

responsibility for its trust marine resources in the U.S. Caribbean as well as significant interest in supporting the resilience of coastal and marine-dependent communities in the Territories, and promoting equity and environmental justice. For these reasons, is it important for NOAA to invest in research that informs marine spatial studies in the Caribbean region, including socioeconomic research that ensures meaningful participation of Caribbean communities and supports equitable processes for planning and siting of new and existing marine industries and conservation areas.

NOAA has recently been involved in planning for the expansion of offshore aquaculture in U.S. Federal waters through the development of Aquaculture Opportunity Areas (<https://www.fisheries.noaa.gov/national/aquaculture/aquaculture-opportunity-areas>). NOAA has also been engaged with the Bureau of Ocean Energy Management (BOEM) to support siting and environmental review for offshore wind energy areas in U.S. Federal waters (<https://www.boem.gov/renewable-energy>) to ensure protection of trust resources in any offshore development activities.

Purpose of This Request for Information

The purpose of this Request for Information is to promote data development to inform marine spatial studies in Puerto Rico and the USVI, with an emphasis on data needs for offshore wind energy and aquaculture development. In addition to input received from the public through the electronic and verbal submissions, NOAA aims to inform the public about its coastal and ocean planning processes and capabilities, discuss the current data available for each ocean sector (e.g., military, fisheries, industry, natural resources), and gather ideas for other data sources. NOAA hopes to come out of the meetings with a strengthened relationship with the public and a list of data gaps and needs to pursue going forward.

Specific Information Requested To Inform Marine Spatial Studies in Puerto Rico and USVI

Through this Request for Information, NOAA seeks written public input to inform the marine spatial studies in Puerto Rico and USVI. NOAA is particularly interested in receiving input concerning the items listed below. Responses to this Request for Information are voluntary, and respondents need not reply to items listed. When providing input, please

specify if you are providing general feedback on marine spatial studies and/or if you are responding to one of the specific item number(s) below:

(1) Specific datasets related to ocean sectors, natural resources, and/or human activities you recommend NOAA use in marine spatial studies.

(2) Major concerns you have related to use of any specific datasets that may be used in marine spatial studies.

(3) Major concerns you have related to the impacts of new marine industries on ecological systems in Puerto Rico and/or the USVI.

(4) Major concerns you have related to the impact of new marine industries on other ocean industries in Puerto Rico and/or the USVI.

(5) Major concerns you have related to gaps in scientific knowledge or data that could impact marine spatial study efforts.

(6) Specific data or information you recommend NOAA or other partners collect, if it is not currently available or has not been previously collected.

(7) Ways in which NOAA can better engage and collaborate with the public and Territorial communities to promote economic, social, and ecological resilience as well as protect trust resources.

Dated: August 4, 2023.

Samuel D Rauch, III,

Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

BILLING CODE 3510-22-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[0648-XD226]

Notice of Availability of Draft Environmental Assessment on the Effects of Issuing an Incidental Take Permit No. 27106

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; availability of a Draft Environmental Assessment; request for comments.

SUMMARY: NMFS announces the availability of the Draft Environmental Assessment (EA) on the effects of issuing an Incidental Take Permit (ITP) (No. 27106) to North Carolina Department of Environment and Natural Resources, Division of Marine Fisheries (NCDMF), pursuant to the Endangered

Species Act (ESA) of 1973, as amended, for the incidental take of ESA-listed sea turtles and sturgeon associated with the otherwise lawful gill net fisheries operating in the inshore waters of North Carolina. The duration of the requested permit is 10 years. NMFS is requesting comment on the draft EA.

DATES: Written comments must be received at the appropriate address or fax number (see **ADDRESSES**) on or before September 11, 2023.

ADDRESSES: The EA is available for download and review at <https://www.fisheries.noaa.gov/national/endangered-species-conservation/incidental-take-permits> under the section heading Related Documents for the Incidental Take Permit to North Carolina Division of Marine Fisheries (Sea Turtles and Sturgeon). The draft EA is also available upon written request (see **FOR FURTHER INFORMATION CONTACT**).

You may submit comments on this document, identified by NOAA-NMFS-2023-0098, by any of the following methods:

- **Electronic Submission:** Submit all electronic public comments via the Federal e-Rulemaking Portal. Go to <https://www.regulations.gov> and enter NOAA-NMFS-2023-0098 in the Search box. Click on the "Comment" icon, complete the required fields, and enter or attach your comments.

Instructions: Comments sent by any other method, to any other address or individual, or received after the end of the comment period, may not be considered by NMFS. All comments received are a part of the public record and will generally be posted for public viewing on www.regulations.gov without change. All personal identifying information (e.g., name, address, etc.), confidential business information, or otherwise sensitive information submitted voluntarily by the sender will be publicly accessible. NMFS will accept anonymous comments (enter "N/A" in the required fields if you wish to remain anonymous).

FOR FURTHER INFORMATION CONTACT: Celeste Stout, NMFS, Office of Protected Resources at celeste.stout@noaa.gov, 301-427-8403; Wendy Piniak, NMFS, Office of Protected Resources at wendy.piniak@noaa.gov, 301-427-8402.

