

approach, EPA is not seeking peer review of the 2023 draft revised unreasonable risk determination for the 1,4-dioxane risk evaluation. EPA is, however, seeking peer review as well as public comment on the 2023 Draft Supplement to the 1,4-Dioxane Risk Evaluation, as described in a separate **Federal Register** notice (88 FR 43562, July 10, 2023) (FRL-10798-02-OCSP). EPA will consider changes made to the risk evaluation in response to peer review and public comment on that supplement when developing the final risk determination.

D. What are the next steps for finalizing revisions to the risk determination?

EPA will review and consider public comment received on the draft revised risk determination for the 1,4-dioxane risk evaluation and will review and consider public comment and peer review on the 2023 Draft Supplement to the 1,4-Dioxane Risk Evaluation. After considering those public comments, EPA will issue the revised final 1,4-dioxane risk determination. If finalized as drafted, EPA would also issue a new order to withdraw the TSCA section 6(i)(1) no unreasonable risk order issued in Section 5.4.1 of the 2020 1,4-dioxane risk evaluation. This final revised risk determination would supersede the December 2020 risk determinations of no unreasonable risk. Consistent with the statutory requirements of TSCA, EPA would initiate risk management for 1,4-dioxane either by applying one or more of the requirements under TSCA section 6(a) to the extent necessary so that 1,4-dioxane no longer presents an unreasonable risk or determining pursuant to TSCA sections 9(a) and/or 9(b) that other Federal laws can eliminate or reduce to a sufficient extent the unreasonable risk.
