**SUPPLEMENTARY INFORMATION:**

**Authority for This Rulemaking**

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of the airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it would modify the route structure as to improve the efficient flow of air traffic within the NAS.

**Comments Invited**

The FAA invites interested persons to participate in this rulemaking by submitting written comments, data, or views. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. To ensure the docket does not contain duplicate comments, commenters should submit only one time if comments are filed electronically, or commenters should send only one copy of written comments if comments are filed in writing.

The FAA will file in the docket all comments it receives, as well as a report

summarizing each substantive public contact with FAA personnel concerning this proposed rulemaking. Before acting on this proposal, the FAA will consider all comments it receives on or before the closing date for comments. The FAA will consider comments filed after the comment period has closed if it is possible to do so without incurring expense or delay. The FAA may change this proposal in light of the comments it receives.

**Privacy:** In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to [www.regulations.gov](http://www.regulations.gov), as described in the system of records notice (DOT/ALL-14 FDMS), which can be reviewed at [www.dot.gov/privacy](http://www.dot.gov/privacy).

**Availability of Rulemaking Documents**

An electronic copy of this document may be downloaded through the internet at [www.regulations.gov](http://www.regulations.gov). Recently published rulemaking documents can also be accessed through the FAA's web page at [www.faa.gov/air\\_traffic/publications/airspace\\_amendments/](http://www.faa.gov/air_traffic/publications/airspace_amendments/).

You may review the public docket containing the proposal, any comments received and any final disposition in person in the Dockets Operations office (see **ADDRESSES** section for address, phone number, and hours of operations). An informal docket may also be examined during normal business hours at the office of the Eastern Service Center, Federal Aviation Administration, Room 210, 1701 Columbia Avenue, College Park, GA 30337.

**Incorporation by Reference**

United States Area Navigation routes are published in paragraph 2006 and paragraph 6011 of FAA Order JO 7400.11, Airspace Designations and Reporting Points, which is incorporated by reference in 14 CFR 71.1 on an annual basis. This document proposes to amend the current version of that order, FAA Order JO 7400.11G, dated August 19, 2022, and effective September 15, 2022. These updates would be published in the next update to FAA Order JO 7400.11. That order is publicly available as listed in the **ADDRESSES** section of this document.

FAA Order JO 7400.11G lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

**The Proposal**

The FAA is proposing an amendment to 14 CFR part 71 to establish RNAV

route Q-476; and amend RNAV route T-393. These actions are in support of the FAA's VOR MON Program. The proposed changes are described below.

**Q-476:** Q-476 is a proposed new RNAV route that would extend from the Jamestown, NY (JHW), VOR/Distance Measuring Equipment (DME) to the NWTON, NJ, waypoint (WP). This proposed route would overlay portions of jet routes J-106 and J-70 from the Jamestown, NY (JHW), VOR/DME to the Stillwater, NY (STW), VOR/DME. Q-476 would provide connectivity for RNAV equipped aircraft between the Jamestown, NY area and the Newark, NJ area.

**T-393:** T-393 is a proposed amended route that extends from the GAILS, MA, WP to the Burlington, VT (BTV), VOR/DME. This proposed amended route would replace the PUTNM, CT, WP with the Putnam, CT (PUT), VOR/DME due to the Putnam, CT (PUT), VOR/DME planned decommissioning being extended until the year 2028. This RNAV route also proposes to remove Fixes from the route's legal description for segments that contain turns of less than 1 degree. The following are the Fixes that are proposed to be removed; INNDY, MA, Fix; FOSTY, RI, Fix; GRIPE, MA, Fix; STRUM, NH, Fix; UNKER, NH, Fix; MCADM, NH, Fix; ZIECH, VT, Fix; DAVID, VT, Fix; CEVIB, VT, Fix; and POROE, VT, Fix.

**Regulatory Notices and Analyses**

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

**Environmental Review**

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1F: "Environmental Impacts: Policies and Procedures" prior to any FAA final regulatory action.
