

period February 1, 2024–January 31, 2027.

The initial ICR finalized with the PM_{2.5} NAAQS SIP Requirements Rule estimated, for the 3 years following the ICR approval date, the burden associated with plan development and plan revisions related to ongoing implementation efforts in 31 areas designated nonattainment for the 1997, 2006 and/or 2012 PM_{2.5} NAAQS. The estimates included the burden to develop and submit, and the burden to the EPA to review and to approve or disapprove, attainment plans to meet the requirements prescribed in CAA sections 110 and part D, subparts 1 and 4 of title I. A PM_{2.5} NAAQS attainment plan contains rules and other measures designed to improve air quality and achieve the NAAQS by the deadlines established under the CAA. It also must address several additional CAA requirements related to demonstrating timely attainment and must contain contingency measures in the event the nonattainment area does not achieve reasonable further progress throughout the attainment period or in the event the area does not attain the NAAQS by its attainment date. States that have attained by the applicable attainment date may be eligible to submit a redesignation request and maintenance plan to receive a redesignation from “nonattainment” to “attainment.” After a state submits an attainment or maintenance plan, the CAA requires the EPA to take action on the plan. Tribes located within the geographic boundary of a nonattainment area may develop or submit attainment plans, but they are not required to do so.

This ICR supersedes the existing ICR—for which the EPA is proposing renewal in this action—for purposes of PM_{2.5} NAAQS implementation.

Form Numbers: None.

Respondents/affected entities: State and local governments.

Respondent's obligation to respond: Mandatory.

Estimated number of respondents: 12.

Frequency of response: Once per triggering event [*i.e.*, an air agency is required to revise and submit a SIP revision when the area is initially designated as nonattainment, reclassified to a higher classification, when an area fails to achieve reasonable further progress, when a Serious nonattainment area fails to timely attain, and/or when a state requests redesignation for a PM_{2.5} nonattainment area that attains the NAAQS)].

Total estimated burden: 24,900 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$1.76M (present value per year), which includes \$0 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is a decrease of 1800 hours of total estimated respondent burden compared with the ICR currently approved by OMB. This decrease is due to the reduction in nonattainment areas from 18 to 12. While the hours decreased due to the fewer number of respondents, there is a present-day value increase in estimated costs due to the increase in labor rates and the need for several areas to continue to develop plans to help address complex air quality issues.

Title: Section 73.61, AM Directional Antenna Field Strength Measurements.

Form Number: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business and other for-profit entities.

Number of Respondents and Responses: 2,268 respondents and 2,268 responses.

Estimated Time per Response: 4–50 hours.

Frequency of Response: Recordkeeping requirement.

Total Annual Burden: 36,020 hours.

Total Annual Cost: None.

Obligation to Respond: Required to obtain or retain benefits. The statutory authority for this collection of information is contained in Sections 154(i) and 303 of the Communications Act of 1934, as amended.

Needs and Uses: The information collection requirements contained in 47 CFR 73.61 require that each AM station using directional antennas to make field strength measurement as often as necessary to ensure proper directional antenna system operation. Stations not having approved sampling systems make field strength measurements every three months. Stations with approved sampling systems must take field strength measurements as often as necessary. Also, all AM stations using directional signals must take partial proofs of performance as often as necessary. The FCC staff used the data in field inspections/investigations. AM licensees with directional antennas use the data to ensure that adequate interference protection is maintained between stations and to ensure proper operation of antennas.