SUPPLEMENTARY INFORMATION: Publication of this notice begins the official public comment period for this draft EA. Per the National Environmental Policy Act (NEPA), the purpose of the draft EA is to evaluate the potential direct, indirect, and cumulative impacts caused by the issuance of Permit No. 27106 to NCDMF for the incidental take of ESA-listed sea

turtles and sturgeon associated with the otherwise lawful anchored small and large-mesh gill net fisheries operating in the inshore waters of North Carolina. All comments received will become part of the public record and will be available for review.

Section 9 of the ESA and Federal regulations prohibit the 'taking' of a species listed as endangered or threatened. The ESA defines "take" to mean harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or to attempt to engage in any such conduct. NMFS may issue permits, under limited circumstances to take listed species incidental to, and not the purpose of, otherwise lawful activities. Section 10(a)(1)(B) of the ESA provides a mechanism for authorizing incidental take of listed species. NMFS regulations governing permits for threatened and endangered species are promulgated at 50 CFR 222.307.

Species Covered in This Notice

The following species are included in the EA: North Atlantic and South Atlantic Distinct Population Segments (DPSs) of green (*Chelonia mydas*), Kemp's ridley (*Lepidochelys kempii*), hawksbill (*Eretmochelys imbricata*), leatherback (*Dermochelys coriacea*), and Northwest Atlantic Ocean DPS of loggerhead (*Caretta caretta*) sea turtles, Gulf of Maine, New York Bight, Chesapeake, Carolina, and South Atlantic DPSs of Atlantic sturgeon (*Acipenser oxyrinchus oxyrinchus*), and shortnose sturgeon (*Acipenser brevirostrum*).

Background

NMFS received a draft permit application and conservation plan from NCDMF on June 22, 2022. Based on our review of the draft application, we requested further information and clarification on their mitigation measures and take requests. After several draft submissions and reviews, on December 2, 2022, NCDMF submitted a complete revised application for the incidental take of ESA-listed sea turtles and sturgeon. On December 22, 2022, we published a notice of receipt (87 FR 78659) of application and conservation plan from NCDMF for an incidental take permit. In that notice, we made the ITP application and associated conservation plan available for public comment. Subsequently, we received a request to extend the public comment period. NMFS provided a 30-day extension (88 FR 3971) to the comment period which closed on February 22, 2023. We received 231 comments on the application and conservation plan and

responses to these comments are available in the draft EA.

National Environmental Policy Act

This notice is provided pursuant to section 10(c) of the ESA and the National Environmental Policy Act (NEPA) regulations (40 CFR 1506.6). The draft EA was prepared in accordance with NEPA (42 U.S.C. 4321, *et seq.*), 40 CFR 1500–1508 and NOAA policy and procedures (NOAA Administrative Order [NAO] 216–6A and the Companion Manual for the NAO 216–6A).

Alternatives Considered

NMFS' proposed action is issuance of an ITP to NCDMF, which would authorize take of threatened and endangered sea turtle and sturgeon species associated with the otherwise lawful operation of NC commercial inshore large and small-mesh anchored gill net fisheries and require implementation of a conservation plan, in accordance with the requirements of the ESA. In preparing the draft EA, NMFS considered the following two alternatives for the proposed action.

Alternative 1: No Action. In accordance with the NOAA Companion Manual (CM) for NAO 216–6A, Section 6.B.i, NMFS is defining the no action alternative as not authorizing the requested incidental take of ESA-listed sea turtles and sturgeon. This is consistent with our statutory obligation under section 10(a)(1)(B) of the ESA to either: (1) deny the requested ITP or (2) grant the requested ITP and prescribe mitigation, monitoring, and reporting requirements. Under the no action alternative, NMFS would not issue the ITP, in which case, we assume NCDMF would continue to operate the fishery as described in the application without implementing the full suite of specific mitigation measures, monitoring, reporting explained in the Conservation Plan. The Council on Environmental Quality (CEQ) Regulations and the Companion Manual for NAO 216–6A require consideration and analysis of a no action alternative for the purposes of presenting a comparative analysis to the action alternatives. The no action alternative, serves as a baseline against which the impacts of the action alternatives will be compared and contrasted.

Alternative 2: Issue Permit as Requested in Application (Preferred alternative): Under Alternative 2, an ITP would be issued to exempt NCDMF from the ESA prohibition on taking sturgeon and sea turtles during operation of the otherwise lawful NC commercial inshore anchored gill net

fisheries. As required under Section 10(a)(1)(B), the ITP would require NCDMF to operate as described in the application and conservation plan to avoid, minimize, and mitigate take of ESA-listed sea turtles and sturgeon.

Final permit determinations will not be completed until after the end of the 30-day comment period and will fully consider all public comments received during the comment period. NMFS will publish a record of its final action in the **Federal Register**.

Dated: August 7, 2023.

Angela Somma,

Chief, Endangered Species Conservation Division, Office of Protected Resources, National Marine Fisheries Service.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; Application for Appointment in the NOAA Commissioned Officer Corps

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of information collection, request for comment.

SUMMARY: The Department of Commerce, in accordance with the Paperwork Reduction Act of 1995 (PRA), invites the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. The purpose of this notice is to allow for 60 days of public comment preceding submission of the collection to OMB.

DATES: To ensure consideration, comments regarding this proposed information collection must be received on or before October 10, 2023.

ADDRESSES: Interested persons are invited to submit written comments to Adrienne Thomas, NOAA PRA Officer, at NOAA.PRA@noaa.gov. Please reference OMB Control Number 0648–0047 in the subject line of your comments. Do not submit Confidential Business Information or otherwise sensitive or protected information.
