Abstract: EPA established the requirements set forth in 40 CFR part 2, subpart B, "Confidentiality of Business Information." The requirements govern CBI claims. The requirements include the handling by the Agency of business information, which is or may be entitled to confidential treatment; requiring business submitters to substantiate CBI claims; and determining whether such information is entitled to confidential treatment for reasons of business confidentiality. This request to renew an existing ICR allows the Agency to continue collecting information the Agency requires to make final determinations regarding whether information claimed as confidential is entitled to confidential treatment under EPA's CBI regulations.

Form numbers: None.

Respondents/affected entities: Any entity submitting information claimed as CBI to EPA.

Respondent's obligation to respond: Required to obtain or retain benefits.

Estimated number of respondents: 225 (per year) (total).

Frequency of response: One-time submission for information claimed as CBI.

Total estimated burden: 3,217.5 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$1,287,000 (per year), includes \$0 annualized capital or operation & maintenance costs.

Changes in the estimates: There is an increase of 2,465.1 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This increase is due to a combination of factors. Since the last ICR renewal, the Agency has experienced a modest increase in the number of respondents. Additionally, after consulting with a sample of respondent businesses (or respective outside counsels), EPA determined the average estimated burden for each response has increased compared with the ICR currently approved by OMB. Calculating the burden for responding to a substantiation request letter is fact-specific, and the burden can vary based on the following factors: a respondent's familiarity with recent changes in the applicable law, the volume and complexity of the CBI claims asserted, and/or familiarity with the CBI substantiation request letters and substantiation process. As part of consulting with respondent businesses,

EPA received burden estimates ranging from as few as 5 hours to as many as nearly 40 hours to substantiate varying amounts of CBI claims. The average estimated burden across the responses that the Agency received is approximately 14.3 hours per response. The median estimated burden is approximately 10 hours per response. For purposes of this ICR renewal, the Agency calculated the estimated burden using the average.

Abstract: The purpose of this information collection is to survey partners currently using the EPA’s Office of Research and Development’s (ORD) scientific research products to increase transparency and public participation, and to ascertain the quality, usability, and timeliness of the research products. ORD will collect these data to inform the annual end-of-year performance reporting to the Office of Management and Budget (OMB) that will be published each year in the Annual Performance Report (APR), which is part of the President’s Budget Request and mandated under the

Government Performance and Results Act (GPRA). The survey results will be used to estimate the degree to which ORD research products meet partner needs and will enable the improvement of the development and delivery of products. Some of the information reported on the form is confidential, which will be withheld from the public pursuant to Section 107(1) of the Ethics in Government Act of 1978. Participation is voluntary.

Form Numbers: 6000–021.

Respondents/affected entities: Life, physical and social science professionals.

Respondent’s obligation to respond: Voluntary.

Estimated number of respondents: 270 (total).

Frequency of response: Annually.

Total estimated burden: 68 hours (per year). Burden is defined as 5 CFR 1320.03(b).

Total estimated cost: \$4,344.30 (per year), which includes no annualized capital or operation & maintenance costs.

Changes in the Estimates: There is a decrease of 15 hours in the total estimated respondent burden compared with the ICR previously approved by OMB. This burden reduction is attributed to a decrease in time needed for survey completion.
