Title of the Collection: Customer Experience in The Office of the Assistant Secretary for Financial Resources Service Delivery.

Type of Collection: NEW.
OMB No. 0990–XXXX.

Abstract: The U.S. Department of Health and Human Services (HHS) Office of the Assistant Secretary for Financial Resources (ASFR) is requesting 3 year OMB approval for the Customer Experience in The Office of the Assistant Secretary for Financial Resources Service Delivery initiative. The proposed information collection activity provides a means to garner quantitative and qualitative customer and stakeholder feedback in an efficient, timely manner, in accordance with the Administration’s commitment to improving access to and service delivery. This feedback will (1) provide insights into customer or stakeholder perceptions, experiences and expectations; (2) uncover issues that create barriers to funding or the system to deliver them; and (3) focus attention

on areas where communication, training or changes in operations might improve delivery of such opportunities and services. These voluntary collections will allow for ongoing, collaborative and actionable communications between HHS and its customers and stakeholders. It will also allow feedback to contribute directly to the improvement of program management.

The solicitation of feedback will target areas such as: (1) legibility, readability, comprehension, and accessibility and inclusion of ASFR services; (2) timeliness, appropriateness, and accuracy of information within services delivered by ASFR; (3) efficiency of service delivery, and resolution of issues with service delivery; and (4) any other reasonable area of exploration engendered by this review. Responses will be assessed to plan and inform efforts to improve or maintain the quality of service offered to the public.

The annual collections are low-burden for respondents (based on considerations of total burden hours, total number of respondents, or burden-hours per respondent) and are low-cost for both the respondents and the Federal Government. Moreover, Personally identifiable information (PII) will be collected only to the extent necessary. If this information is not collected, vital feedback from customers and stakeholders on the Agency’s services will be unavailable. Such assessments would better equip HHS to develop policies and programs that deliver resources and benefits equitably to all.
