

redetermination, or updating their personal information). During the interaction, the SSA technician will inform the individual verbally that SSA requires additional information to support their request and will offer the opportunity to provide the information electronically via the eSubmit application. After the individual grants consent to receive an email from SSA, the technician will send an email with the link to eSubmit along with instructions on how to access eSubmit. The system will only make the electronic submission process available for up to 30 days from the date of the

email. Concurrently, the system will generate a paper notice containing more details about the request, and the SSA technician will send it through postal mail to the respondent. Once the respondent authenticates and arrives at the eSubmit dashboard, the system will present the respondent with information regarding the items SSA requested for submission (examples of the documentation SSA may request includes forms or non-standardized evidence to support the request [e.g., pay stubs, bank statements, pension award letters, tax documents, child support payment history, etc.]). From

this screen, the individual will be able to upload the corresponding files from an electronic device. Once they finish uploading the documents, the respondents must select the Submit button to complete the action and the system will present them with an indicator of success or failure. The system will also notify the technician who requested the document that the document is available for review and consideration. Respondents are first-party individuals who choose to use the internet to conduct business with us.
