

www.nist.gov/chips/industrial-advisory-committee.

Individuals and representatives of organizations who would like to offer comments and questions related to items on the Committee's agenda for this meeting are invited to submit comments and questions in advance of the meeting. Written comments and questions may be submitted via the registration link. Approximately ten minutes will be reserved for public comments which will be read on a first-come, first-served basis. Public comments and questions will be received through the registration link.

Comments and questions from the public will not be considered during this period. Please note that all submitted comments or questions will be treated as public documents and will be made available for public inspection. All those wishing to submit a comment or question must submit their request and comment or question via the registration link <https://events.nist.gov/profile/21414> by 5:00 p.m. Eastern Time, Friday, June 2, 2023. All visitors to the meeting are required to pre-register to be admitted. Space is limited and in-person attendance will be allowed on a first-come, first-served basis. Anyone wishing to attend this meeting in-person or via web conference must register by 5 p.m. Eastern Time, Thursday, June 1, 2023, to attend. Please submit your full name, the organization you represent (if applicable), email address, and phone number via <https://events.nist.gov/profile/21414>. Non-U.S. citizens must submit additional information; please contact Tamiko Ford at Tamiko.Ford@nist.gov for more information.

For participants attending in person, please note that you must present a state-issued driver's license or identification card for access to the meeting. The license or identification card must be issued by a state that is compliant with the REAL ID Act of 2005 (Pub. L. 109-13), or by a state that has an extension for REAL ID compliance. NIST currently accepts other forms of federal-issued identification in lieu of a state-issued driver's license. Registration for in-person attendance will be available on site and open from 8:30 a.m. until 10 a.m.

Alicia Chambers,

NIST Executive Secretariat.

National Oceanic and Atmospheric Administration

[RTID 0648-XC989]

Mid-Atlantic Fishery Management Council (MAFMC); Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; public meeting.

SUMMARY: The Mid-Atlantic Fishery Management Council's Tilefish Monitoring Committee will hold a public meeting.

DATES: The meeting will be held on Wednesday, May 24, 2023, from 1 p.m. to 3 p.m. For agenda details, see **SUPPLEMENTARY INFORMATION**.

ADDRESSES: The meeting will be held via webinar. Webinar connection, agenda items, and any additional information will be available at www.mafmc.org/council-events.

Council address: Mid-Atlantic Fishery Management Council, 800 N. State Street, Suite 201, Dover, DE 19901; telephone: (302) 674-2331; www.mafmc.org.

FOR FURTHER INFORMATION CONTACT:

Christopher M. Moore, Ph.D., Executive Director, Mid-Atlantic Fishery Management Council, telephone: (302) 526-5255.

SUPPLEMENTARY INFORMATION: The Tilefish Monitoring committee will meet via webinar to review previously adopted 2024 commercial and recreational catch limits for both blueline and golden tilefish and recommend changes as appropriate. In addition, the Monitoring Committee will review commercial and recreational management measures for both species and recommend changes if needed. During this meeting, the Monitoring Committee will consider recent fishery performance as well as recommendations from the Advisory Panel, Scientific and Statistical Committee, and Council staff. Meeting materials will be posted to www.mafmc.org.

Special Accommodations

The meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Shelley Spedden at the Council Office, (302) 526-5251, at least 5 days prior to the meeting date.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: May 3, 2023.

Rey Israel Marquez,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; User Needs Survey by the Space Weather Advisory Group

The Department of Commerce will submit the following information collection request to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995, on or after the date of publication of this notice. We invite the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. Public comments were previously requested via the **Federal Register** on August 16, 2022 (87 FR 50291) during a 60-day comment period. This notice allows for an additional 30 days for public comments.

Agency: National Oceanic & Atmospheric Administration (NOAA), Commerce.

Title: User Needs Survey by the Space Weather Advisory Group.

OMB Control Number: 0648-XXXX.

Form Number(s): None.

Type of Request: Regular submission (New information collection).

Number of Respondents: 491.

Average Hours per Response:

- *Aviation:* 1 hour.
- *Emergency Management:* 8 hours.
- *Global Navigation Satellite System:* 15 minutes (Survey) and 1 hour (Interview).

- *Human Space Flight:* 1 hour.

- *Power Grid:* 1 hour.

- *Research Sector:* 1 hour.

- *Space Situational Awareness:* 1 hour.

Total Annual Burden Hours: 459.

Needs and Uses: The data collection is sponsored by DOC/NOAA/NWS/Space Weather Advisory Group (SWAG). The SWAG is required under 51 U.S.C. 60601(d)(3) to undertake a comprehensive survey of space weather product users to identify the "research,

observations, forecasting, prediction, and modeling advances required to improve space weather products.” Specifically, the SWAG will (i) assess the adequacy of current Federal Government goals for lead time, accuracy, coverage, timeliness, data rate, and data quality for space weather observations and forecasting; (ii) identify options and methods to, in consultation with the academic community and the commercial space weather sector, improve upon the advancement of the goals described in clause (i); (iii) identify opportunities for collection of new data to address the needs of the space weather user community; (iv) identify methods to increase coordination of space weather research to operations and operations to research; (v) identify opportunities for new technologies, research, and instrumentation to aid in research, understanding, monitoring, modeling, prediction, forecasting, and warning of space weather; and (vi) identify methods and technologies to improve preparedness for potential space weather phenomena.

