

feet above the surface should be extended to 10.5 miles east of the airport to fully contain departing IFR operations until they reach 1,200 feet above the surface while conducting the RWY 25 ODP.

The FAA proposes administrative modifications to the airport's legal descriptions. The geographic coordinates located on line three of the text header of both the Class E surface area and Class E airspace extending from 700 feet above the surface at the airport should be updated to match the FAA's database. The Bear Creek Non-directional Beacon was decommissioned on December 2, 2021, and reference to it should be removed from both of the airport's legal descriptions. Finally, reference to the Tanana VOR/DME navigational aid should be removed from both legal descriptions as it is no longer needed.

Regulatory Notices and Analyses

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1F, "Environmental Impacts: Policies and Procedures" prior to any FAA final regulatory action.

[Docket No. 230504–0120]

RIN 0648–BH85

Endangered and Threatened Species: Designation of Nonessential Experimental Populations of Chinook Salmon Upstream of Shasta Dam, Authorization for Release, and Adoption of Limited Protective Regulations Under the Endangered Species Act Sections 10(j) and 4(s)

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Proposed rule; notification of availability of a draft environmental assessment; request for comments.

SUMMARY: We, NMFS, propose a rule to designate and authorize the release of nonessential experimental populations (NEPs or experimental populations) of Sacramento River (SR) winter-run Chinook salmon (*Oncorhynchus tshawytscha*) and Central Valley (CV) spring-run Chinook salmon (*O. tshawytscha*) in the McCloud and Upper Sacramento Rivers upstream of Shasta Dam (the NEP Area), California, and, under the Endangered Species Act (ESA), establish a limited set of take exceptions for the experimental populations. Successful reintroduction of populations within the species’ historical ranges would contribute to viability and further conservation of these species. The issuance of limited protective regulations for the conservation of these species would provide regulatory assurances to the people in the Upper Sacramento River and McCloud River watersheds. This proposed rule also announces the availability for comment of a draft environmental assessment (EA)

analyzing the environmental impacts of this proposed experimental population designation and the associated take exceptions.

DATES: Comments on this proposed rule and EA, must be received no later than June 12, 2023.

ADDRESSES: You may submit comments on this document, identified by NOAA–NMFS–2018–0052, by the following method:

- **Electronic Submission:** Submit all electronic public comments via the Federal e-Rulemaking Portal. Go to <https://www.regulations.gov> and enter NOAA–NMFS–2018–0052 in the Search box. Click on the “Comment” icon, complete the required fields, and enter or attach your comments.

Instructions: Comments sent by any other method, to any other address or individual, or received after the end of the comment period, may not be considered by NMFS. All comments received are part of the public record and will generally be posted to <http://www.regulations.gov> without change. All personal identifying information (e.g., name, address, etc.), confidential business information, or otherwise sensitive information submitted voluntarily by the sender will be publicly accessible. NMFS will accept anonymous comments (enter “N/A” in the required fields if you wish to remain anonymous). Attachments to electronic comments will be accepted in Microsoft Word, Excel, or Adobe PDF file formats only. You may access a copy of the draft EA by the following:

SUPPLEMENTARY INFORMATION:

Background Information Relevant to Experimental Population Designation

NMFS listed the SR winter-run Chinook salmon Evolutionarily Significant Unit (ESU)¹ as endangered under the ESA, 16 U.S.C. 1531 *et seq.*, on January 4, 1994 (59 FR 440) and reaffirmed this status on June 28, 2005 (70 FR 37159), and 5-year reviews announced on August 15, 2011 (76 FR 50448), April 14, 2014 (79 FR 20802), and May 26, 2016 (81 FR 33468). Section 9 of the ESA prohibits take of the endangered SR winter-run Chinook
