measures have been updated to include additional hydroacoustic monitoring and conservative shutdown zones. The following measures are included in the LOA Modification, and are in addition to those described in the Final Rule (86 FR 71162; December 15, 2021):

- Supplemental hydroacoustic monitoring will include:

- 30-in Steel Pipe—vibratory driving: 2 piles; and

- Obstruction drilling—DTH hammer: up to 8 holes (if required for pile installation).

- Shutdown zones for the new activities are identical to those identified in the Final Rule (86 FR 71162; December 15, 2021):

- DTH Obstruction Drilling: The maximum shutdown zone included in the initial LOA is 150 m. This distance is greater than the calculated distance to Level A harassment thresholds for marine mammal species from DTH activities at the S45 facility, which is 111.6 m for harbor porpoise. The Navy will implement the same 150 m shutdown distance for cetaceans and pinnipeds when conducting DTH activities.

- Vibratory driving steel pipe piles: the greatest calculated distance to Level A harassment thresholds for species at this location is 7.4 m, which is less than the standard construction shutdown of 10 m to prevent equipment/mammal interactions. However, for consistency the Navy will implement a 30 m shutdown distance for cetaceans and 10 m for pinnipeds from vibratory pile driving steel pipe piles, which is the same as for vibratory driving steel sheet piles in the initial authorization.

Determinations

With the exception of the revised take numbers and monitoring and mitigation measures, the Navy's planned in water

construction activities as well as reporting requirements are unchanged from those in the initial LOA. The effects of the activity on the affected species and stocks, taking into consideration the modified mitigation and related monitoring measures, remain unchanged, notwithstanding the increase to the authorized amount of harbor seal, gray seal, and harp seal take by Level B harassment.

The additional takes from Level B harassment will be due to potential behavioral disturbance and TTS. No serious injury or mortality is anticipated given the nature of the activity and measures designed to minimize the possibility of injury to marine mammals. The potential for harassment is minimized through the construction method and the implementation of the planned mitigation measures (see Description of Mitigation, Monitoring and Reporting Measures section).

The Navy's pile driving project is unlikely to result in serious injury or mortality. For all species and stocks, take would occur within a limited, confined area (immediately surrounding NAVSTA Newport in the Narragansett Bay area) of the stock's range. Level A and Level B harassment will be reduced to the level of least practicable adverse impact through use of mitigation measures described herein. Furthermore, the amount of take authorized is extremely small when compared to stock abundance.

The additional 72 takes of harbor, gray, and harp seals represents an increase of approximately 5.7 percent of the total take authorized in the initial LOA, and the anticipated impacts are identical to those described in the 2022 final rule. The amount of additional take for each species is also small (less than 1 percent of each stock). The Navy will conduct additional hydro-acoustic monitoring of the new activities, which will improve understanding of the source levels of such activities for future work. The modification to the LOA includes additional required mitigation and monitoring measures (albeit some

minor modification to harassment and shutdown distances), and identical reporting measures as the 2022 LOA.

In conclusion, there is no new information suggesting that our analysis or findings should change.

Based on the information contained here and in the referenced documents, NMFS has determined the following: (1) the required mitigation measures will effect the least practicable impact on marine mammal species or stocks and their habitat; (2) the authorized takes will have a negligible impact on the affected marine mammal species or stocks; (3) the authorized takes represent small numbers of marine mammals relative to the affected stock abundances; and (4) Navy's activities will not have an unmitigable adverse impact on taking for subsistence purposes as no relevant subsistence uses of marine mammals are implicated by this action, and (5) appropriate monitoring and reporting requirements are included.

National Environmental Policy Act

To comply with the National Environmental Policy Act of 1969 (NEPA; 42 U.S.C. 4321 *et seq.*) and NOAA Administrative Order (NAO) 216-6A, NMFS must review our action (*i.e.*, the issuance of an IHA) with respect to potential impacts on the human environment.

This action remains consistent with categories of activities identified in Categorical Exclusion B4 (incidental harassment authorizations with no anticipated serious injury or mortality) of the Companion Manual for NOAA Administrative Order 216-6A, which do not individually or cumulatively have the potential for significant impacts on the quality of the human environment and for which we have not identified any extraordinary circumstances that would preclude this categorical exclusion. Accordingly, NMFS has determined that the issuance of the modified LOA continues to qualify to be categorically excluded from further NEPA review.

Endangered Species Act (ESA)

Section 7(a)(2) of the ESA (16 U.S.C. 1531 *et seq.*) requires that each Federal agency ensure that any action it authorizes, funds, or carries out is not likely to jeopardize the continued existence of any endangered or threatened species or result in the destruction or adverse modification of designated critical habitat. To ensure ESA compliance for the issuance of incidental take authorizations, NMFS consults internally whenever we propose to authorize take for endangered or threatened species.

