

activity of these market participants in turn facilitates tighter spreads, which may cause an additional corresponding increase in order flow from other market participants, to the benefit of all market participants.

Proposal 2: Eliminate Note 6 Incentive

The Exchange believes that its proposal to eliminate the note 6 incentive described above is reasonable because this temporary incentive has not had its intended effect of incentivizing Market Makers to increase their liquidity adding activity in Penny Symbols on the Exchange over the stipulated time period. As such, the Exchange is eliminating the note 6 incentive in order to redirect future resources into other pricing programs intended to incentivize increased order flow.

The Exchange also believes that its proposal is equitable and not unfairly discriminatory as the note 6 incentive will be eliminated for all Market Makers. Further, the Exchange notes that the proposed changes will not adversely impact any market participant's ability to otherwise qualify for reduced fees or rebates offered under other programs in the Pricing Schedule.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. In terms of intra-market competition, the Exchange does not believe that its proposal will place any category of market participant at a competitive disadvantage. As discussed above, while parts of the Exchange's proposal provide more incentives for certain order flow and activity on the Exchange (*i.e.*, Market Maker liquidity adding activity and Priority Customer liquidity removing activity), the proposed changes are ultimately aimed at attracting greater liquidity to the Exchange, which benefits all market participants in the quality of order interaction.

In terms of inter-market competition, the Exchange notes that it operates in a highly competitive market in which market participants can readily favor competing venues if they deem fee levels at a particular venue to be excessive, or rebate opportunities available at other venues to be more favorable. In such an environment, the Exchange must continually adjust its fees to remain competitive with other exchanges and with alternative trading systems that have been exempted from compliance with the statutory standards

applicable to exchanges. Because competitors are free to modify their own fees in response, and because market participants may readily adjust their order routing practices, the Exchange believes that the degree to which fee changes in this market may impose any burden on competition is extremely limited. In sum, if the changes proposed herein are unattractive to market participants, it is likely that the Exchange will lose market share as a result. Accordingly, the Exchange does not believe that the proposed changes will impair the ability of members or competing order execution venues to maintain their competitive standing in the financial markets.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.
