## SUPPLEMENTARY INFORMATION:

### I. Introduction

The NRC received a subsequent license renewal application (SLRA) from NSPM, dated January 9, 2023 (ADAMS Accession No. ML23009A354), filed pursuant to section 103 of the Atomic Energy Act of 1954, as amended (the Act), and part 54 of title 10 of the *Code of Federal Regulations* (10 CFR), to renew the operating license for MNGP at 2,004 megawatts thermal. The MNGP unit is a boiling-water reactor designed by General Electric and is located in Monticello, Minnesota. A notice of receipt of the SLRA was published in the **Federal Register** on January 31, 2023 (88 FR 6327).

The NRC staff has determined that NSPM has submitted sufficient information in accordance with 10 CFR 54.19, 54.21, 54.22, 54.23, 51.45, and 51.53(c), to enable the staff to undertake a review of the application, and that the application is, therefore, acceptable for docketing. The current docket no. 50-263 for Renewed Facility Operating License No. DPR-22, will be retained. The determination to accept the SLRA for docketing does not constitute a determination that a subsequent renewed license should be issued and does not preclude the NRC staff from requesting additional information as the review proceeds.

Before issuance of the requested subsequent renewed licenses, the NRC will have made the findings required by the Act and the Commission's rules and regulations. In accordance with 10 CFR 54.29, the NRC may issue a subsequent renewed license on the basis of its review if it finds that actions have been
