

U.S. Department of Health and Human Services as required by section 131 of the Act. Finally, the RSA-911 is considered to be one of the most robust databases in describing the demographics of the disabled population in the country and as such is used widely in researchers' disability-related analyses and reports.

The current RSA-911 expires on 05/31/2024, which occurs during Program Year 2023 (07/01/2023-06/30/2024). Because RSA must collect the same performance data for the entirety of a Program Year, RSA must begin Program Year 2024 with approval of this proposed revision in place. Thus, RSA is proposing to extend with revisions the RSA-911 for three years. If this revision is approved, VR agencies will collect and report data under this collection for Program Years 2024 through 2026. (07/01/2024-06/30/2027).

[Project No. 2079-111]

Placer County Water Agency; Notice of Availability of Environmental Assessment

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission or FERC) regulations, 18 Code of Federal Regulations (CFR) part 380, Commission staff reviewed Placer County Water Agency's application for a non-capacity amendment of the license for the Middle Fork American River Project No. 2079 (project) and have prepared an Environmental Assessment (EA). The licensee proposes to amend the license to implement the Duncan Creek

Diversion Improvement Project. As proposed, the licensee would modify the diversion to facilitate instream flows and pulse flows required by the project license. The licensee proposes to modify the diversion by: (1) modifying the spillway; (2) adding a new intake bay, which would include a trash rack, fish screen, and downstream fish passage; and (3) installing two new micro-hydro units. The 223.788-megawatt project is in Placer and El Dorado counties, California on the Middle Fork of the American River, the Rubicon River, and Duncan Creek and North and South Fork Long Canyon creeks. The project occupies federal lands administered by the U.S. Forest Service.

The EA contains Commission staff's analysis of the potential environmental effects of the proposed amendment and concludes that it would not constitute a major federal action that would significantly affect the quality of the human environment.

The Commission provides all interested persons with an opportunity to view and/or print the EA via the internet through the Commission's Home Page (<http://www.ferc.gov>) using the "eLibrary" link.
