

such as information establishing that the entity is an eligible taxpayer;

(iii) The taxpayer's taxable year, as determined under section 441;

(iv) The type of annual tax return(s) normally filed by the eligible taxpayer, or that the eligible taxpayer does not normally file an annual tax return with the IRS;

(v) The type of eligible credit(s) for which the eligible taxpayer intends to make a transfer election;

(vi) Each eligible credit property that the eligible taxpayer intends to use to determine a specified credit portion for which the eligible taxpayer intends to make a transfer election;

(vii) For each eligible credit property listed in paragraph (b)(4)(vi) of this section, any further information required by the IRS electronic portal, such as—

(A) The type of eligible credit property;

(B) Physical location (that is, address and coordinates (longitude and latitude) of the eligible credit property);

(C) Any supporting documentation relating to the construction or acquisition of the eligible credit property (such as State, Indian Tribal, or local government permits to operate the eligible credit property, certifications, evidence of ownership that ties to a land deed, lease, or other documented right to use and access any land or facility upon which the eligible credit property is constructed or housed, and U.S. Coast Guard registration numbers for offshore wind vessels);

(D) The beginning of construction date, and the placed in service date of the eligible credit property; and

(E) Any other information that the eligible taxpayer believes will help the IRS evaluate the registration request;

(viii) The name of a contact person for the eligible taxpayer. The contact person is the person whom the IRS may contact if there is an issue with the registration. The contact person must either possess legal authority to bind the eligible taxpayer, or must provide a properly executed power of attorney on Form 2848, *Power of Attorney and Declaration of Representative*;

(ix) A penalties of perjury statement, effective for all information submitted as a complete application, and signed by a person with personal knowledge of the relevant facts that is authorized to bind the registrant; and

(x) Any other information the IRS deems necessary for purposes of preventing duplication, fraud, improper payments, or excessive payments under this section that is provided in guidance.

(c) *Registration number*—(1) *In general.* The IRS will review the registration information provided and will issue a separate registration number for each eligible credit property for which the eligible taxpayer provided sufficient verifiable information.

(2) *Registration number is only valid for one taxable year.* A registration number is valid to an eligible taxpayer only for the taxable year in which the credit is determined for the eligible credit property for which the registration is completed, and for a transferee taxpayer's taxable year in which the eligible credit is taken into account under § 1.6418-2(f).

(3) *Renewing registration numbers.* If an election to transfer an eligible credit will be made with respect to an eligible credit property for a taxable year after a registration number under this section has been obtained, the eligible taxpayer must renew the registration for that subsequent taxable year in accordance with applicable guidance, including attesting that all the facts previously provided are still correct or updating any facts.

(4) *Amendment of previously submitted registration information if a change occurs before the registration number is used.* As provided in instructions to the pre-filing registration portal, if specified changes occur with respect to one or more applicable credit properties for which a registration number has been previously obtained but not yet used, an eligible taxpayer must amend the registration (or may need to submit a new registration) to reflect these new facts. For example, if the owner of a facility previously registered for a transfer election under § 1.6418-2 or § 1.6418-3 for eligible credits determined with respect to that facility and the facility undergoes a change of ownership (incident to a corporate reorganization or an asset sale) such that the new owner has a different employer identification number (EIN) than the owner who obtained the original registration, the original owner of the facility must amend the original registration to disassociate its EIN from the eligible credit property and the new owner must submit separately an original registration (or if the new owner previously registered other credit properties, must amend its original registration) to associate the new owner's EIN with the previously registered eligible credit property.

(5) *Reporting of registration number by an eligible taxpayer and a transferee taxpayer*—(i) *Eligible taxpayer reporting.* As part of making a valid transfer election under § 1.6418-2 or

§ 1.6418-3, an eligible taxpayer must include the registration number of the eligible credit property on the eligible taxpayer's return (as provided in § 1.6418-2(b) or § 1.6418-3(d)) for the taxable year the specified credit portion was determined. The IRS will treat an election as ineffective if the eligible taxpayer does not include a valid registration number on the return.

(ii) *Transferee taxpayer reporting.* A transferee taxpayer must report the registration number received (as part of the transfer election statement as described in § 1.6418-2(b) or otherwise) from a transferor taxpayer on the Form 3800, *General Business Credit*, as part of the return for the taxable year that the transferee taxpayer takes the transferred specified credit portion into account. The specified credit portion will be disallowed to the transferee taxpayer if the transferee taxpayer does not include the registration number on the return.

(d) *Applicability date.* This section applies to taxable years ending on or after June 21, 2023.

(e) *Expiration date.* The applicability of this section expires on June 12, 2026.

**Synopsis**

**I. Sixth Report and Order**

1. In this document, the Commission continues to strengthen and expand caller ID authentication requirements in the Secure Telephony Identity Revisited/Signature-based Handling of Asserted information using toKENs (STIR/SHAKEN) ecosystem by requiring non-gateway intermediate providers that receive unauthenticated calls directly from an originating provider to use STIR/SHAKEN to authenticate those calls. The STIR/SHAKEN framework is a set of technical standards and protocols that enable providers to authenticate and verify caller ID information transmitted with Session Initiation Protocol (SIP) calls. The STIR/SHAKEN framework consists of two components: (1) the technical process of authenticating and verifying caller ID information; and (2) the certificate governance process that maintains trust in the caller ID authentication information transmitted along with a call.

2. Further, with this document, the Commission expands robocall mitigation requirements for all providers, including those that have not yet implemented STIR/SHAKEN because they lack the necessary infrastructure or are subject to an implementation extension. The Commission empowers the Enforcement Bureau with new tools and penalties to hold providers accountable for failing to comply with its rules. The Commission also defines the STIR/SHAKEN obligations of satellite providers.

3. The STIR/SHAKEN caller ID authentication framework protects consumers from illegally spoofed robocalls by enabling authenticated caller ID information to securely travel with the call itself throughout the entire call path. The Commission, consistent with Congress's direction in the Telephone Robocall Abuse Criminal Enforcement and Deterrence (TRACED) Act, adopted rules requiring voice service providers to implement STIR/SHAKEN in the internet Protocol (IP) portions of their voice networks by June 30, 2021, subject to certain exceptions.