No incidental take of ESA-listed species is expected to result from this activity, and none is authorized herein. Therefore, NMFS has determined that formal consultation under section 7 of the ESA is not required for this action.

Authorization

NMFS has issued a modified LOA to the Navy for the potential harassment of small numbers of three marine mammal species incidental to construction at the S45 Bulkhead at Naval Station Newport in Newport, Rhode Island, that includes the previously explained mitigation, monitoring, and reporting requirements.

Dated: January 25, 2023.

Kimberly Damon-Randall,

*Director, Office of Protected Resources,
National Marine Fisheries Service.*

BILLING CODE 3510-22-P

DEPARTMENT OF COMMERCE

Patent and Trademark Office

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; Post Allowance and Reissue

The United States Patent and Trademark Office (USPTO) will submit the following information collection request to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995, on or after the date of publication of this notice. The USPTO invites comment on this information collection renewal, which helps the USPTO assess the impact of its information collection requirements and minimize the public's reporting burden. Public comments were previously requested via the **Federal Register** on November 22, 2022 during a 60-day comment period. This notice allows for an additional 30 days for public comments.

Agency: United States Patent and Trademark Office, Department of Commerce.

Title: Post Allowance and Reissue.

OMB Control Number: 0651-0033.

Needs and Uses: This collection of information covers the submission of issue fee payments, requests for certificates of correction, and reissue applications to the United States Patent and Trademark Office (USPTO). The USPTO is required by 35 U.S.C. 131 and 151 to examine applications and, when appropriate, allow applications and issue them as patents. When an application for a patent is allowed by the USPTO, the USPTO issues a notice of allowance and the applicant must pay the specified issue fee within three months to avoid abandonment of the application. If the appropriate fees are paid within the proper time period, the USPTO can then issue the patent. The rules outlining the procedures for payment of the issue fee and issuance of a patent are found at 37 CFR 1.18, 1.311, and 1.314.

This collection of information also covers several transactions that may be taken after issuance of a patent.

Pursuant to 35 U.S.C 254 and 255, a certificate of correction may be requested to correct an error or errors in an issued patent. If the USPTO determines that the request should be approved, the USPTO will issue a certificate of correction.

For an original patent that is believed to be wholly or partly inoperative or invalid, the original patentee, or the current patent owner if there has been a subsequent assignment, may apply for reissue of the patent. The reissue application process requires, among other items, provision of an oath or declaration specifically identifying at least one error being relied upon as the basis for reissue and stating the reason for the belief that the original patent is wholly or partly inoperative or invalid (e.g., a defective specification or drawing, or claiming more or less than the patentee had the right to claim in the patent). The rules outlining reissue application procedures are found at 37 CFR 1.171-1.173 and 1.175-1.178.

The title of this item has been changed from "Post Allowance and Refiling" to "Post Allowance and Reissue" to better reflect the nature of the items in this information collection.

Form Number(s): (AIA = America Invents Act; SB = Specimen Book; PTOL = Patent & Trademark Office Legal Form).

- PTO/AIA/05, PTO/AIA/06, PTO/SB/51, PTO/SB/52 (Reissue Application Declaration by the Inventor or the Assignee)

- PTO/AIA/07 (Substitute Statement in Lieu of an Oath or Declaration for Reissue Patent Application (35 U.S.C. 115(d) and 37 CFR 1.64))
- PTO/AIA/50 (Reissue Patent Application Transmittal)
- PTO/AIA/53, PTO/SB/53 (Reissue Application: Consent of Assignee; Statement of Non-Assignment)
- PTO/SB/44 (Certificate of Correction)
- PTO/SB/51S, (Supplemental Declaration for Reissue Patent Application to Correct "Errors" Statement (pre-AIA 37 CFR 1.175(c)))
- PTO/SB/56 (Reissue Application Fee Transmittal Form)
- PTOL-85B (Issue Fee Transmittal)

Type of Review: Extension and revision of a currently approved information collection.

Affected Public: Private sector; individuals or households.

Respondent's Obligation: Required to obtain or retain benefits.

Frequency: On occasion.

Estimated Number of Annual

Respondents: 426,301 respondents.

Estimated Number of Annual

Responses: 426,301 responses.

Estimated Time per Response: The USPTO estimates that the responses in this information collection will take the public approximately between 30 minutes (0.5 hours) and 5.3 hours to complete. This includes the time to gather the necessary information, create the document, and submit the completed request to the USPTO.

Estimated Total Annual Respondent Burden Hours: 373,568 hours.

Estimated Total Annual Respondent Non-Hourly Cost Burden: \$434,518,228.

This information collection request may be viewed at www.reginfo.gov. Follow the instructions to view Department of Commerce, USPTO information collections currently under review by OMB.

Written comments and recommendations for this information collection should be submitted within 30 days of the publication of this notice on the following website www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting "Currently under 30-day Review—Open for Public Comments" or by using the search function and entering either the title of the information collection or the OMB Control Number 0651-0033.
