The Council will begin this meeting with brief announcements, followed by reports on recent activities from the Council's Chair and Executive Director, the Greater Atlantic Regional Fisheries Office (GARFO) Regional Administrator, the Northeast Fisheries Science Center (NEFSC) Director, the NOAA Office of General Counsel, the Mid-Atlantic Fishery Management Council liaison, staff from the Atlantic States Marine Fisheries Commission (ASMFC), and representatives from the U.S. Coast Guard and NOAA's Office of Law Enforcement. Next, the Council will receive a presentation on the final report of the Council Coordination Committee's Subcommittee on Area-Based Management. The Skate Committee report will follow with two items: (1) a progress report on the development of 2024-2025 skate specifications and potential initiation of a framework adjustment to include measures to expand possession of smooth and barndoor skates; and (2) a presentation on and Council discussion of a final white paper containing potential approaches to support thorny skate rebuilding. Then, members of the public will have the opportunity to speak during an open comment period on issues that relate to Council business but are not included on the published agenda for this meeting. After the lunch break, the Council will take up the Atlantic Herring Committee report and approve a problem statement for action to revisit the inshore midwater trawl exclusion zone contained in Herring Amendment 8. The Council also will consider a potential change in priorities to identify time/area closure options to reduce bycatch of river herring and shad in midwater trawl and small-mesh bottom trawl fisheries. Next on the agenda is a presentation on a NOAA Fisheries comment opportunity under an advance notice of proposed rulemaking (ANPR) for updating National Standard Guidelines 4, 8, and 9. The Council will receive input on the draft guidelines from its Scientific and Statistical Committee (SSC) and staff before formulating its own comments. The Council will discuss which process it prefers to use to develop comments on the technical guidance. The Council then will adjourn for the day.

Wednesday, June 28, 2023

The Council will begin the second day of its meeting with a presentation on the Greater Atlantic Regional Fisheries Office and Northeast Fisheries Science Center draft strategic plan. The Groundfish Committee report will come next. The Council will initiate Framework Adjustment 66, which may include: (1) 2024-26 specifications for redfish, northern windowpane flounder, and southern windowpane flounder, (2) 2024-25 specifications for white hake and U.S./Canada resources of Eastern Georges Bank cod, Eastern Georges Bank haddock, and Georges Bank yellowtail flounder, (3) a revised white hake rebuilding plan, and (4) Atlantic halibut management measures. The Council also will consider a potential change in priorities to revise Gulf of Maine haddock specifications for 2024 and 2025 in Framework 66. The Council will initiate a separate framework adjustment to revise acceptable biological catch (ABC) control rules for groundfish and receive Scientific and Statistical Committee feedback on control rule options. Finally, the Council will receive an update on its Atlantic Cod Management Transition Plan. Next up will be the Monkfish Research Set-Aside (RSA) Program Working Group, which will provide a progress report on a Council work
