Abstract: Section 608 of the Clean Air Act (CAA), also known as the National Recycling and Emission Reduction Program (the Program), directs the Environmental Protection Agency (EPA) to issue regulations governing the use of ozone-depleting substances (ODS), including chlorofluorocarbons (CFCs) and hydrochlorofluorocarbons (HCFCs), during the maintenance, service, repair, or disposal of air-conditioning and refrigeration appliances. Section 608 also prohibits knowingly venting or releasing ozone-depleting and substitute refrigerants in the course of maintaining, servicing, repairing, or disposing of appliances or industrial process refrigeration except for de minimis releases associated with good faith attempts to recycle or recover refrigerants. The regulations require persons servicing refrigeration and air-conditioning appliances to follow certain service practices that reduce emissions of refrigerants. The regulations also establish certification programs for technicians, recovery/recycling equipment, and refrigerant reclamation. In addition, EPA requires that refrigerants contained in appliances be removed prior to disposal of the appliances and that all refrigeration and air-conditioning appliances be provided with a servicing aperture that facilitates recovery of the refrigerant. The Agency requires that substantial refrigerant leaks in appliances containing ozone-depleting refrigerant be repaired when they are discovered.

Form Numbers: 5900-404, 5900-405, 5900-407.

Respondents/affected entities: Entities required to comply with reporting and recordkeeping requirements include technicians; technician certification programs; refrigerant wholesalers; refrigerant reclaimers; refrigerant recovery equipment certification programs; certain refrigeration and air-conditioning equipment owners and/or operators; and other establishments that

perform refrigerant removal, service, or disposal.

Respondent's obligation to respond: Mandatory (40 CFR part 82, subpart F).

Estimated number of respondents: 572,727 (total).

Frequency of response: The frequency of responses varies from once a year to daily.

Total estimated burden: 425,514 hours (per year). Burden is defined at 5 CFR 1320.03(b)

Total estimated cost: \$31,432,946 (per year), includes \$0 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is a decrease of 8,845 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This decrease is due to adjusted respondent estimates for appliance leak repair and retrofit or retirement plan extension requests based on recently available industry data and reported activity.
