

Hunting on refuges is regulated by both State and Federal laws, as well as through refuge-specific regulations. These refuge-specific regulations are made in accordance with hunt plans required to be developed for each refuge. These hunt plans outline refuge-specific bag limits, season dates, areas open and closed to hunting, allowed hunting time, and other requirements. The hunt plans are an important tool that refuges use to manage harvest, safety, and visitor experience.

Creating hunt plans relies on sound biological and social data. Understanding hunter experience, preference, and harvest helps refuge

managers and planners tailor hunt plans to suit biological and visitor objectives and maintain a safe environment for hunters and non-hunting visitors.

To ensure the surveys were comprehensive, the Service convened an interdisciplinary team made up of biologists, managers, visitor services specialists, social scientists, and law enforcement officers. The team identified data gaps needed to inform future hunt plan development, identified safety concerns, and considered methods to better understand hunter preference in order to improve visitor experience.

The public may request copies of any form or document contained in this

information collection by sending a request to the Service Information Collection Clearance Officer in ADDRESSES, above.

Title of Collection: Northeast Region Hunter Participation Surveys.

OMB Control Number: 1018–New.

Form Numbers: Forms 3–2557 and 3–2558.

Type of Review: Request for new OMB control number.

Respondents/Affected Public: Individuals.

Respondent's Obligation: Voluntary.

Frequency of Collection: On occasion.

Total Estimated Annual Nonhour Burden Cost: None.

Requirement	Average number of annual respondents	Average number of responses each	Average number of annual responses	Average completion time per response (minutes)	Estimated annual burden hours *
Form 3–2557, "Hunter Participation Survey"					
Individuals	50	1	50	20	17
Form 3–2558, "Spring Turkey Hunter Participation Survey"					
Individuals	50	1	50	10	8
<i>Totals:</i>	100	100	25

* Rounded.

An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

The authority for this action is the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

Madonna Baucum,

Information Collection Clearance Officer, U.S. Fish and Wildlife Service.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

[Docket No. FWS–HQ–MB–2023–0085; FXMB12310900WHO–234–FF09M26000; OMB Control Number 1018–0023]

Agency Information Collection Activities; Migratory Bird Surveys

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of information collection; request for comment.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, we, the U.S. Fish and Wildlife Service

(Service), are proposing to renew an information collection, with changes.

DATES: Interested persons are invited to submit comments on or before August 1, 2023.

ADDRESSES: Send your comments on the information collection request (ICR) by one of the following methods (please reference OMB Control No. 1018–0023 in the subject line of your comment):

- *Internet (preferred):* <http://www.regulations.gov>. Follow the instructions for submitting comments on Docket No. FWS–HQ–MB–2023–0085.

- *Email:* Info_Coll@fws.gov.
- *U.S. mail:* Service Information Collection Clearance Officer, U.S. Fish and Wildlife Service, 5275 Leesburg Pike, MS: PRB (JAO/3W); Falls Church, VA 22041–3803.

FOR FURTHER INFORMATION CONTACT:

Madonna L. Baucum, Service Information Collection Clearance Officer, by email at Info_Coll@fws.gov, or by telephone at (703) 358–2503. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered

within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION: In accordance with the Paperwork Reduction Act (PRA; 44 U.S.C. 3501 *et seq.*) and its implementing regulations in the Code of Federal Regulations (CFR) at 5 CFR 1320, all information collections require approval under the PRA. We may not conduct or sponsor and you are not required to respond to a collection of information unless it displays a currently valid OMB control number.

As part of our continuing effort to reduce paperwork and respondent burdens, we invite the public and other Federal agencies to comment on new, proposed, revised, and continuing collections of information. This helps us assess the impact of our information collection requirements and minimize the public's reporting burden. It also helps the public understand our information collection requirements and provide the requested data in the desired format.

We are especially interested in public comment addressing the following:

- (1) Whether or not the collection of information is necessary for the proper performance of the functions of the

agency, including whether or not the information will have practical utility;

(2) The accuracy of our estimate of the burden for this collection of information, including the validity of the methodology and assumptions used;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) How might the agency minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.*, permitting electronic submission of response.

Comments that you submit in response to this notice are a matter of public record. We will include or summarize each comment in our request to OMB to approve this ICR. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Abstract: The Migratory Bird Treaty Act (16 U.S.C. 703–711) and the Fish and Wildlife Act of 1956 (16 U.S.C. 742d) designate the Department of the Interior as the key agency responsible for (1) the wise management of migratory bird populations frequenting the United States, and (2) the setting of hunting regulations that allow appropriate harvests that are within the guidelines that will allow for those populations' well-being. These responsibilities dictate that we gather accurate data on various characteristics of migratory bird harvest. Based on information from harvest surveys, we can adjust hunting regulations as needed to optimize harvests at levels that provide a maximum of hunting recreation while keeping populations at desired levels.

Under 50 CFR 20.20, migratory bird hunters must register for the Migratory Bird Harvest Information Program (HIP) in each State in which they hunt each year. State natural resource agencies must send names and addresses of all migratory bird hunters to the Service's Branch of Monitoring and Information Management, Division of Migratory Bird Management, on an annual basis.

