Pesticides; Final Guidance for Pesticide Registrants on the Lists of Pests of Significant Public Health Importance (Pesticide Registration Notice 2023-1)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of availability.

SUMMARY: The Environmental Protection Agency (EPA) is announcing the availability of a final Pesticide Registration Notice (PR Notice) entitled, "Lists of Pests of Significant Public Health Importance" and identified as PR Notice 2023-1. PR Notices are issued by the Office of Pesticide Programs (OPP) to inform pesticide registrants and other interested persons about important policies, procedures, and registration related decisions, and serve to provide guidance to pesticide registrants and OPP personnel. This PR Notice updates and replaces the PR Notice 2002-1, which identifies pests of significant public health importance. The Health and Human Services (HHS), United States Department of Agriculture (USDA), and the Environmental Protection Agency (EPA) determined that updating the lists to reflect the current public health situation were warranted because vector-borne diseases and related research has changed significantly since the original PR Notice was published almost 20 years ago. This update includes the addition or removal of pests, new impacts, renaming pests, or grouping pests of similar species.

DATES: PR Notice 2023-1 is effective March 31, 2023.

FOR FURTHER INFORMATION CONTACT:

Susan Jennings, Immediate Office (7501M), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460-0001; telephone number: (706) 355-8574; email address: jennings.susan@epa.gov.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this action apply to me?

This action is directed to the public in general, however, it may be of particular interest to those persons who are or may be required to conduct testing of chemical substances under the Federal Food, Drug, and Cosmetic Act

(FFDCA), or Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA). Since other entities may also be interested, the Agency has not attempted to describe all the specific entities that may be affected by this action. If you have any questions regarding the applicability of this action to a particular entity, consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

B. What is the Agency's authority for taking this action?

We are taking this action under FIFRA, 7 U.S.C. 136 *et seq.* FIFRA section 28(d) charges EPA with identifying "pests of significant public health importance." FIFRA section 2(t) defines the term "pest" as meaning (1) any insect, rodent, nematode, fungus, weed, or (2) any other form of terrestrial or aquatic plant or animal life or virus, bacteria, or other micro-organism (except viruses, bacteria, or other micro-organism on or in living man or other living animals) which the Administrator declares to be a pest under FIFRA section 25(c)(1). EPA previously exercised FIFRA section 25(c)(1) authority to make pest declarations, by amending the regulatory definition of "pest" at 40 CFR 152.5. The intended changes to the lists of pests of significant public health importance are within the statutory and regulatory definitions.

C. How can I get copies of this document and other related information?

The docket for this action, identified by docket identification (ID) number EPA-HQ-OPP-2020-0260, is available through <https://www.regulations.gov>. Additional instructions on visiting the docket, along with more information about dockets generally, visit <https://www.epa.gov/dockets>.

II. What guidance does this PR Notice provide?

This final PR Notice 2023-1 updates and replaces PR Notice 2002-1, which identifies pests of significant public health importance. The lists were first published in 2002, fulfilling the requirement of FIFRA section 28(d) to identify pests of significant public health importance (see the original lists: <https://www.epa.gov/sites/production/files/2014-04/documents/pr2002-1.pdf>). EPA, HHS and USDA believe that pests, diseases, and control techniques have changed since 2002. The lists provide an interagency baseline for the federal government and the public to begin any discussions on government regulation and control of disease or vectors of
