

area. Additionally, pilots equipped with RNAV capabilities could also navigate point to point using the existing fixes that would remain in place to support continued operations though the affected area. Visual flight rules (VFR) pilots who elect to navigate via the affected VOR Federal airways could also take advantage of the adjacent airways or ATC services listed previously.

Prior to this NPRM, the FAA published a rule for Docket No. FAA–2022–1424 in the **Federal Register** (88 FR 18026; March 27, 2023) amending V–474 by removing the airway segment overlying the Indian Head, PA, VORTAC between the intersection of the Morgantown, WV, VOR/Distance Measuring Equipment (VOR/DME) 010° and Johnstown, PA, VOR/DME 260° radials (NESTO Fix) and the St. Thomas, PA, VORTAC. The V–474 airway amendment is effective June 15, 2023 and is reflected in this action.

The Proposal

The FAA is proposing an amendment to 14 CFR part 71 to amend VOR Federal airways V–469 and V–501, and revoke V–474 due to the planned decommissioning of the VOR portion of the St. Thomas, PA, VORTAC. The proposed airway actions are described below.

V–469: V–469 currently extends between the Danville, VA, VORTAC and the Woodstown, NJ, VORTAC. The FAA proposes to remove the airway segment between the Johnstown, PA, VOR/DME and the Harrisburg, PA, VORTAC. As amended, the airway would be changed to extend between the Danville VORTAC and the Johnstown VOR/DME and between the Harrisburg VORTAC and the Woodstown VORTAC.

V–474: V–474 currently extends between the St. Thomas, PA, VORTAC and the Modena, PA, VORTAC. The FAA proposes to remove the airway in its entirety.

V–501: V–501 currently extends between the Martinsburg, WV, VORTAC and the Philipsburg, PA, VORTAC. The FAA proposes to remove the St. Thomas, PA, VORTAC airway point and replace it with the VINSE reporting point Fix at the intersection of the Harrisburg, PA, VORTAC 244°(T)/254°(M) and Philipsburg, PA, VORTAC 178°(T)/188°(M) radials. The VINSE Fix is being added to the Low Enroute charts and is located approximately three nautical miles north of the St. Thomas VORTAC. As amended, the airway would continue to extend between the Martinsburg VORTAC and the Philipsburg VORTAC.

The NAVAID radials listed in the V–469 description below are unchanged

and stated in degrees True north. The NAVAID radials listed in the V–501 description below are proposed and stated in degrees True (T) north and Magnetic (M) north.

Regulatory Notices and Analyses

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1F, “Environmental Impacts: Policies and Procedures” prior to any FAA final regulatory action.

Amendment of Class E Airspace; Carthage, TX

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This action proposes to amend the Class E airspace at Carthage, TX. The FAA is proposing this action as the result of an airspace review caused by the decommissioning of the Carthage non directional beacon (NDB). The name and geographic coordinates of the airport would also be updated to coincide with the FAA’s aeronautical database.

DATES: Comments must be received on or before May 25, 2023.

ADDRESSES: Send comments identified by FAA Docket No. FAA–2023–0333 and Airspace Docket No. 23–ASW–5 using any of the following methods:

SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it would amend the Class E airspace extending upward from 700 feet above the surface at Panola County Airport-Sharpe Field, Carthage, TX, to support instrument flight rule operations at this airport.

Comments Invited

The FAA invites interested persons to participate in this rulemaking by submitting written comments, data, or views. Comments are specifically

invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. To ensure the docket does not contain duplicate comments, commenters should submit only one time if comments are filed electronically, or commenters should send only one copy of written comments if comments are filed in writing.

The FAA will file in the docket all comments it receives, as well as a report summarizing each substantive public contact with FAA personnel concerning this proposed rulemaking. Before acting on this proposal, the FAA will consider all comments it received on or before the closing date for comments. The FAA will consider comments filed after the comment period has closed if it is possible to do so without incurring expense or delay. The FAA may change this proposal in light of the comments it receives.

Privacy: In accordance with 5USC 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT post these comments, without edit, including any personal information the commenter provides, to www.regulations.gov as described in the system of records notice (DOT/ALL–14FDMS), which can be reviewed at www.dot.gov/privacy.

Availability of Rulemaking Documents

An electronic copy of this document may be downloaded through the internet at www.regulations.gov. Recently published rulemaking documents can also be accessed through the FAA's web page at www.faa.gov/air_traffic/publications/airspace_amendments/.

You may review the public docket containing the proposal, any comments received, and any final disposition in person in the Dockets Office (see the **ADDRESSES** section for the address, phone number, and hours of operations). An informal docket may also be examined during normal business hours at the Federal Aviation Administration, Air Traffic Organization, Central Service Center, Operations Support Group, 10101 Hillwood Parkway, Fort Worth, TX 76177.

Incorporation by Reference

Class E airspace is published in paragraph 6005 of FAA Order JO 7400.11, Airspace Designations and Reporting Points, which is incorporated

by reference in 14 CFR 71.1 on an annual basis. This document proposes to amend the current version of that order, FAA Order JO 7400.11G, dated August 19, 2022, and effective September 15, 2022. These updates would be published subsequently in the next update to FAA Order JO 7400.11. That order is publicly available as listed in the **ADDRESSES** section of this document.

FAA Order JO 7400.11G lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Proposal

The FAA is proposing an amendment to 14 CFR part 71 by modifying the Class E airspace extending upward from 700 feet above the surface to within an 6.7-mile (decreased from a 7-mile) radius of Panola County Airport-Sharpe Field, Carthage, TX; removing the city associated with the airport in the airspace legal description to comply with changes to FAA Order JO 7400.2N, Procedures for Handling Airspace Matters; and updating the name (previously Panola County-Sharpe Field) and geographic coordinates of the airport to coincide with the FAA's aeronautical database.

This action is the result of an airspace review caused by the decommissioning of the Carthage NDB which provided navigation information for the instrument procedures at this airport.

Regulatory Notices and Analyses

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1F, "Environmental Impacts: Policies and Procedures" prior to any FAA final regulatory action.

Amendment of Restricted Areas R–3004A, R–3004B, and R–3004C; Fort Gordon, GA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This action proposes to amend restricted areas R–3004A, R–

3004B, and R–3004C at U.S. Army Installation Management Command (IMCOM) Fort Gordon, GA. The proposed amended airspace would align the lateral boundaries to encompass the majority of the training complex and amend the vertical divisions for better management to activate only the airspace required to support the Army's training. It would also remove restrictions on aircraft operations on weekends, flight above 12,000 feet above ground level (AGL), and the requirement that weather minima exceed standard Visual Flight Rules (VFR) criteria.

Under that section, the FAA is charged with prescribing regulations to assign the use of the airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it amends restricted area airspace at Fort Gordon, GA, to enhance aviation safety and accommodate essential U.S. Army training activities.

Comments Invited

The FAA invites interested persons to participate in this rulemaking by submitting written comments, data, or views. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. To ensure the docket does not contain duplicate comments, commenters should submit only one time if comments are filed electronically, or commenters should send only one copy of written comments if comments are filed in writing.

The FAA will file in the docket all comments it receives, as well as a report summarizing each substantive public contact with FAA personnel concerning this proposed rulemaking. Before acting on this proposal, the FAA will consider all comments it receives on or before the closing date for comments. The FAA will consider comments filed after the comment period has closed if it is possible to do so without incurring expense or delay. The FAA may change this proposal in light of the comments it receives.
