SUPPLEMENTARY INFORMATION:**Agenda**

Tuesday, April 18, 2023

The Council will begin this meeting in Closed Session to discuss the search for a new executive director. At 9:30 a.m., the open session will begin with brief announcements, followed by reports on recent activities from the Council's Chair and Executive Director, the Greater Atlantic Regional Fisheries Office (GARFO) Regional Administrator, the Northeast Fisheries Science Center (NEFSC) Director, the NOAA Office of General Counsel, the Mid-Atlantic Fishery Management Council liaison, staff from the Atlantic States Marine Fisheries Commission (ASMFC), and representatives from the U.S. Coast Guard and NOAA's Office of Law Enforcement. Next, the Council will receive an update on work to review and improve the Monkfish Research Set-Aside Program. This report will be followed by an update on a joint New England and Mid-Atlantic Fishery Management Council action to reduce Atlantic sturgeon bycatch in monkfish and dogfish gillnet fisheries. The Council will initiate Monkfish Framework Adjustment 15 to incorporate proposed management measures. The Council then will receive an update on the formation of a new working group charged with addressing issues related to preventing gear conflicts between vessels using on-demand/ropeless fishing gear and vessels using mobile gear. To end the morning, the Council will receive a presentation and provide comments on the Draft NOAA Fisheries National Seafood Strategy.

After the lunch break, the Council will receive a presentation on a Northeast Fisheries Science Center survey to assess current social/economic conditions of commercial fishing crews, including hired captains. The survey is a follow-up to NEFSC's 2018-19 study to determine demographic, well-being, and work condition changes over time. The Enforcement Committee report will be up next. The Council will hear enforcement feedback on a number of issues, including: (1) on-demand/ropeless fishing gear and the Gear Conflict Working Group; (2) the Council's Atlantic Salmon Aquaculture Framework; (3) ongoing work to reduce gillnet/protected resources interactions; (4) NOAA Office of Law Enforcement priorities; and (5) Council enforcement-related work priorities for 2023. After that, the Scallop Committee will provide an update on scallop work priorities for 2023, which include

changes to the Scallop Research Set-Aside Program. Another important scallop-related item will be covered under the next agenda item, the Habitat Committee report. The first item of the habitat report will focus on the Northern Edge of Georges Bank and: (1) consider both Habitat Committee and Scallop Committee input, (2) discuss and potentially approve preliminary goals and objectives for possible management action, and (3) consider initiating action to revise the habitat management area (HMA) on the Northern Edge of Georges Bank to authorize scallop fishery access to the area. The habitat report also will include Council final action on a framework adjustment to the Atlantic Salmon Fishery Management Plan (FMP) to facilitate offshore Atlantic salmon aquaculture, followed by an update on offshore energy issues and other habitat-related work. The Council then will adjourn for the day.

Wednesday, April 19, 2023

The Council will begin the second day of its meeting with the Groundfish Committee report, which will cover multiple items. First, the Council will receive a progress report on the Groundfish Plan Development Team's work to develop performance metrics and indicators for the review process to evaluate the new groundfish monitoring system under Amendment 23 to the Northeast Multispecies Fishery Management Plan. The Council also will hear the Scientific and Statistical Committee's feedback on the metrics and indicators. The groundfish report will cover four other items: (1) an update on the facilitated process to develop new acceptable biological catch (ABC) control rules for groundfish; (2) an update on the Atlantic cod management transition plan should the Council go from managing two Atlantic cod stocks to four or five; (3) an update on addressing Canadian Atlantic halibut catch swings in the U.S. management process; and (4) a Council discussion on Gulf of Maine haddock. The Skate Committee report will follow, covering an update on work under 2023 skate priorities.

After the lunch break, members of the public will have the opportunity to speak during an open comment period on issues that relate to Council business but are not included on the published agenda for this meeting. The Council asks the public to limit remarks to 3-5 minutes. These comments will be received both in person and through the webinar. A guide for how to publicly comment through the webinar is available on the Council website at <https://s3.amazonaws.com/nefmc.org/>
