

Programmatic Environmental Assessment for the Bipartisan Infrastructure Law-funded Airport Traffic Control Tower Replacement Program is available for public review and comment.

DATES: Comments on or before July 31, 2023.

ADDRESSES: Send comments identified by docket number FAA–2023–1368 to the Federal Regulations portal at www.regulations.gov.

FOR FURTHER INFORMATION CONTACT: For technical questions concerning this notice, contact Aaron W. Comrov, Environmental Team Lead, FAA CSA ES EOSH Center (AJW–2C16E), 2300 East Devon Avenue, Room 450, Des Plaines, IL 60018; telephone (847) 294–7665, email aaron.comrov@faa.gov.

SUPPLEMENTARY INFORMATION: The Draft Programmatic Environmental Assessment (PEA) considers the conditions and potential environmental impacts from the Proposed Action to replace numerous FAA-owned airport traffic control towers (ATCTs) with modern facilities under the Bipartisan Infrastructure Law-funded ATCT Replacement Program. Many existing ATCTs at municipal or general aviation airports are outdated and operating past their design life. The purpose and need for the proposed program is to replace select FAA-owned ATCTs across the nation with modern ATCTs while providing uninterrupted air traffic control services. The FAA has prepared the Draft PEA in conformance with the requirements of the National Environmental Policy Act of 1969 (NEPA) and FAA Order 1050.1F, *Environmental Impacts: Policies and Procedures*. The Draft PEA analyzes the potential environmental impacts that may result from construction and operation of the proposed new ATCTs and decommissioning and removal of the existing ATCTs (the Proposed Action), as well as the No Action Alternative (*i.e.*, not constructing and operating the proposed new ATCTs).

The Proposed Action would provide for modern, operationally efficient ATCTs, which would be designed to meet the energy and sustainability requirements of FAA's *Terminal Facilities Design Standard* while adhering to the Council on Environmental Quality's *Guiding Principles for Sustainable Federal Buildings and Associated Instructions*. The proposed replacement ATCTs would enable the installation of modern air traffic control equipment, provide adequate space and an enhanced work environment for FAA personnel, lower operating costs, and improve

environmental performance resulting in energy savings, water efficiency, reduced carbon emissions, and improved indoor air quality while meeting applicable FAA requirements.

Based on this analysis, the FAA has preliminarily determined there will not be a significant impact to the human environment from implementation of the Proposed Action. The FAA intends for the PEA to create efficiencies by establishing a "tiering" framework, where appropriate, to project-specific actions that require additional analysis. As decisions on specific project sites are made, to the extent additional NEPA analysis is required, environmental reviews would be conducted to supplement the analysis set forth in this PEA.

The Draft PEA is available for review on the project website (https://www.faa.gov/air_traffic/atf), and the Federal Regulations portal (www.regulations.gov) with Docket No.: FAA–2023–1368. The FAA will address comments received on the Draft PEA within the Final PEA.

Issued in Des Plaines, Illinois, on June 23, 2023.

Environmental Team Lead, FAA CSA ES EOSH Center, AJW–216E.

B. Privacy Act

In accordance with 49 U.S.C. 31315(b)(6), DOT solicits comments from the public on the exemption

requests. DOT posts these comments, without edit, including any personal information the commenter provides, to www.regulations.gov. II. Background

On May 15, 2023, FMCSA published a notice announcing its decision to renew exemptions for 8 individuals from the hearing standard in 49 CFR 391.41(b)(11) to operate a CMV in interstate commerce and requested comments from the public (88 FR 31096). The public comment period ended on June 14, 2023, and no comments were received.

FMCSA has evaluated the eligibility of these applicants and determined that renewing these exemptions would likely achieve a level of safety that is equivalent to, or greater than, the level that would be achieved by complying with § 391.41(b)(11).

The physical qualification standard for drivers regarding hearing found in § 391.41(b)(11) states that a person is physically qualified to drive a CMV if that person first perceives a forced whispered voice in the better ear at not less than 5 feet with or without the use of a hearing aid or, if tested by use of an audiometric device, does not have an average hearing loss in the better ear greater than 40 decibels at 500 Hz, 1,000 Hz, and 2,000 Hz with or without a hearing aid when the audiometric device is calibrated to American National Standard (formerly ASA Standard) Z24.5–1951.

This standard was adopted in 1970 and was revised in 1971 to allow drivers to be qualified under this standard while wearing a hearing aid (35 FR 6458, 6463 (Apr. 22, 1970) and 36 FR 12857 (July 8, 1971), respectively).

III. Discussion of Comments

FMCSA received no comments in this proceeding.

IV. Conclusion

Based upon its evaluation of the eight renewal exemption applications, FMCSA announces its decision to exempt the following drivers from the hearing requirement in section 391.41(b)(11).

As of May 14, 2023, and in accordance with 49 U.S.C. 31136(e) and 31315(b), the following eight individuals have satisfied the renewal conditions for obtaining an exemption
