The supporting documentation provided by the U.S. Department of Commerce's National Marine Fisheries Service (NMFS) can be found in the Commission's eLibrary electronic filing system using the following information: Docket No. AD23-4-000

As part of its supporting documentation for FY 2022, NMFS provided detailed cost-accounting reports from its financial accounting system that clearly tracked FPA Part I-related costs through specific job and

activity-based codes. NMFS also further clarified how FPA Part I-related costs were being recorded and classified, including job cost-code tables to support its municipal and non-municipal distinctions, narrative descriptions of the type of work performed and listing of the projects for which work was performed. In addition, its indirect cost rates were substantiated and deemed reasonable based on the detailed explanation provided in its submission.

Idaho Falls argues in its comments that all costs associated with NMFS' PHY General/ Non-Specific category should be disallowed because NMFS fails to explain why the majority of time is spent on non-project specific activities that are only generally related to FPA Part I. Following the technical conference, NMFS provided a fuller description of the non-project specific work performed. We find the explanations reasonable and accept the costs.
