

sightlines towards signs, signals, and mirrors because (1) the safety device minimally exceeds the lower edge of the area swept by the windshield wipers; (2) generally, motorcoaches have an elevated seating position that greatly improves the forward visual field of view, and any resultant impairment of available sight lines would be minimal; and (3) the mounting location of Daimler Coaches' camera technology will be reasonable and enforceable at roadside.

In addition, the Agency believes the use of Daimler Coaches' DACT device by fleets is likely to improve the overall level of safety for the motoring public. For these reasons, the Agency believes that allowing placement of the Daimler Coaches' DACT device beyond the area of the lower windshield currently permitted by Agency regulations will likely provide a level of safety that is equivalent to, or greater than, the level of safety achieved without the exemption.

#### VII. Terms and Conditions for the Exemption

During the temporary exemption period, motor carriers are allowed to operate Daimler Tourrider commercial motorcoaches equipped with Daimler Coaches' DACT device mounted not more than 240 mm (9.5 inches) above the lower edge of the area swept by the windshield wipers; and outside the driver's sight lines to the road and highway signs and signals. When operating under this exemption, motor carriers are subjected to the following terms and conditions:

1. This exemption is limited to Daimler Coaches' DACT device on Tourrider commercial motorcoaches and does not apply to any other camera safety technology device or commercial motor vehicle (CMV).

2. This exemption is subject to revocation prior to the 5-year expiration in the event that FMCSA obtains information supporting and makes a determination that use of the DACT safety device on Tourrider motorcoaches does not achieve the requisite statutory level of safety or the exemption is not consistent with 49 U.S.C. 31136(e). Interested parties possessing information demonstrating that motor carriers utilizing Daimler Coaches' DACT safety device on Tourrider motorcoaches are not achieving the requisite statutory level of safety should immediately notify FMCSA at [MCPSD@DOT.GOV](mailto:MCPSD@DOT.GOV). The Agency will evaluate any such information and, if safety is being compromised or if the continuation of the exemption is not consistent with 49

U.S.C. 31136(e) and 31315(b), will take immediate steps to revoke the exemption.

#### Preemption

In accordance with 49 U.S.C. 31315(d), as implemented by 49 CFR 381.600, during the period this exemption is in effect, no State shall enforce any law or regulation applicable to interstate commerce that conflicts with or is inconsistent with this exemption with respect to a firm or person operating under the exemption. States may, but are not required to, adopt the same exemption with respect to operations in intrastate commerce.

#### Termination

The exemption is valid for 5 years unless revoked earlier by FMCSA. The exemption will be revoked if: (1) motor carriers operating Tourrider commercial motorcoaches fail to comply with the terms and conditions of the exemption; (2) the exemption has resulted in a lower level of safety than was maintained before it was granted; or (3) continuation of the exemption would not be consistent with the goals and objectives of 49 U.S.C. 31136(e) and 31315(b).
