Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; Marine Recreational Information Program Fishing Effort Survey

The Department of Commerce will submit the following information collection request to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995, on or after the date of publication of this notice. We invite the general public and other Federal agencies to

comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public’s reporting burden. Public comments were previously requested via the **Federal Register** on April 11, 2023 (88 FR 21628) during a 60-day comment period. This notice allows for an additional 30 days for public comments.

Agency: National Oceanic and Atmospheric Administration (NOAA), Commerce.

Title: Marine Recreational Information Program, Fishing Effort Survey.

OMB Control Number: 0648–0652.

Form Number(s): None.

Type of Request: Regular submission (revision of a current information collection).

Number of Respondents: 183,333.

Average Hours per Response: 5 minutes.

Total Annual Burden Hours: 15,278.

Needs and Uses: This is a request for revision and extension of an approved information collection. The request includes a new pilot study to test a shorter reference period that will increase the utility of survey data and estimates for fisheries managers and stock assessment scientists by providing greater resolution and more timely access to survey products. Additionally, the Reporting Sensitivity Experiment survey has been completed and that collection will be removed from this control number.

Marine recreational anglers are surveyed to collect catch and effort data, fish biology data, and angler socioeconomic characteristics. These data are required to carry out provisions of the Magnuson-Stevens Fishery Conservation and Management Act (16 U.S.C. 1801 *et seq.*), as amended, regarding conservation and management of fishery resources.

Marine recreational fishing catch and effort data are collected through a combination of mail surveys, telephone surveys, and on-site intercept surveys with recreational anglers. The Marine Recreational Information Program (MRIP) Fishing Effort Survey (FES) is a self-administered, household mail survey that samples from a residential address frame to collect data on the number of recreational anglers and the number of recreational fishing trips. The survey estimates marine recreational fishing activity for all coastal states from Maine through Mississippi, as well as Hawaii and Puerto Rico. Currently, MRIP produces estimates for two-month reference waves. The proposed collection will include experimental work to evaluate shorter reference
