Day	Event/activity
0	Publication of Federal Register notice of hearing or opportunity for hearing, including order with instructions for access requests.
10	Deadline for submitting requests for access to Sensitive Unclassified Non-Safeguards Information (SUNSI) with information: supporting the standing of a potential party identified by name and address; describing the need for the information in order for the potential party to participate meaningfully in an adjudicatory proceeding.
60	Deadline for submitting petition for intervention containing: (i) demonstration of standing; and (ii) all contentions whose formulation does not require access to SUNSI (+25 Answers to petition for intervention; +7 petitioner/requestor reply).
20	U.S. Nuclear Regulatory Commission (NRC) staff informs the requestor of the staff's determination whether the request for access provides a reasonable basis to believe standing can be established and shows need for SUNSI. (NRC staff also informs any party to the proceeding whose interest independent of the proceeding would be harmed by the release of the information.) If NRC staff makes the finding of need for SUNSI and likelihood of standing, NRC staff begins document processing (preparation of redactions or review of redacted documents).
25	If NRC staff finds no "need" or no likelihood of standing, the deadline for petitioner/requestor to file a motion seeking a ruling to reverse the NRC staff's denial of access; NRC staff files copy of access determination with the presiding officer (or Chief Administrative Judge or other designated officer, as appropriate). If NRC staff finds "need" for SUNSI, the deadline for any party to the proceeding whose interest independent of the proceeding would be harmed by the release of the information to file a motion seeking a ruling to reverse the NRC staff's grant of access.
30	Deadline for NRC staff reply to motions to reverse NRC staff determination(s).
40	(Receipt +30) If NRC staff finds standing and need for SUNSI, deadline for NRC staff to complete information processing and file motion for Protective Order and draft Non-Disclosure Agreement or Affidavit. Deadline for applicant/licensee to file Non-Disclosure Agreement or Affidavit for SUNSI.
A	If access granted: issuance of presiding officer or other designated officer decision on motion for protective order for access to sensitive information (including schedule for providing access and submission of contentions) or decision reversing a final adverse determination by the NRC staff.
A + 3	Deadline for filing executed Non-Disclosure Agreements or Affidavits. Access provided to SUNSI consistent with decision issuing the protective order.
A + 28	Deadline for submission of contentions whose development depends upon access to SUNSI. However, if more than 25 days remain between the petitioner's receipt of (or access to) the information and the deadline for filing all other contentions (as established in the notice of hearing or notice of opportunity for hearing), the petitioner may file its SUNSI contentions by that later deadline.
A + 53	(Contention receipt +25) Answers to contentions whose development depends upon access to SUNSI.
A + 60	(Answer receipt +7) Petitioner/Intervenor reply to answers.

SUPPLEMENTARY INFORMATION:**I. Background**

When a final environmental impact statement (FEIS) has been prepared in connection with the issuance of a construction permit for a production or utilization facility, the NRC staff is required to prepare a supplement to the FEIS in connection with any issuance of an operating license for that facility in accordance with paragraph 51.95 (b) of title 10 of the *Code of Federal Regulations*. This supplement updates the prior environmental review and only covers matters that differ from those or that reflect significant new information relative to that discussed in the FEIS. Accordingly, in response to an operating license application for the SHINE facility, the NRC staff prepared Supplement 1 to NUREG-2183, the FEIS, on the SHINE facility construction permit application. The NRC published for public comment a draft of Supplement 1 to NUREG-2183 in the **Federal Register** on July 8, 2022 (87 FR 40868). The NRC also held a public meeting on July 27, 2022, to collect comments on the draft of Supplement 1 to NUREG-2183. The public comment period ended on August 22, 2022, and the comments received are addressed in the final draft of Supplement 1 to NUREG-2183. Supplement 1 to NUREG-2183 is available as indicated in the **ADDRESSES** section of this document.

II. Discussion

The NRC issued Supplement 1 to NUREG-2183 on January 31, 2023. Supplement 1 to NUREG-2183 updates the prior environmental review by the NRC staff for the SHINE facility construction permit application and only covers matters that differ from or that reflect significant new information concerning matters discussed in NUREG-2183. Supplement 1 to NUREG-2183 includes the NRC staff's analysis of the environmental impacts of the proposed action of deciding whether to issue a license to SHINE to operate the SHINE facility for a period of 30 years. After weighing the environmental, economic, technical, and other benefits against environmental and other costs, the NRC staff recommends, unless safety issues mandate otherwise, the issuance of an

operating license to SHINE for the SHINE facility. This recommendation is based on: (1) the operating license application, including SHINE's supplemental environmental report; (2) consultation with Federal, State, Tribal, and local agencies; (3) the staff's independent review; and (4) the consideration of public comments.

Dated: February 1, 2023.

Chief, Environmental Review License Renewal Branch, Division of Rulemaking, Environmental, and Financial Support, Office of Nuclear Material Safety and Safeguards.
