

Purpose of the Meeting

The NNSA Advanced Simulation and Computing (ASC) Predictive Science Academic Alliance Program (PSAAP) IV will offer five-year cooperative agreements to U.S. Ph.D.-granting institutions to establish validated, large-scale, multi-disciplinary, and simulation-based “predictive science” as a major academic, applied research program. “Predictive Science” is the application of verified and validated computational simulations to predict properties and dynamics of complex systems with quantified uncertainties. During this pre-proposal meeting, the NNSA ASC program will present the new scope, requirements, and technical areas of interest for the next round of PSAAP Centers. Academic institutions will be encouraged to provide oral comments and feedback on the upcoming Request for Information.

Tentative Agenda

- Introduction to PSAAP IV
- Technical Areas of Interest, including:
 - Computational Science and Engineering disciplines
 - Verification, Validation, and Uncertainty Quantification
 - Scientific Machine Learning
 - Computer Science
 - Data Science
- PSAAP IV Process and Timeline
- Characteristics and Management of PSAAP IV Centers
- Questions & Answers

Public Participation

This meeting is open to the public. All U.S. Ph.D.-granting institutions with unique perspectives on simulation and computing research are encouraged to attend the meeting in-person to help shape the future of the predictive science discipline. Attendees can register to attend by emailing psaap4-interest@lanl.gov. If you require special accommodations due to a disability, please include that information in your email. Following the in-person meeting, all NNSA presentations will be publicly posted on the PSAAP website (<https://psaap.llnl.gov/>). Attendance at the meeting is not a prerequisite for responding to the subsequent Request for Information.

Moretown Hydroelectric, LLC; Notice of Availability of Environmental Assessment

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission) regulations, 18 CFR part 380, the Office of Energy Projects has reviewed the application for a new license to continue to operate and maintain the Moretown No. 8 Hydroelectric Project. The project is located on the Mad River in Washington County, Vermont. Commission staff has prepared an

Environmental Assessment (EA) for the project.

The EA contains staff's analysis of the potential environmental impacts of the project and concludes that licensing the project, with appropriate environmental protective measures, would not constitute a major federal action that would significantly affect the quality of the human environment.
