

**Abstract:** The Public Water System Supervision (PWSS) Program ICR examines public water systems, primacy agencies (*i.e.*, states and tribes with primary enforcement authority) and tribal operator certification provider burden, and costs for “cross-cutting” recordkeeping and reporting requirements (*i.e.*, the burden and costs for complying with drinking water information requirements that are not associated with contaminant-specific rulemakings). The following activities have recordkeeping and reporting requirements that are mandatory for compliance with the *Code of Federal Regulations* (CFR) at 40 CFR parts 141 and 142: the Consumer Confidence Report Rule (CCR), the Variance and Exemption Rule (V/E Rule), General State Primacy Activities, the Public Notification Rule (PN), and Proficiency Testing Studies for Drinking Water Laboratories. The information collection activities for both the Operator Certification and the Capacity Development Program are driven by the grant withholding and reporting provisions under sections 1419 and 1420, respectively, of the Safe Drinking Water Act. The information collection for the Tribal Operator Certification Program is driven by grant eligibility requirements outlined in the Drinking Water Infrastructure Grant Tribal Set-Aside Program Final Guidelines and the Tribal Drinking Water Operator Certification Program Guidelines.

**Form numbers:** None.

**Respondents/affected entities:** New and existing public water systems and primacy agencies.

**Respondent's obligation to respond:** Mandatory for compliance with 40 CFR parts 141 and 142.

**Estimated number of respondents:** 146,099 (total).

**Frequency of response:** Varies by requirement (*i.e.*, on occasion, monthly, quarterly, semi-annually and annually).

**Total estimated burden:** 3,421,278 hours (per year). Burden is defined at 5 CFR 1320.03(b).

**Total estimated cost:** \$208,214,000 (per year), includes \$37,756,000 in operation and maintenance costs.

**Changes in the estimates:** There is a decrease of 222,093 hours in the total estimated annual respondent burden compared with the ICR currently approved by OMB. This decrease is a result of updating relevant baseline information for each rule with the most current and accurate information available (*e.g.*, public water system inventory); and updating burden to incorporate the results of consultation with stakeholders. Where appropriate and available, estimated violation and

other associated rates have also been updated to reflect current information on rule compliance.

**Abstract:** The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Prepared Feeds Manufacturing were promulgated on January 5, 2010; and amended on both July 20, 2010, and December 23, 2011. These regulations apply to existing facilities and new facilities where animal feed (other than feed products for dogs and cats) makes up at least half (by mass) of the facility's annual production of all products. These regulations apply to new and existing area source prepared feeds manufacturing facilities that use one or more materials (additives/premixes) that contain 0.1 percent or greater by weight of chromium (Cr) or 1.0 percent or greater by weight of manganese (Mn). New facilities include those that commenced construction or reconstruction after the date of proposal. This information is being collected to assure compliance with 40 CFR part 63, subpart DDDDDDD.

**Form numbers:** None.

**Respondents/affected entities:** Prepared feeds manufacturing facilities

that are an area source of hazardous air pollutants (HAPs).

*Respondent's obligation to respond:* Mandatory (40 CFR part 63, subpart DDDDDDD).

*Estimated number of respondents:* 1,800 (total).

*Frequency of response:* Quarterly, annually.

*Total estimated burden:* 64,100 hours (per year). Burden is defined at 5 CFR 1320.3(b).

*Total estimated cost:* \$7,700,000 (per year), which includes \$41,000 in annualized capital/startup and/or operation & maintenance costs.

*Changes in the estimates:* There is no change in burden from the most-recently approved ICR as currently identified in the OMB Inventory of Approved Burdens. This is due to two considerations. First, the regulations have not changed over the past three years and are not anticipated to change over the next three years. Second, the growth rate for this industry is very low or non-existent, so there is no significant change in the overall burden. There is an increase in the O&M costs from the most recently approved ICR as currently identified in the OMB Inventory of Approved Burdens. The capital costs were adjusted from 2010 to 2020 \$ using the CEPCI Equipment Cost Index, and the O&M costs are assumed to be 10 percent of the capital costs; therefore, there is a corresponding increase in the O&M costs.
