Please note: Submit all comments through the Federal eRulemaking portal (www.regulations.gov) or by U.S. mail to the address listed above.

FOR FURTHER INFORMATION CONTACT: To request more information on the proposed project or to obtain a copy of the information collection plan and instruments, contact Jeffrey M. Zirger, Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE, MS H21–8, Atlanta, Georgia 30329; Telephone: 404–639–7570; Email: omb@cdc.gov.

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501-3520), federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. In addition, the PRA also requires federal agencies to provide a 60-day notice in the Federal Register concerning each proposed collection of information, including each new proposed collection, each proposed extension of existing collection of information, and each reinstatement of previously approved information collection before submitting the collection to the OMB for approval. To comply with this requirement, we are publishing this notice of a proposed data collection as described below.

The OMB is particularly interested in comments that will help:

- 1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- 2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- 3. Enhance the quality, utility, and clarity of the information to be collected:
- 4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses; and
  - 5. Assess information collection costs.

### **Proposed Project**

Validated Interview and Survey of Outpatient Providers on Antibiotic Stewardship Interventions (OMB Control No. 0920–1308)— Reinstatement—National Center for Emerging Zoonotic and Infectious Disease (NCEZID), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

Inappropriate antibiotic prescribing is a major driver of antibiotic resistance

which is an urgent national and global health threat. Additionally, inappropriate antibiotic prescribing contributes to avoidable adverse drug events that cause substantial harms to patients. Most antibiotic prescribing originates in traditional outpatient settings such as physician offices and emergency departments, and at least 30% of these prescriptions are completely unnecessary.

Over the past decade there has been rapid growth in non-traditional outpatient settings including Urgent Care clinics. Recent evidence shows that when compared to traditional office settings, inappropriate antibiotic prescribing is substantially higher in Urgent Care clinics making this an important priority for antibiotic stewardship. The design, development, and evaluation of durable stewardship interventions addressing the unique setting of Urgent Care clinics is an important area of unmet need. This data collection will assess knowledge, attitudes, and practices related to antibiotic prescribing among clinicians after implementation of a year-long Urgent Care stewardship initiative.

CDC requests OMB approval for an estimated 62 annualized burden hours. There is no cost to respondents other than their time to participate.

### ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondents	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hours)	Total burden (in hours)
Urgent Care Clinician Urgent Care Clinician	Interview Guide	20 125	1 1	1 20/60	20 42
Total					62

## Agency Forms Undergoing Paperwork Reduction Act Review

In accordance with the Paperwork Reduction Act of 1995, the Centers for Disease Control and Prevention (CDC) has submitted the information collection request titled "Awardee Lead Profile Assessment (ALPA)" to the Office of Management and Budget (OMB) for review and approval. CDC previously published a "Proposed Data Collection Submitted for Public Comment and Recommendations" notice on December 20, 2022, to obtain comments from the public and affected agencies. CDC did not receive comments related to the previous notice. This notice serves to allow an additional 30 days for public and affected agency comments.

CDC will accept all comments for this proposed information collection project. The Office of Management and Budget is particularly interested in comments that:

(a) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(b) Evaluate the accuracy of the agencies estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(c) Enhance the quality, utility, and clarity of the information to be

collected;

- (d) Minimize the burden of the collection of information on those who are to respond, including, through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses; and
- (e) Assess information collection costs.

To request additional information on the proposed project or to obtain a copy of the information collection plan and instruments, call (404) 639-7570. Comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to www.reginfo.gov/public/ do/PRAMain. Find this particular information collection by selecting "Currently under 30-day Review-Open for Public Comments" or by using the search function. Direct written comments and/or suggestions regarding the items contained in this notice to the Attention: CDC Desk Officer, Office of Management and Budget, 725 17th Street NW, Washington, DC 20503 or by fax to (202) 395–5806. Provide written

comments within 30 days of notice publication.

### **Proposed Project**

Awardee Lead Profile Assessment (ALPA) (OMB Control No. 0920–1215, Exp. 03/31/2024)—Revision—National Center for Environmental Health (NCEH), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

The Centers for Disease Control and Prevention (CDC) is requesting Paperwork Reduction Act (PRA) clearance for a three-year revised Information Collection Request (ICR) titled "Awardee Lead Profile Assessment (ALPA)" (OMB Control No. 0920-1215; Exp. 03/31/2024). The goal of this ICR is to build on the CDC's existing childhood lead poisoning prevention program. CDC requires that ongoing and new CDC Childhood Lead Poisoning Prevention Programs (CLPPPs), including the FY21 "Childhood Lead Poisoning Prevention and Surveillance of Blood Lead Levels in Children" (CDC-RFA-EH21-2102), complete the ALPA annually. This annual information collection will be used to identify jurisdictional legal frameworks governing CDC-funded CLPPPs in the United States and strategies for implementing childhood lead poisoning prevention activities. CDC can use this information to inform guidance, resource development, and technical assistance activities in support of the ultimate goal, which is eliminating lead exposure in children.

The dissemination of these ALPA results will ensure that both funded and non-funded jurisdictions are able to: (1) identify policies and other factors that support or hinder childhood lead poisoning prevention efforts; (2) understand what strategies are being used by funded public health agencies to implement childhood lead poisoning prevention activities; and (3) use this knowledge to develop and apply similar strategies to support the national agenda to eliminate childhood lead poisoning. This program management information collection has been revised in several ways, including the addition of new answer options and questions to understand usage of the updated blood lead reference value (BLRV).

CDC will use one data collection mode, a web survey. A change in the mode of collection will not affect the total time burden requested as the time per response is the same for either mode, and the time to take the survey has remained consistent from 2021 estimates (47 minutes per response) despite revisions to the survey. This time estimate per response is based on pilot tests of the revised survey among eight respondents, and includes the time needed to review the ALPA Training Manual.

In total, the annual number of respondents remains unchanged at 75, and the annual time burden requested remains at 59 hours. There are no costs to respondents other than their time. The respondents are participating in this survey as a program requirement.

### **ESTIMATED ANNUALIZED BURDEN HOURS**

Type of respondents	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hours)
State or Local Governments (or their bona fide fiscal agents)	ALPA Web Survey	75	1	47/60

Proposed Data Collection Submitted for Public Comment and Recommendations

**AGENCY:** Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

**ACTION:** Notice with comment period.

**SUMMARY:** The Centers for Disease Control and Prevention (CDC), as part of its continuing effort to reduce public burden and maximize the utility of Government information, invites the general public and other Federal agencies the opportunity to comment on a proposed information collection, as required by the Paperwork Reduction Act of 1995. This notice invites comment on a proposed information collection project titled Reporting of the Essentials for Childhood (EfC): Preventing Adverse Childhood Experiences through Data to Action Program. This data collection will help to ensure that associated programs are
