

reliability and validity of certain questionnaire sections and items through multiple measurements on a set of respondents; assess new methods for gaining cooperation and participation of respondents with the goal of increasing response and decreasing potential bias in the survey estimates; and assess the impact of new sampling techniques and technologies on respondent behavior and reporting. Research will involve focus groups, cognitive testing, and field tests. Prior to each methodological test, a separate clearance memo (under this

generic clearance) will be presented to OMB for review.

These methodological tests will continue to examine ways to increase data quality, lower operating costs, and gain a better understanding of sources and effects of non-sampling error on NSDUH estimates. Particular attention will be given to minimizing the impact of design changes so survey data can be comparable over time. If findings suggest changes that might lead to improvements to the study, current

procedures or data collection instruments may be revised.

The number of respondents to be included in each field test will vary, depending on the nature of the subject being tested and the target population. However, the total estimated response burden is 14,801 hours. The exact number of subjects and burden hours for each test are unknown at this time, but will be clearly outlined in each individual submission. These estimated burden hours over three years are as follows:

ESTIMATED TOTAL BURDEN FOR NSDUH METHODOLOGICAL FIELD TESTS

Activity	Number of respondents	Responses per respondent	Total number of responses	Average burden per response (hrs)	Total burden (hrs.)
a. Focus Groups	378	1	378	2.0	756
b. Respondent screening for a	473	1	473	0.083	39
c. Cognitive testing	420	1	420	1.0	420
d. Respondent screening for c	800	1	800	0.083	66
e. Field Tests	12,000	1	12,000	1.0	12,000
f. Household screening for e	16,200	1	16,200	0.083	1,345
g. Screening Verification for e	804	1	804	0.067	54
h. Interview Verification for e	1,800	1	1,800	0.067	121
