General Description of Collection:
This collection comprises the recordkeeping, reporting, and disclosure requirements associated with minimum capital requirements and overall capital adequacy standards for insured state nonmember banks, state savings associations, and certain subsidiaries of those entities. The data is used by the FDIC to evaluate capital before approving various applications by insured depository institutions, to evaluate capital as an essential component in determining safety and soundness, and to determine whether an institution is subject to prompt corrective action provisions.

There is no change in the method or substance of the collection. The 8,413-hour decrease in burden hours is a result of economic fluctuation, a decrease in the number of entities subject to the information collection, and efforts to align with the other banking agencies' related information collections.
