SUPPLEMENTARY INFORMATION:

I. Introduction

The NRC is considering the approval of the updated DFPs submitted by ISFSI licensees. The NRC staff has prepared a final EA and FONSI determination for each of the updated ISFSI DFPs in accordance with the NRC regulations in part 51 of title 10 of the *Code of Federal Regulations* (10 CFR), "Environmental Protection Regulations for Domestic Licensing and Related Regulatory Functions," which implement the National Environmental Policy Act of 1969, as amended (42 U.S.C. 4321 *et seq.*).

The NRC requires its licensees to plan for the eventual decommissioning of their licensed facilities prior to license termination. On June 17, 2011, the NRC published a final rule in the **Federal Register** amending its decommissioning planning regulations (76 FR 35511). The final rule amended the NRC regulation, 10 CFR 72.30, which concerns financial assurance and decommissioning for ISFSIs. This regulation requires each holder of, or applicant for, a license under 10 CFR part 72 to submit a DFP for the NRC's review and approval. The DFP is to demonstrate the licensee's financial assurance, *i.e.*, that funds will be available to decommission the ISFSI. The NRC staff will later publish its financial analyses of the DFP submittals which will be available for public inspection in ADAMS.

II. Discussion

The table in this notice includes the plant name, docket number, licensee, and ADAMS accession number for the final EA and FONSI determination for each of the individual ISFSIs. The table

also includes the ADAMS accession numbers for other relevant documents, including the updated DFP submittals. For further details with respect to these actions, see the NRC staff's final EA and FONSI determinations which are available for public inspection in

ADAMS and at <https://www.regulations.gov> under Docket ID NRC-2023-0123. For additional direction on accessing information related to this document, see the **ADDRESSES** section of this document.

FINDING OF NO SIGNIFICANT IMPACT

Facility	Joseph M. Farley Nuclear Plant
Docket No	72-42.
Licensee	Southern Nuclear Operating Company (SNC).
Proposed Action	The NRC's review and approval of SNC's updated DFPs submitted in accordance with 10 CFR 72.30(c).
Environmental Impact of Proposed Action.	The NRC staff has determined that the proposed action, the review and approval of SNC's updated DFPs, submitted in accordance with 10 CFR 72.30(c), will not authorize changes to licensed operations or maintenance activities, or result in changes in the types, characteristics, or quantities of radiological or non-radiological effluents released into the environment from the ISFSI, or result in the creation of solid waste. Moreover, the approval of the updated DFPs will not authorize any construction activity, facility modification, or other land-disturbing activity. The NRC staff has concluded that the proposed action is a procedural and administrative action that will not have a significant impact on the environment.
Finding of No Significant Impact.	The proposed action does not require changes to the ISFSI's licensed routine operations, maintenance activities, or monitoring programs, nor does it require new construction or land-disturbing activities. The scope of the proposed action concerns only the NRC's review and approval of SNC's updated DFPs. The scope of the proposed action does not include, and will not result in, the review and approval of decontamination or decommissioning activities or license termination for the ISFSI or for other parts of the Joseph M. Farley Nuclear Plant. Therefore, the NRC staff determined that approval of the updated DFPs for the Joseph M. Farley Nuclear Plant ISFSI will not significantly affect the quality of the human environment, and accordingly, the staff has concluded that a FONSI is appropriate. The NRC staff further finds that preparation of an environmental impact statement is not required.
