Second New England Winter Gas-Electric Forum

Docket No. AD22-9-000

June 20, 2023

Agenda

9:00 a.m.–9:15 a.m.: Welcome and Opening Remarks from the Chairman and Commissioners

9:15 a.m.–9:45 a.m.: Opening Presentations: Winters 2023/2024 and 2024/2025 in New England and the Role of Everett

The forum will commence with a presentation by ISO New England Inc. (ISO-NE) that discusses the upcoming winters of 2023/2024 and 2024/2025 with consideration for the Everett Marine Terminal's (Everett) availability and its impact on the ISO-NE electric grid. Following ISO-NE's presentation on upcoming winters, a second presentation will explain Everett's physical capabilities and its impact on the electric and natural gas systems in New England.

Panelists: To be announced.

9:45 a.m.–10:45 a.m.: Panel 1: Should Everett be Retained and, if so, how?

Panel 1 will allow panelists to provide their views on the need for Everett on the electric and natural gas systems in New England. This panel may also discuss fuel procurement needs and challenges, including the fuel procurement and LNG capabilities available to New England from facilities

other than Everett. Finally, this panel will discuss the constraints surrounding the planned retirement of Everett and the expected impact on the electric and natural gas systems in New England in future winters.

Panelists: To be announced.

10:45 a.m.–11:15 a.m.: Third Presentation: Extreme Weather Risks to ISO-NE, Presentation of the EPRI Study by ISO-NE and EPRI

The third presentation, by ISO-NE and the Electric Power Research Institute (EPRI), will detail the development of the EPRI model, the assumptions used, parameters considered, and the study results for the target year of 2027.¹ ISO-NE and EPRI will also explain the study's key conclusions and offer thoughts on how those conclusions should be considered in the context of developing solutions to the region's electricity and natural gas challenges.

Panelists: To be announced.

11:15 a.m.–12:15 p.m.: Panel 2:

Reactions to the EPRI Study

This panel will provide panelists an opportunity to provide their reactions to the EPRI study's assumptions, inputs, and results. This panel will discuss what actionable steps should be taken, if any, as a result of the study's findings, and whether additional study or analysis is needed.

Panelists: To be announced.

12:15 p.m.–1:45 p.m.: Lunch Break

1:45 p.m.–3:00 p.m.: Panel 3: Path to Sustainable Solutions—Infrastructure

Based on the findings and issues identified in the previous panels and presentations, Panel 3 will shift toward discussing potential infrastructure solutions beyond winter 2023/2024.

¹ Each year as part of its Annual Work Plan, ISO-NE develops "Anchor Projects" which for 2023 includes ISO-NE's work with EPRI to develop an "innovative framework for conducting a probabilistic energy-security study that assesses the operational impact of future extreme weather events." See ISO-NE, *ISO New England's 2023 Annual Work Plan*, (October 2022) at 7, https://www.iso-ne.com/static-assets/documents/2022/10/2023_awp_final_10_12_22.pdf. The study is currently under development and information can be found on the ISO-NE website. See ISO-NE, *Operational Impacts of Extreme Weather Events Key Project*, <https://www.iso-ne.com/committees/key-projects/operational-impacts-of-extreme-weather-events/>.

While retention of Everett has been raised as one possible solution, this panel will discuss the merits of other, longer-term solutions available to the region and the timelines for implementing them. Potential topics for discussion include: (1) new electric transmission interconnections with other regions; (2) the timing and impact of new offshore wind, onshore wind, and solar resource development; (3) transmission planning to enable efficient development of expected offshore wind additions; (4) increased natural gas pipeline infrastructure/capacity; and (5) increased oil and natural gas storage capability.

Panelists: To be announced.

3:15 p.m.–3:30 p.m.: Break

3:15 p.m.–4:30 p.m.: Panel 4: Path to Sustainable Solutions—Market Design

In Panel 4, Commissioners and panelists will discuss potential market solutions to New England's winter reliability challenges. Specifically, this panel will discuss any potential merits and benefits of market design changes to ISO-NE markets to enhance resource performance incentives, including incentives for resources to make advanced fuel procurements and/or maintain fuel inventories in the winter months; and align capacity market structure and rules with observed reliability risks—e.g., by reforming resource capacity accreditation and/or conducting prompt and/or seasonal capacity auctions.

Panelists: To be announced.

4:30 p.m.–5:00 p.m.: Closing Roundtable

In the Closing Roundtable, Commissioners and panelists will discuss what was learned through the presentations and panels and consider next steps. Topics will include what solutions stakeholders agree on pursuing and the timeline for implementing them as well as discussion of if, how, and when longer term solutions can be implemented sooner than currently expected.

Panelists: To be announced.
