Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; West Coast Fisheries Participation Survey

The Department of Commerce will submit the following information collection request to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995, on or after the date of publication of this notice. We invite the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. Public comments were previously requested via the **Federal Register** on September 2, 2022 (87 FR 19080) during a 60-day comment period. This notice allows for an additional 30 days for public comments.

Agency: National Oceanic and Atmospheric Administration (NOAA), Commerce.

Title: West Coast Fisheries Participation Survey.

OMB Control Number: 0648-0749.

Form Number(s): None.

Type of Request: Regular submission (revision and extension of a current information collection).

Number of Respondents: 2,725.

Average Hours per Response: 15 minutes.

Total Annual Burden Hours: 227.

Needs and Uses: This is a request for a revision and extension of a currently approved information collection, approved under the authority and goals of the Magnuson-Stevens Fishery Conservation and Management Act.

Fishing livelihoods are both centrally dependent on marine ecosystems and part of the set of forces acting on other components of these ecosystems, including the ecosystem's resident fish and marine species. Alongside social factors like economics and management actions, biophysical dynamics within the ecosystems, including fisheries population fluctuations, shape fishing livelihoods. However, the decisions fishermen make regarding which fisheries to access and when to access them are not fully understood, particularly within the holistic food web frameworks offered up by ecosystem-based approaches to research and management. Moreover, a full understanding and predictive capacity for these movements of fishermen across fisheries in the context of ecological and social variability presents a significant gap in management-oriented knowledge. Managing fisheries in a way that enhances their social and economic value, mitigates risks to ecosystems and livelihoods, and facilitates sustainable adaptation, requires this fundamental knowledge.

For this reason, the Northwest Fisheries Science Center (NWFS) seeks to conduct fisheries participation analyses which involve repeated follow-up surveys of United States (U.S.) West Coast commercial fishing participants. A U.S. mail survey will be conducted, replicating the survey administered during 2017 and 2020, with slight changes in questions about direct marketing of catch and community infrastructure. The survey will be voluntary, and contacted individuals may decline to participate. Respondents will be asked to answer questions about their motivations for fishing and other factors that affect participation in the suite of West Coast commercial fisheries. Fishing employment information will be collected so that responses can be organized based on a respondent typology. This survey is essential because data on smaller scale fishing practices, values, participation decisions and beliefs about fishing livelihoods are sparse; yet, they are critical to the development of usable fishery ecosystem models that account for non-pecuniary benefits of fishing, as well as the ways in which fishing practices shape individual and community well-being.

Affected Public: Individuals or households.

Frequency: One time.

Respondent's Obligation: Voluntary.

Legal Authority: Magnuson-Stevens Fishery Conservation and Management Act.
