BILLING CODE 5001-06-C

Transmittal No. 21-71

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act, as amended

(i) *Prospective Purchaser:* Government of France

(ii) Total Estimated Value:

Major Defense Equipment * .. \$47 million Other \$41 million

TOTAL \$88 million

(iii) Description and Quantity or Quantities of Articles or Services under Consideration for Purchase: Foreign Military Sales (FMS) case FR-D-DAJ, was below congressional notification threshold at \$71 million (\$24.2 million in MDE) and included five (5) **Communications Intelligence Sensor** Pod Suites (MDE). The Government of France has requested the case be amended to include up to eight (8) Communications Intelligence Sensor Pod Suites (MDE) and additional non-MDE services. This amendment will push the current case above the MDE notification threshold and thus requires notification of the entire case. Major Defense Equipment (MDE):

Eight (8) Communications Intelligence Sensor Pod Suites

Non-MDE:

Also included is ground handling equipment; spares and repair parts; consumables and accessories; secure communications and cryptographic devices; software and support services; publications and technical documentation; U.S. Government and contractor engineering, technical and logistics support services; and other related elements of logistical and program support.

(iv) *Military Department:* Air Force (FR–D–DAJ)

(v) *Prior Related Cases, if any:* FR–D– STE, FR–D–SAC, and FR–D–SAD

(vi) Sales Commission, Fee, etc., Paid, Offered, or Agreed to be Paid: None

(vii) Sensitivity of Technology Contained in the Defense Article or Defense Services Proposed to be Sold:

See Attached Annex (viii) Date Report Delivered to

Congress: January 14, 2022 * As defined in Section 47(6) of the Arms Export Control Act.

POLICY JUSTIFICATION

France—MQ–9 Communications Intelligence Sensor Pod Suites

The Government of France has requested to buy up to eight (8) Communications Intelligence Sensor Pod Suites, that will be added to a

previously implemented case. The original FMS case and amendments, valued at \$71 million, included five (5) **Communications Intelligence Sensor** Pod Suites. Therefore, this notification is for a total of eight (8) **Communications Intelligence Sensor** Pod Suites. Also included is ground handling equipment; spares and repair parts; consumables and accessories; secure communications and cryptographic devices; software and support services; publications and technical documentation; U.S. Government and contractor engineering, technical and logistics support services; and other related elements of logistical and program support. The estimated total cost is \$88 million.

This proposed sale will support the foreign policy goals and national security objectives of the United States by helping to improve the security of a NATO Ally that is an important force for political stability and economic progress in Europe.

The proposed sale will improve France's capability to meet current and future threats by ensuring the operational readiness of the French Air and Space Force. France's MQ–9 aircraft fleet provides Intelligence, Surveillance, and Reconnaissance that supports coalition operations. France will have no difficulty absorbing this equipment into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractor will be BAE Systems, York, PA. General Atomics Aeronautical Systems, San Diego, CA is on contract for integration work only. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale may require the assignment of additional U.S. Government or contractor representatives to France.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 21–71

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex

Item No. vii

(vii) Sensitivity of Technology: 1. The MQ–9 Communications Intelligence (COMINT) Sensor Pod Suites are for the MQ–9 aircraft that France previously acquired. The COMINT Sensor Pod Suite is an additional payload sensor which provides intelligence, data collection, and analysis capabilities. The pods will provide France's MQ–9 program with the equipment necessary to support capabilities that France is already employing.

2. The highest level of classification of defense articles, components, and services included in this potential sale is SECRET.

3. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures that might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.

4. A determination has been made that France can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.

5. All defense articles and services listed in this transmittal have been authorized for release and export to the Government of France.

December 21, 2021

The Honorable Nancy Pelosi Speaker of the House U.S. House of Representatives H-209, The Capitol Washington, DC 20515

Dear Madam Speaker:

Pursuant to the reporting requirements of Section 36(b)(1) of the Arms Export Control Act, as amended, we are forwarding herewith Transmittal No. 22-02, concerning the Army's proposed Letter(s) of Offer and Acceptance to the Government of Lithuania for defense articles and services estimated to cost \$125 million. After this letter is delivered to your office, we plan to issue a news release to notify the public of this proposed sale.

