Abstract: This collection is authorized by Section 101(b) of the National

Historic Preservation Act, as amended (54 U.S.C. 302301), which specifies the role of States, Tribes, and local governments in the Historic Preservation Program (HPP). This information collection has an impact on State, Tribal, and local governments that wish to participate formally with the National Park Service in the HPP. Information is also requested to meet grant management and monitoring of responsibilities for States, Tribes, local government, and other eligible grant recipients under 54 U.S.C. 300101 *et seq.* and 2 CFR 200.

Each year Congress directs the NPS to use part of the annual appropriation from the Historic Preservation Fund (HPF) for the State grant program and the Tribal grant programs to assist States and Tribes in carrying out their statutory role in the HPP. Through competitive grant programs, Congress also directs NPS to provide financial assistance to a variety of eligible grant recipients to support the broad cultural resource mandates of the National Historic Preservation Act and for other purposes.

We use these information collections to manage our statutory partnerships and for managing grants (usually to those same partners). We are requesting to update the name of this collection from “*Procedures for State, Tribal, and Local Government Historic Preservation Programs*” to “*Procedures for State, Tribal, and Local Government Historic Preservation Programs & Management of Historic Preservation Fund Grants*.” This change is to clarify our roles in managing our statutory partnerships and competitive (project) grants and formula grants.

The information from this collection is required to determine if State, Tribal, and local governments meet minimum standards and requirements for participation in the HPP and to meet program-specific requirements as well as government-wide requirements for Federal grant programs. This revision will seek approval for new collections to support competitive (project) grants, clarify collection requirements for formula grants, and reduce one collection related to the HPP.

Due to an unprecedented funding increase, we anticipate an increase in the number of applicants and awarded grants. We are requesting approval for the 10 new forms (listed below). The forms will enable us to prudently manage, monitor, track, and steward federal funding resources and our investment in the nation's historic resources and collections.

• **Interim Progress Report Worksheet** (applies to all project grants): This

worksheet will provide an organized and systematic way for grant recipients to provide a performance progress report that relates grant-supported project work to expenditures. The report also assists with tracking grantee compliance with award terms and conditions related to environmental and historic resource protection laws.

• **Final Report Worksheet** (applies to all project grants): This worksheet will be used to reconcile the proposed project budget with actual expenditures, including final verification that grantee administrative and indirect costs expenditures did not exceed the statutory maximum. The worksheet also describes grant-assisted accomplishments and serves as the final performance report. Finally, the worksheet gathers data on the impact of the grant award.

• **Project Image Form** (applies to all project grants): This form is used to gather representative photographs, prints, drawings, or other visual depictions of the historic resources impacted by the project. Project images are used to depict damage to or illustrate areas needing repair in historic resources.

• **Budget Narrative** (applies to all project grants): This form will provide a standardized way for applicants to relate budget data depicted in aggregate on the SF-424A and/or SF-424C to specific work items. The data in the budget narrative are used to perform an initial price/cost analysis as part of assessing the reasonability of project budgets as well as compliance with program funding limitations.

• **Project Description Worksheet** (applies to all project grants): This worksheet will be used in the merit review selection process to rank and select projects for funding. The project description worksheet will be used by applicants to describe their project, relate project work to the specific grant program, and demonstrate the reasonableness of project budgets and staff qualifications.

• **Emergency Supplemental Historic Preservation Fund Grant Final Report Worksheet** (applies to the named grant program only): Due to the funding requirements and program goals for the Emergency Supplemental Historic Preservation Fund grants, a program-specific final report worksheet is required. This worksheet will require grantees to describe the full scope of grant-assisted disaster recovery operations and provide vital feedback to improve the delivery of federal financial assistance post-disaster.

• **National Register Eligibility Worksheet** (applies only to grant

applications for development/ construction work): For those grant programs which support project work on resources that are listed in, or eligible for listing in, the National Register of Historic Places, this worksheet will be used to document the name of the resource(s) as listed or determined eligible for listing. Additionally, this worksheet records the National Register listing number (called NRIS) for listed resources. This worksheet is necessary to determine whether the proposed project work is eligible for funding.

- *Subgrant project description* (applies to Paul Bruhn Historic Revitalization Subgrant Program and Emergency Supplemental Historic Preservation Fund grants only): The information collected will include the scope of work, name and address of subgrantee, subgrant budget, and subgrant final accomplishments. This information is required as part of prime recipient monitoring, to assist with review and compliance with environmental and historic resource protections laws, and to record expenditures of prime award funding bypass through entities.

- *National Environmental Policy Act (NEPA) screening worksheet* (applies to all grants): NEPA screening worksheet data are used to assess the environmental impact of grant and subgrant assisted work.

- *Project information submittals for National Historic Landmarks or World Heritage Sites* (applies to all grants): Information submitted under this collection is used to meet statutory requirements for the protection of this nation's most valuable historic resources. Specifically, this project information is analyzed for compliance with the Secretary of the Interior's Standards and Guidelines for Archeology and Historic Preservation.

We are proposing to discontinue the HPF Online Closeout/EOY (State Sources of Non-federal Matching Share Report).

The NPS uses the information collected to ensure compliance with the National Historic Preservation Act, as well as government-wide grant requirements issued and implemented through 43 CFR 12 and 2 CFR 200.
