**50 CFR Part 622**

[Docket No. 230602–0141]

**RIN 0648–BL84**

**Fisheries of the Caribbean, Gulf of Mexico, and South Atlantic; Reef Fish Fishery of the Gulf of Mexico; Red Snapper Harvest Levels**

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Final rule.

**SUMMARY:** NMFS issues regulations to implement management measures described in a framework action under the Fishery Management Plan for the Reef Fish Resources of the Gulf of Mexico (FMP), as prepared by the Gulf of Mexico (Gulf) Fishery Management Council (Council). This final rule revises the commercial and recreational annual catch limits (ACLs) and annual catch targets (ACTs) for red snapper in the Gulf exclusive economic zone (EEZ). The purpose of this final rule is to increase the Gulf red snapper ACLs and ACTs consistent with best scientific information available, and to continue to achieve optimum yield (OY) for the stock.

**DATES:** This final rule is effective July 10, 2023.

**ADDRESSES:** Electronic copies of the framework action, which includes an environmental assessment, regulatory impact review, and a Regulatory Flexibility Act (RFA) analysis, may be obtained from the Southeast Regional

Office website at <https://www.fisheries.noaa.gov/action/modification-catch-limits-gulf-mexico-red-snapper>.

**FOR FURTHER INFORMATION CONTACT:** Dan Luers, Southeast Regional Office, NMFS, telephone: 727–824–5305, email: [daniel.luers@noaa.gov](mailto:daniel.luers@noaa.gov).

**SUPPLEMENTARY INFORMATION:** The Gulf reef fish fishery, which includes red snapper, is managed under the FMP. The FMP was prepared by the Council and is implemented by NMFS through regulations at 50 CFR part 622 under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act).

**Background**

The Magnuson-Stevens Act requires NMFS and regional fishery management councils to prevent overfishing and to achieve, on a continuing basis, the OY from federally managed fish stocks to ensure that fishery resources are managed for the greatest overall benefit to the Nation, particularly with respect to providing food production and recreational opportunities, and protecting marine ecosystems.

On February 28, 2023, NMFS published a proposed rule for the framework action and requested public comment (88 FR 12642). The proposed rule and the framework action outline the rationale for the actions contained in this final rule. A summary of the management measures described in the framework action and implemented by this final rule is described below.

Unless otherwise noted, all weights in this final rule are in round weight.

Red snapper in the Gulf EEZ is harvested by both the commercial and recreational sectors. The stock ACL for red snapper is equal to the acceptable biological catch (ABC) recommended by the Council’s Scientific and Statistical Committee (SSC), and each sector has its own ACL and associated management measures. The stock ACL is allocated 51 percent to the commercial sector and 49 percent to the recreational sector. In 2015, Amendment 40 to the FMP (80 FR 22422, April 22, 2015) divided the recreational ACL (quota) between the Federal charter vessel/headboat (for-hire) component (42.3 percent) and the private angling component (57.7 percent).

In 2020, NMFS implemented state management of red snapper for the private angling component as specified in Amendments 50 A–F to the FMP (85 FR 6819, February 6, 2020). Through these amendments, each Gulf state was allocated a portion of the red snapper