The Migratory Bird Hunter Survey is based on the Migratory Bird Harvest Information Program. We randomly

select migratory bird hunters and ask them to report their harvests. The resulting estimates of harvest per hunter are combined with the complete list of migratory bird hunters to provide estimates of the total harvest for the species surveyed.

The Parts Collection Survey estimates the species, sex, and age composition of the harvest, and the geographic and temporal distribution of the harvest. Randomly selected successful hunters who responded to the Migratory Bird Hunter Survey the previous year, as well as a sample of hunters who were not surveyed the previous year, are asked to complete and return a letter if they are willing to participate in the Parts Collection Survey. We provide postage-paid envelopes to respondents before the hunting season and ask them to send in a wing or the tail feathers from each duck or goose that they harvest, or a wing from each mourning dove, woodcock, band-tailed pigeon, or rail that they harvest. We use the wings and tail feathers to identify the species, sex, and age of the harvested sample. We also ask respondents to report the date and location of harvest for each bird on the outside of the envelope. We combine the results of this survey with the harvest estimates obtained from the Migratory Bird Hunter Survey to provide species-specific national harvest estimates.

The combined results of these surveys enable us to evaluate the effects of season length, season dates, and bag limits on the harvest of each species, and thus help us determine appropriate hunting regulations.

The Sandhill Crane Harvest Survey is an annual questionnaire survey of people who obtained a sandhill crane hunting permit. At the end of the hunting season, we randomly select a sample of permit holders and ask them to report the date, location, and number of birds harvested for each of their sandhill crane hunts. Their responses provide estimates of the temporal and geographic distribution of the harvest as well as the average harvest per hunter, which, combined with the total number of permits issued, enables us to estimate the total harvest of sandhill cranes. Based on information from this survey, we adjust hunting regulations as needed.

In 2019, we implemented a new, online platform for the Migratory Bird Hunter Survey. The platform is optimized for use on multiple devices (computer, tablet, or phone; Android or Apple OS). This online survey platform walks a participant through the process of entering their harvest for a single day and asks for one piece of information at

a time, which reduces confusion and the likelihood that the hunter will provide incorrect information. The online system improves data quality and prevents errors (*e.g.*, reporting harvest of the wrong species, or in the wrong State). We conducted the full paper survey through 2022, in order to ensure that data collected through the online platform was sound, and to provide a side-by-side comparison of harvest estimates that could be used to calibrate the old survey to the new one. This was particularly important for maintaining a continuous time series of harvest estimates, despite changing methodology. In the spring of 2023, we will conduct the full survey using the online application but will provide a paper survey by mail to those hunters who request them.

Proposed Revisions

We propose to revise our Parts Collection Survey over the next 3 years (2023–2026) to replace or substantially augment bird wings and tails collection with photos of harvested birds, in order to reduce survey costs and perceived risk of disease transmission through the handling of wild bird parts. Preliminary assessments have indicated that photos taken by hunters of harvested waterfowl can be used to determine species, age and sex of birds, without requiring examination of bird parts “in the hand.”

We propose to conduct a 3-year pilot study with the development of a mobile application that can be used by hunters to take photos of the birds they harvest and upload them to our database, and a web-based interface for expert biologists to use to examine and identify birds from photos. We propose to conduct the pilot study with up to 150 hunters each year, which allows us to (1) evaluate the potential of using photo identification for other species in the Parts Collection survey including doves, band-tailed pigeons, woodcock and rails, (2) to achieve sample sizes sufficient to assess the limitations of photo identification for all waterfowl species, (3) to develop methods to enhance the quality of hunter-supplied photos, and (4) to amass an annotated set of photos to provide to researchers investigating the potential of machine-learning based image classification methods for automated identification of species, age and sex.

In addition, there is the potential for introducing other biases in data collection when transitioning to a photo survey; to assess these biases and provide uninterrupted information on annual harvest we intend to conduct the full parts survey during this 3-year period to provide a comparison of

results among the two surveys. If photo identification proves difficult for some species, we may continue a limited sample of parts collection to ensure harvest estimates can be calculated.

Title of Collection: Migratory Bird Information Program and Migratory Bird Surveys, 50 CFR 20.20.

OMB Control Number: 1018-0023.
Form Number: Forms 3-165, 3-165A through E, and 3-2056J through N.
Type of Review: Revision of a currently approved collection.
Respondents/Affected Public: States and migratory game bird hunters.
Respondent's Obligation: Mandatory for HIP registration information;

voluntary for participation in the surveys.

Frequency of Collection: Annually for States or on occasion for migratory bird hunters.

Total Estimated Annual Nonhour Burden Cost: None.

Endangered Wildlife; Recovery Permit Applications

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of receipt of permit applications; request for comments.

SUMMARY: We, the U.S. Fish and Wildlife Service, invite the public to

comment on the following applications for permits to conduct activities intended to recover and enhance endangered species survival. With some exceptions, the Endangered Species Act (ESA) prohibits certain activities that may impact endangered species, unless a Federal permit allows such activity. The ESA also requires that we invite public comment before issuing these permits.

DATES: To ensure consideration, please submit your written comments by July 3, 2023.
