

implement their own certification plans and programs, after obtaining EPA approval. This ICR addresses the paperwork activities performed by respondents to comply with training and certification requirements associated with applicators of restricted use pesticides (RUPs). Due to the potential of improperly applied RUPs to harm human health or the environment, pesticides under this classification may be purchased and applied only by “certified applicators” or by persons under the direct supervision of certified applicators.

Currently all 50 states, the District of Columbia, 6 territories, 4 tribes and 5 federal agencies are authorized to run their own certification programs within their jurisdictions, but each agency’s certification plan must be approved by EPA before it can be implemented. Agencies authorized by EPA to administer a certification program are collectively referred to as “authorized agencies.”

In areas where no authorized agency has jurisdiction, EPA may administer a certification program directly, (*e.g.*, Federal program). Federal programs require RUP dealers to maintain records of RUP sales and to report and update their names and addresses with the pesticide regulatory agency for enforcement purposes.

This ICR also addresses how registrants of certain pesticide products are expected to perform specific, special paperwork activities, to comply with the terms and conditions of the pesticide registration (*e.g.*, registrants of anthrax-related pesticide products).

Form numbers: EPA Form 8500–17 and EPA Form 8500–17–N.

Respondents/affected entities: Agricultural establishments, pest control officials, pesticide registrants, pesticide dealers, and administrators of environmental protection programs, governmental pest control programs, pesticide applicator certification programs (*e.g.*, authorized agencies), and RUP dealers (only for EPA administrated programs).

Respondent’s obligation to respond: Mandatory (FIFRA sections 3 and 11, and 40 CFR part 171).

Estimated number of respondents: 2,305,613 (total).

Frequency of response: On occasion.

Total estimated burden: 3,660,293 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$165,109,042 (per year), includes \$0 annualized capital or operation & maintenance costs.

Changes in the estimates: There is an increase of 2,280,849 hours in the total

estimated respondent burden compared with the ICR currently approved by OMB. This increase is the incorporation of the activities and estimated burden associated with the 2015 final rule that amended 40 CFR part 171, which are currently approved under OMB Control Number 2070–0196 (EPA ICR Number 2499.03).

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Comment Request; Environmental Impact Assessment of Nongovernmental Activities in Antarctica (Renewal)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency has submitted an information collection request (ICR), “Environmental Impact Assessment of Nongovernmental Activities in Antarctica (Renewal)” (EPA ICR No. 1808.10, OMB Control No. 2020–0007) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. This is a proposed extension of the ICR, which is currently approved through April 30, 2023. Public comments were previously requested via the **Federal Register** on August 30, 2022, during a 60-day comment period. This notice allows for an additional 30 days for public comments. A fuller description of the ICR is given below, including its estimated burden and cost to the public. An Agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

DATES: Additional comments may be submitted on or before March 27, 2023.

ADDRESSES: Submit your comments to EPA, referencing Docket ID Number EPA–HQ–OA–2019–0370, online using www.regulations.gov (our preferred method), by email to oira_submission@omb.eop.gov, or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW, Washington, DC

20460. EPA’s policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI), or other information whose disclosure is restricted by statute.

Submit written comments and recommendations to OMB for the proposed information collection within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function.

FOR FURTHER INFORMATION CONTACT: Julie Roemele, NEPA Compliance Division, Office of Federal Activities, Mail Code 2203A, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460; telephone number: 202–564–5632; email address: roemele.julie@epa.gov.

SUPPLEMENTARY INFORMATION:

Supporting documents which explain in detail the information that the EPA will be collecting are available in the public docket for this ICR. The docket can be viewed online at www.regulations.gov or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202–566–1744. For additional information about EPA’s public docket, visit <http://www.epa.gov/dockets>.

Abstract: The EPA’s regulations at 40 CFR part 8, Environmental Impact Assessment of Nongovernmental Activities in Antarctica (Rule), were promulgated pursuant to the Antarctic Science, Tourism, and Conservation Act of 1996 (Act), 16 U.S.C. 2401 *et seq.*, as amended, 16 U.S.C. 2403a, which implements the Protocol on Environmental Protection (Protocol) to the Antarctic Treaty of 1959 (Treaty). The Rule provides for assessment of the environmental impacts of nongovernmental activities in Antarctica, including tourism, for which the United States is required to give advance notice under Paragraph 5 of Article VII of the Treaty, and for coordination of the review of information regarding environmental impact assessments received from other Parties under the Protocol. The requirements of the Rule apply to operators of nongovernmental expeditions organized or proceeding from the territory of the United States to Antarctica and include commercial and non-commercial expeditions.

