Abstract: The New Source Performance Standards (NSPS) for Incinerators (40 CFR part 60, subpart E) were proposed on July 25, 1977; and amended on May 10, 2006. These regulations apply to existing incinerators that charge more than 45 metric tons per day (50 tons per day) of solid waste, and that commenced either construction or modification after August 17, 1971. Solid waste is defined as refuse, more than 50 percent of which is municipal type waste consisting of a mixture of paper, wood, yard wastes, food wastes, plastics, leather, rubber, and other combustibles, and noncombustible materials such as glass and rock. New incinerators will be subject to either 40 CFR part 60, subpart Eb, or 40 CFR part 60, subpart AAAA. Additionally, incinerators that are covered by either 40 CFR part 60, subparts Cb, Eb, AAAA, or BBBB; or by an EPA-approved State section 111(d)/129 plan implementing Subpart Cb or BBB; or by 40 CFR part 62, subpart FFF or JJJ, not subject to the above standards. This specific information is being collected to assure compliance with 40 CFR part 60, subpart E.

In general, all NSPS standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notification, reports, and records are essential in determining compliance, and are required of all affected facilities subject to the NSPS.

Form numbers: None.

Respondents/affected entities:

Existing incinerators that charge more than 45 metric tons per day (50 tons per day) of solid waste, and that commenced either construction or modification after August 17, 1971.

Respondent's obligation to respond: Mandatory (40 CFR part 60, subpart E).

Estimated number of respondents: 36 (total).

Frequency of response: Initially and occasionally.

Total estimated burden: 3,730 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$462,000 (per year), which includes \$128,000 in annualized capital/startup and/or operation & maintenance costs.

Changes in the estimates: The total decrease in burden from the most recently approved ICR is due to

adjustments. The adjustment decrease in burden from the most-recently approved ICR is due to a decrease in the number of sources. To identify the number of respondents subject to subpart E, we reviewed facilities identified in EPA's Enforcement and Compliance History Online (ECHO) database and the EPA's Large Municipal Waste Combustor and Small Municipal Waste Combustor Inventory (collected in 2019) to identify sources not subject to subpart E. The total number of respondents decreased from 87 in the previous ICR to 36 respondents. These changes reflect a more accurate estimate of the existing universe of incinerators subject to subpart E, which were last updated in 2007. In the previous ICR, estimates for Capital costs were in \$2007 dollars, and the O&M costs were adjusted to \$2018 dollars. For this ICR, the Capital and O&M costs were adjusted to \$2021 dollars based on annual CEPCI values.

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Comment Request; NSPS for Stationary Gas Turbines (Renewal)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA) has submitted an information collection request (ICR), NSPS for Stationary Gas Turbines (EPA ICR Number 1071.14, OMB Control Number 2060-0028) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. This is a proposed extension of the ICR, which is currently approved through July 31, 2023. Public comments were previously requested via the **Federal Register** (87 FR 43843) on July 22, 2022 during a 60-day comment period. This notice allows for an additional 30 days for public comments.

DATES: Comments may be submitted on or before May 3, 2023.

ADDRESSES: Submit your comments, referencing Docket ID Number EPA-

HQ-OAR-2022-0060, to EPA online using www.regulations.gov (our preferred method), by email to a-and-r-Docket@epa.gov, or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW, Washington, DC 20460. EPA's policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.

Submit written comments and recommendations to OMB for the proposed information collection within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting "Currently under 30-dat Review—Open for Public Comments" or by using the search function.

Abstract: The New Source Performance Standards (NSPS) for Stationary Gas Turbines (40 CFR part 60, subpart GG) were promulgated on September 10, 1979; and last-amended on February 27, 2014. These regulations

apply to existing facilities and new facilities that have stationary gas turbines with a heat input at peak load equal or greater than 10.7 gigajoules per hour (based on the lower heating value of the fuel fired). There are no new facilities under this subpart, as any facility which commenced construction, modification, or reconstruction after February 18, 2005 is subject to the NSPS for Stationary Combustion Turbines (40 CFR part 60, subpart KKKK). This information is being collected to assure compliance with 40 CFR part 60, subpart GG.

In general, all NSPS standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance, and are required of all affected facilities subject to NSPS.

Form numbers: None.

Respondents/affected entities: Stationary gas turbine facilities.

Respondent's obligation to respond: Mandatory (40 CFR part 60, subpart GG).

Estimated number of respondents: 535 (total).

Frequency of response: Initially and semiannually.

Total estimated burden: 69,100 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$8,290,000 (per year), includes \$0 in annualized capital/startup and/or operation & maintenance costs.

Changes in the estimates: There is no change in burden from the most-recently approved ICR as currently identified in the OMB Inventory of Approved Burdens. This is due to two considerations: (1) the regulations have not changed over the past three years and are not anticipated to change over the next three years; and (2) the growth rate for this industry is very low or non-existent, so there is no significant change in the overall burden. Since there are no changes in the regulatory requirements and there is no significant industry growth, there are also no changes in the capital/startup or operation and maintenance (O&M) costs.

Director, Regulatory Support Division.
