

study, and, where possible, control populations of introduced species already established in the sanctuary.

5. *Zone Management*: This action plan focuses on implementing effective management and enforcement strategies of existing protective zones established within the sanctuary, including the Channel Islands network of marine reserves and conservation areas designated by NOAA and the State of California.

6. *Education and Outreach*: This action plan seeks to increase appreciation and stewardship of sanctuary resources by building greater public understanding, engagement, and awareness throughout our diverse coastal communities. This action plan also focuses on support for sanctuary recreational activities and tourism.

7. *Research and Monitoring*: To expand our understanding of the sanctuary ecosystems, this action plan outlines five strategies for research and monitoring that are responsive to existing resource protection and management concerns, yet are also forward-looking to support ecosystem-based management decision making, resource protection initiatives, and education and outreach programs.

8. *Resource Protection*: This action plan identifies five strategies to reduce human impacts to marine wildlife and other sanctuary resources. Through collaborative management with local stakeholders and in partnership and consultation with relevant local, State, and Federal government agencies, this action plan seeks to protect the biological, historical, and cultural resources in the sanctuary from known, emerging, and future unknown threats.

9. *Cultural Heritage*: To respectfully honor, celebrate, and protect the unique Indigenous cultural heritage resources connected to the sanctuary, this action plan features strategies and activities that support meaningful Chumash Community collaborations, engagement with Chumash Community partners revitalizing maritime traditions, and appropriate integration of traditional ecological knowledge.

10. *Maritime Heritage*: This action plan describes strategies and activities focused on the understanding, protection, and interpretation of the unique maritime heritage resources and values connected to sanctuary waters.

11. *Operations and Administration*: This action plan addresses the necessary operational and administrative activities required for implementing an effective program, including staffing, infrastructure needs, and operational improvements.

IV. National Environmental Policy Act Compliance

As required under the National Environmental Policy Act (NEPA; 42 U.S.C. 4321 *et seq.*), NOAA has prepared an FEA to evaluate the potential impacts on the human environment of implementing NOAA's proposed action. With this action, NOAA is updating its management activities conducted within CINMS that relate to research, monitoring, education, outreach, community engagement, and resource protection. The management activities include the revised sanctuary management plan and implementing routine field activities and existing sanctuary regulations. As described in the FEA and FONSI, no significant impacts to resources and the human environment are expected to result from this action. Accordingly, under NEPA, an Environmental Assessment is the appropriate document to analyze the potential impacts of this action. NOAA has also prepared, as an appendix to the FEA, responses to public comments on the draft management plan and draft environmental assessment.