Sincerely,

Jedidiah P. Royal Acting Director

POLICY JUSTIFICATION

Lithuania—Javelin Missiles

The Government of Lithuania has requested to buy an additional two hundred thirty (230) Javelin FGM-148F missiles and twenty (20) Javelin Command Launch Units (CLUs), that will be added to a previously implemented case that was under threshold. The original FMS case, valued at \$28.23 million, included one hundred eleven (111) Javelin FGM–148F missiles and ten (10) Javelin CLUs. Therefore, this notification is for a total of three hundred forty-one (341) Javelin FGM–148F missiles and thirty (30) Javelin CLUs. Also included are battery chargers; Enhanced Producibility Basic Skills Trainer (EPBST); training; publications; support equipment; United States Government technical assistance; and other related elements of logistics and program support. The total estimated cost is \$125 million.

This proposed sale will support the foreign policy and national security of the United States by helping to improve the security of a NATO ally that is an important force for ensuring peace and stability in Europe.

The proposed sale will help Lithuania build its long-term defense capacity to defend its sovereignty and territorial integrity in order to meet its national defense requirements. It is vital to the U.S. national interest to assist Lithuania in developing and maintaining a strong and ready self-defense capability. Lithuania will have no difficulty absorbing this equipment into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractor will be Raytheon/Lockheed Martin Corporation Joint Venture, Orlando, FL, and Tucson, AZ. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this sale will not require the assignment of any U.S. Government or contractor representatives to Lithuania.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 22–02

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex

Item No. vii

(vii) Sensitivity of Technology: 1. The Javelin Weapon System is a medium-range, man portable, shoulderlaunched, fire and forget, anti-tank system for infantry, scouts, and combat engineers. It may also be mounted on a variety of platforms including vehicles, aircraft, and watercraft. The system weighs 49.5 points and has a maximum range in excess of 2,500 meters. The system is highly lethal against tanks and other systems with conventional and reactive armors. The system possesses a secondary capability against bunkers.

2. Javelin's key technical feature is the use of fire-and-forget technology which allows the gunner to fire and immediately relocate or take cover. Additional special features are the top attack and/or direct fire modes, an advanced tandem warhead and imaging infrared seeker, target lock-on before launch, and soft launch from enclosures or covered fighting positions. The Javelin missile also has a minimum smoke motor thus decreasing its detection on the battlefield.

3. The Javelin Weapon System is comprised of two major tactical components, which are a reusable Command Launch Unit (CLU) and a round contained in a disposable launch tube assembly. The CLU incorporates an integrated day-night sight that provides a target engagement capability in adverse weather and countermeasure environments. The CLU may also be used in a stand-alone mode for battlefield surveillance and target detection. The CLU's thermal sight is a second generation Forward Looking Infrared (FLIR) sensor. To facilitate initial loading and subsequent updating

of software, all on-board missile software is uploaded via the CLU after mating and prior to launch.

4. The missile is autonomously guided to the target using an imaging infrared seeker and adaptive correlation tracking algorithms. This allows the gunner to take cover or reload and engage another target after firing a missile. The missile has an advanced tandem warhead and can be used in either the top attack or direct fire modes (for target undercover). An onboard flight computer guides the missile to the selected target.

5. The highest level of classification of defense articles, components, and services included in this potential sale is SECRET.

6. If a technologically advanced adversary were to obtain knowledge of the hardware and software elements, the information could be used to develop countermeasures or equivalent systems which might reduce system effectiveness or be used in the development of a system with similar or advanced capabilities.

7. A determination has been made that the Government of Lithuania can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.

8. Áll defense articles and services listed in this transmittal are authorized for release and export to the Government of Lithuania.