Expeditions may include ship-based tours; yacht, skiing or mountaineering expeditions; privately funded research expeditions; and other nongovernmental activities. The rule provides nongovernmental operators with the specific requirements they need to meet to comply with the requirements of Article 8 and Annex I to the Protocol. The provisions of the Rule are intended to ensure that potential environmental effects of nongovernmental activities undertaken in Antarctica are appropriately identified and considered by the operator during the planning process and that to the extent practicable appropriate environmental safeguards which would mitigate or prevent adverse impacts on the Antarctic environment are identified by the operator.

Environmental Documentation.

Persons subject to the Rule must prepare environmental documentation to support the operator's determination regarding the level of environmental impact of the proposed expedition. Environmental documentation includes a Preliminary Environmental Review Memorandum (PERM), an Initial Environmental Evaluation (IEE), or a Comprehensive Environmental Evaluation (CEE). The environmental document is submitted to the Office of Federal Activities (OFA). If the operator determines that an expedition may have: (1) less than a minor or transitory impact, a PERM needs to be submitted no later than 180 days before the proposed departure to Antarctica; (2) no more than minor or transitory impacts, an IEE needs to be submitted no later than 90 days before the proposed departure; or (3) more than minor or transitory impacts, a CEE needs to be submitted. Operators who anticipate such activities are encouraged to consult with EPA as soon as possible regarding the date for submittal of the CEE. (Article 3(4), of Annex I of the Protocol requires that draft CEEs be distributed to all Parties and the Committee for Environmental Protection 120 days in advance of the next Antarctic Treaty Consultative Meeting at which the CEE may be addressed.)

The Protocol and the Rule also require an operator to employ procedures to assess and provide a regular and verifiable record of the actual impacts of an activity which proceeds based on an IEE or CEE. The record developed through these measures needs to be designed to: (a) enable assessments to be made of the extent to which environmental impacts of nongovernmental expeditions are consistent with the Protocol; and (b) provide information useful for

minimizing and mitigating those impacts and, where appropriate, on the need for suspension, cancellation, or modification of the activity. Moreover, an operator needs to monitor key environmental indicators for an activity proceeding based on a CEE. An operator may also need to carry out monitoring to assess and verify the impact of an activity for which an IEE would be prepared. For activities that require an IEE, an operator should be able to use procedures currently being voluntarily utilized by operators to provide the required information. Should an activity require a CEE, the operator should consult with the EPA to: (a) identify the monitoring regime appropriate to that activity, and (b) determine whether and how the operator might utilize relevant monitoring data collected by the U.S. Antarctic Program. OFA would consult with the National Science Foundation (NSF) and other interested Federal agencies regarding the monitoring regime.

Environmental documents (e.g., PERM, IEE, CEE) are submitted to OFA. Environmental documents are reviewed by OFA, in consultation with the NSF and other interested Federal agencies and made available to other Parties and the public as required under the Protocol or otherwise requested. OFA notifies the public of document availability at: <https://www.epa.gov/international-cooperation/receipt-environmental-impact-assessments-eias-regarding-nongovernmental>.

The types of nongovernmental activities currently being carried out (e.g., ship-based tours, land-based tours, flights, and privately funded research expeditions) are typically unlikely to have impacts that are more than minor or transitory, thus an IEE is the typical level of environmental documentation submitted. For the 1997–1998 through 2021–2022 austral summer seasons during the time the Rule has been in effect, all respondents submitted IEEs except for three PERMs. Paperwork reduction provisions in the Rule that are used by the operators include: (a) incorporation of material in the environmental document by referring to it in the IEE, (b) inclusion of all proposed expeditions by one operator within one IEE; (c) use of one IEE to address expeditions being carried out by more than one operator; and (d) use of multi-year environmental documentation to address proposed expeditions for a period of up to five consecutive austral summer seasons.

Form Numbers: None.

Respondents/affected entities: Entities potentially affected by this action are all private sector respondents with

activities in Antarctica, including tour operators, for which the United States is required to give advance notice under paragraph 5 of Article VII of the Antarctic Treaty of 1959; this includes all nongovernmental expeditions to and within Antarctica organized in or proceeding from the territory of the United States.

Respondent's obligation to respond: Mandatory (40 CFR part 8).

Estimated number of respondents: 516 (total).

Frequency of response: Annual.

Total estimated burden: 2,988 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$283,860 (per year), includes \$0 annualized capital or operation & maintenance costs.

Changes in the estimates: There is an increase of 1,444 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This increased adjustment is the result of an anticipated increase in the number of respondent universe, the result of the inclusion of more complex information regarding safety and environmental issues, more diverse tourist activities and outcomes from current Antarctic Treaty Consultative meetings, and the accounting of a potential PERM, CEE and Emergency Report submitted by any of the 29 anticipated operators (every three years).
