A. Overview of Information Collection

Title of Information Collection: Ginnie Mae Digital Collateral Program.

OMB Approval Number: 2503-0034.

Type of Request: Reinstatement.

Form Number: HUD-11701A; HUD-11701B; HUD-11708-SI.

Description of the need for the information and proposed use:

Adapting to the needs of the industry, Ginnie Mae is permitting the securitization of mortgage loans where the note is an eligible eNote. The forms in this request are new forms that are necessary due to the unique requirements of managing eNotes and eMortgages. This collection permits Ginnie Mae to verify: (1) that eIssuers and eMortgages have the specialized knowledge and experience to participate; (2) that eIssuers and eCustodians have the technological capability to service eMortgages and safeguard eMortgage documents; (3) the name and location of the entities responsible for the various Ginnie Mae accounts and eMortgage documents, and (4) those entities that are responsible for servicing the eMortgages that back the Ginnie Mae pools. Ginnie Mae needs this information to mitigate risk and evaluate its business operations, procedures and programs, and assist lenders in processing borrower requests more efficiently. Ginnie Mae also requires the collection of information to ensure that there are no deficiencies, which could affect the pass through of securities to its investors.

Based upon feedback received about the eIssuer Application form (HUD-11701A), we have revised the instructions. The only revision is to the form’s instructions which now address subservicing by the eIssuer Applicant.

Background

Under the Marine Mammal Protection Act of 1972, as amended (MMPA; 16 U.S.C. 1361 *et seq.*) and its implementing regulations in the Code of Federal Regulations (CFR) at 50 CFR part 18, the U.S. Fish and Wildlife Service (Service) regulates the taking; import; and, under certain conditions, possession; transportation; purchasing; selling; and offering for sale, purchase, or export, of marine mammals. One of the goals of the MMPA is to ensure that stocks of marine mammals occurring in waters under U.S. jurisdiction do not experience a level of human-caused mortality and serious injury that is likely to cause the stock to be reduced below its *optimum sustainable population level* (OSP). The OSP is defined under the MMPA as the number of animals which will result in the maximum productivity of the population or the species, keeping in mind the carrying capacity of the habitat and the health of the ecosystem of which they form a constituent element (16 U.S.C. 1362(9)).
