

consideration of the public interest.<sup>68</sup> Further, DOE will consider extending an export commencement deadline only for such time as DOE deems necessary for the authorization holder to commence exports, based on the extenuating circumstances identified in the application.

If an authorization holder reaches the end of the seven-year export commencement period set forth in its non-FTA authorization, and cannot make such a demonstration, the non-FTA authorization will expire on the deadline set forth in the order.<sup>69</sup> DOE will consider any new export application under NGA section 3(a) without prejudice, which would be evaluated pursuant to the policies and analytical tools in use at the time of the new application.

### C. Policy Objectives

Over time, this policy should reduce the authorization overhang, as authorizations expire on their commencement deadline (unless an authorization holder makes the demonstration set forth above and DOE determines there is good cause to grant the commencement extension). As a result, the total volume of exports approved under DOE's non-FTA orders should become more aligned with the export capacity under construction or operating using U.S.-sourced LNG. This, in turn, will allow DOE to better assess whether any new non-FTA applications are in the public interest; provide more certainty to the U.S. and global LNG export markets; and ensure that DOE is making decisions utilizing the latest market information and analytical tools available. It should also encourage authorization holders to develop their export facilities in a timely manner, without excessive delays. Based on its analysis of the U.S. natural gas export market, and as discussed herein, DOE believes these changes are in the public interest.

### D. Applicability of Policy Statement

In order to provide industry and the public with fair notice of the change in DOE policy described herein, this Policy Statement will apply to all existing and

future long-term non-FTA authorizations, except for those authorizations for which an application requesting an export commencement extension was filed prior to issuance of this Policy Statement on April 21, 2023. DOE will review and act on those applications filed before April 21, 2023, at the appropriate time, using the case-by-case factual review undertaken by DOE prior to issuance of this Policy Statement.

Specifically, concurrently with this Policy Statement, DOE is issuing final orders on commencement extension applications filed by Lake Charles LNG Export Company, LLC; Lake Charles Exports, LLC; and Port Arthur LNG, LLC in their respective dockets. Because these applications were filed in 2022, DOE is not taking action on these applications under this Policy Statement, but rather under DOE's prior practice based on the record in each commencement extension proceeding.<sup>70</sup>

Likewise, because the commencement extension applications filed recently by Pieridae Energy (USA) Ltd. and Magnolia LNG, LLC (on February 2, 2023, and March 20, 2023, respectively) were filed before issuance of this Policy Statement, they will not be reviewed under this Policy Statement. At the appropriate time after the public comment period for each of these applications is complete, DOE will issue an order taking action on each application under DOE's prior practice based on the record in each commencement extension proceeding.<sup>71</sup>

### IV. Administrative Benefits

In this Policy Statement, DOE is not proposing any new requirements for applicants or authorization holders under 10 CFR part 590. Rather, DOE's intent is to provide greater transparency to authorization holders and participants in the U.S. natural gas export market, and to minimize administrative burdens.

### V. Approval of the Office of the Secretary

The Secretary of Energy has approved publication of this policy statement.

### Signing Authority

This document of the Department of Energy was signed on April 21, 2023, by Brad Crabtree, Assistant Secretary, Office of Fossil Energy and Carbon Management, pursuant to delegated authority from the Secretary of Energy. That document with the original signature and date is maintained by DOE. For administrative purposes only, and in compliance with requirements of the Office of the Federal Register, the undersigned DOE Federal Register Liaison Officer has been authorized to sign and submit the document in electronic format for publication, as an official document of the Department of Energy. This administrative process in no way alters the legal effect of this document upon publication in the **Federal Register**.

Signed in Washington, DC, on April 21, 2023.
