

Barnwell low-level waste disposal facility will be impacted by a significant increase in low-level waste burial charge pricing at that site. Additionally, at the nation's three other low-level waste disposal facilities, both moderate increases in some, and decreases in other, low-level waste burial charges, coupled with moderate increases in labor rates and near doubling of energy rates for all licensees, likely will result in higher formula amounts for all licensees. Thus, based on revised low-level waste burial factors presented in this report and increases in labor and energy rates, the minimum decommissioning fund formula amounts calculated by licensees will likely reflect moderate to more substantial increases when compared to those previously reported by licensees in 2021.

II. Additional Information

The NRC published a notice in the **Federal Register** on November 29, 2022 (87 FR 73345) requesting public comment on draft NUREG-1307, Revision 19, "Report on Waste Burial Charges: Changes in Decommissioning Waste Disposal Costs at Low-Level Waste Burial Facilities." The public comment period closed on December 29, 2022. The NRC received four public comments. The public comments and the NRC staff's responses are presented in a comment resolution matrix available in ADAMS under Accession No. ML23038A239. The staff considered the public comments received on the draft document in preparing final NUREG-1307, Revision 19.