This collection identified seven sectors (Aviation, Emergency Management, Global Navigation Satellite System, Human Space Flight, Power Grid, Research, and Space Situational Awareness/Space Traffic Management) that will be consulted as part of this effort. Information will be collected on a one-off basis from each of the sectors. Respondents in each sector include the general public, defined as adults ages 18+. Members of the SWAG will oversee recruitment of the respondents. Respondents will be asked questions about their current use of space weather observations, information, and forecasts, technological systems, components or elements affected by space weather, current and future risk and resilience activities, future space weather requirements, and unused or new types of measurements or observations that would enhance space weather risk mitigation. This data collection serves many purposes, including gaining a better understanding of the needs of users of space weather products. The SWAG will use the data to identify the space weather research, observations, forecasting, prediction, and modeling advances required to improve space weather products. Specifically, the information will be used to advise the National Science and Technology Council’s Space Weather Operations, Research, and Mitigation (SWORM) Subcommittee on improving the ability of the United States to prepare for,

mitigate, respond to, and recover from space weather storms.

Affected Public: Individuals or households; Business or other for-profit organizations; Not-for-profit institutions; State, Local, or Tribal government; Federal government.

Frequency: Once.

Respondent’s Obligation: Voluntary.

Legal Authority: 51 U.S.C. 60601, Space weather.

This information collection request may be viewed at www.reginfo.gov. Follow the instructions to view the Department of Commerce collections currently under review by OMB.

Written comments and recommendations for the proposed information collection should be submitted within 30 days of the publication of this notice on the following website www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function and entering the title of the collection.

Sheleen Dumas,

Department PRA Clearance Officer, Office of the Under Secretary for Economic Affairs, Commerce Department.

Atlantic Highly Migratory Species; Climate Vulnerability Assessment Public Meeting and Webinar

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public workshop and webinar/conference call.

SUMMARY: NMFS will hold a 3-day Atlantic Highly Migratory Species (HMS) Climate Vulnerability Assessment (CVA) public workshop and webinar in May 2023. NMFS uses CVAs to identify which species may be most vulnerable based on their exposure to projected changes in the environment (e.g., warming oceans) and their sensitivity or adaptability to handle those changes based on their life history characteristics. In-person workshops are a key component of the CVA scoring process. This workshop will allow a scientific panel of 15 experts to evaluate species sensitivity to climate change,

identify and fix errors in scoring, allow for appropriate consideration of new information, address bias, and provide their individual scores for, and opinions on, HMS. The meeting is open to the public.

DATES: The CVA workshop and webinar will be held on Tuesday, May 16, 2023 through Thursday, May 18, 2023 from 9 a.m. to 5 p.m.

ADDRESSES: The in-person workshop will be held at the Embassy Suites by Hilton, 8000 José M. Tartak Ave, San Juan, Puerto Rico, 00979. The meeting will also be accessible via webinar/conference call. Please use this form to register for the workshop in order to receive access information: <https://forms.gle/VaoPBRX24pAMWFB6>.

Agendas and additional meeting information can be found here: <https://www.fisheries.noaa.gov/event/atlantic-highly-migratory-species-climate-vulnerability-assessment-public-workshop-and>.

FOR FURTHER INFORMATION CONTACT: Jennifer Cudney, 301–427–8503, jennifer.cudney@noaa.gov, or Tyler Loughran, 301–427–8503, tyler.loughran@noaa.gov.

SUPPLEMENTARY INFORMATION: Atlantic HMS fisheries (tunas, billfish, swordfish, and sharks) are managed under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act; 16 U.S.C. 1801 *et seq.*) and the Atlantic Tunas Convention Act (16 U.S.C. 971 *et seq.*). The 2006 Consolidated HMS Fishery Management Plan and its amendments are implemented by regulations at 50 CFR part 635.

The NMFS Climate Science Strategy (<https://www.fisheries.noaa.gov/national/climate/noaa-fisheries-climate-science-strategy>) prioritized the use of CVAs to better understand what is at risk and why, and to help triage and prioritize climate science funding and resource decisions. NMFS uses CVAs to identify which species may be most vulnerable based on their exposure to projected changes in the environment (e.g., warming oceans) and their sensitivity or adaptability to handle those changes based on their life history characteristics. In-person workshops are a key component of the CVA scoring process. This HMS CVA workshop will allow a scientific panel of 15 experts to evaluate the sensitivity of HMS to climate change; identify and fix errors in scoring; allow for appropriate consideration of new information; address bias; and provide their individual scores for, and opinions on, HMS. Panelists will also consider, and
