BILLING CODE 6714-01-P

FEDERAL MARITIME COMMISSION

[Docket No. 23-05]

Rahal International, Inc., Complainant v. Hapag-Lloyd AG, Hapag-Lloyd (America) LLC, Hapag-Lloyd USA, LLC, Respondents; Notice of Filing of Complaint and Assignment

Served: June 30, 2023.

Notice is given that a complaint has been filed with the Federal Maritime Commission (hereinafter "Commission") by Rahal International, Inc. (hereinafter "Complainant") against Hapag-Lloyd AG, Hapag-Lloyd (America), LLC, and Hapag-Lloyd USA, LLC (hereinafter collectively referred to as "Respondents"). Complainant states that it is an independent importer and broker and corporation duly organized under the laws of Delaware with a principal place of business in Illinois. Complainant identifies Hapag-Lloyd AG as a global ocean common carrier based in Germany with a principal place of business in Germany. Complainant identifies Hapag-Lloyd (America), LLC as a United States limited liability company and agent and subsidiary of Hapag-Lloyd AG with its principal office located in Georgia. Complainant identifies Hapag-Lloyd USA, LLC as a United States limited liability company, ocean common carrier/common carrier, and agent and subsidiary of Hapag-

Lloyd AG with its principal office located in New Jersey.

Complainant alleges that Respondents violated the Shipping Act of 1984, as amended, 46 U.S.C. 40101 to 46108, specifically including that Respondents violated 46 U.S.C. 41102(c), 41104(a)(2)(A), 41104(a)(14), 41104(a)(15), 41104(d) and part 545 of title 46, Code of Federal Regulations regarding a failure to establish, observe, and enforce just and reasonable regulations and practices relating to or connected with receiving, handling, storing or delivering Complainant's property, the assessment of excessive charges, inconsistent and/or noncompliant charges, and noncompliant demurrage or detention charges. The Complainant alleges these violations arose from Respondents failure to provide adequate facilities for the return of empty containers while continuing to accept business and charge excessive ocean freight fees with knowledge of the lack of facilities and without providing alternatives, as well as, resulting logistical paralysis that precluded Complainant from its retrieval of loaded containers.

An answer to the complaint is due to be filed with the Commission within twenty-five (25) days after the date of service.

The full text of the complaint can be found in the Commission's Electronic Reading Room at <https://www2.fmc.gov/readingroom/proceeding/23-05/>. This proceeding has been assigned to the Office of Administrative Law Judges. The initial decision of the presiding judge in this proceeding shall be issued by July 1, 2024, and the final decision of the Commission shall be issued by January 15, 2025.

William Cody,

Secretary.

BILLING CODE P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[60Day-23-1198; Docket No. CDC-2023-0056]

Proposed Data Collection Submitted for Public Comment and Recommendations

AGENCY: Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION: Notice with comment period.

SUMMARY: The Centers for Disease Control and Prevention (CDC), as part of its continuing effort to reduce public burden and maximize the utility of government information, invites the general public and other Federal agencies the opportunity to comment on a proposed and/or continuing information collection, as required by the Paperwork Reduction Act of 1995. This notice invites comment on a proposed information collection project titled Use of the Cyclosporiasis National Hypothesis Generating Questionnaire (CNHGQ) During Investigations of

Foodborne Disease Clusters and Outbreaks. This data collection is used to collect standardized data during investigations of outbreaks of cyclosporiasis, thereby increasing the likelihood that outbreaks will be recognized, and sources will be identified.

DATES: CDC must receive written comments on or before September 5, 2023.

ADDRESSES: You may submit comments, identified by Docket No. CDC-2023-0056 by either of the following methods:

- *Federal eRulemaking Portal:* www.regulations.gov. Follow the instructions for submitting comments.
- *Mail:* Jeffrey M. Zirger, Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE, MS H21-8, Atlanta, Georgia 30329.

Instructions: All submissions received must include the agency name and Docket Number. CDC will post, without change, all relevant comments to www.regulations.gov.

Please note: Submit all comments through the Federal eRulemaking portal (www.regulations.gov) or by U.S. mail to the address listed above.

FOR FURTHER INFORMATION CONTACT: To request more information on the proposed project or to obtain a copy of the information collection plan and instruments, contact Jeffrey M. Zirger, Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE, MS H21-8, Atlanta, Georgia 30329; Telephone: 404-639-7570; Email: omb@cdc.gov.

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501-3520), Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. In addition, the PRA also requires Federal agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each new proposed collection, each proposed extension of existing collection of information, and each reinstatement of previously approved information collection before submitting the collection to the OMB for approval. To comply with this requirement, we are publishing this notice of a proposed data collection as described below.

The OMB is particularly interested in comments that will help:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the

functions of the agency, including whether the information will have practical utility;

2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

3. Enhance the quality, utility, and clarity of the information to be collected;

4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses; and

5. Assess information collection costs.

Proposed Project

Use of the Cyclosporiasis National Hypothesis Generating Questionnaire (CNHGQ) During Investigations of Foodborne Disease Clusters and Outbreaks (OMB Control No. 0920-1198 Exp. 9/30/2023)—Extension—Global Health Center (GHC), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

The Centers for Disease Control and Prevention is requesting a three-year Paperwork Reduction Act (PRA) clearance for the Extension of Use of the Cyclosporiasis National Hypothesis Generating Questionnaire (CNHGQ) During Investigations of Foodborne Disease Clusters and Outbreaks (OMB Control No. 0920-1198, Expiration Date 09/30/2023).

An estimated one in six Americans per year becomes ill with a foodborne disease. Foodborne outbreaks of cyclosporiasis—caused by the parasite *Cyclospora cayetanensis*, have been reported in the United States since the mid-1990s and have been linked to various types of fresh produce. During the 15-year period (2000–2014), 31 U.S. foodborne outbreaks of cyclosporiasis were reported; the total case count was 1,562. It is likely that more cases (and outbreaks) occurred than were reported. Because of insufficient data, many of the reported cases could not be directly linked to an outbreak or to a particular food vehicle. In recent years, from 2018 onward, the number of cases reported annually to CDC has increased substantially to over 1,000 cases; notably, in 2018 and again in 2019 over 2,000 cases were reported.

Collecting the requisite data for the initial hypothesis-generating phase of investigations of multistate foodborne disease outbreaks is associated with
