

Determinations

There is no new information which would change our potential impacts to the specified marine mammal species and stocks. The anticipated effects of the action under the renewal IHA are expected to be the same as those that may have occurred under the initial IHA. The species authorized for take are identical to those that were identified in the initial IHA. The same species that were authorized for limited take by Level A harassment under the initial IHA are authorized for take by Level A harassment under the renewal IHA. The Level A and Level B harassment zones for 30-inch pile installation under the renewal IHA are larger than those contained in the initial IHA. However, the number of animals of each species authorized for take is less than what was authorized under the initial IHA since the number of in-water work days anticipated is less than half of the number of work days that occurred under the initial IHA. Furthermore, PSO monitoring of the renewal IHA's extended harassment zones demonstrated that most take occurs closer to the in-water driving location. The mitigation and monitoring measures required under the renewal IHA are identical to those prescribed through the initial IHA, with one exception. The shutdown and Level B harassment zones under the renewal IHA are larger than those employed in Season 1.

After analyzing the City's application for the initial IHA, NMFS determined that the action would have a negligible impact on all affected stocks and that the taking of authorized species would be small relative to population size (< six percent of the total abundance for all stocks).

NMFS has concluded that there is no new information suggesting that our analysis or findings should change from those reached for the initial IHA. Based on the information and analysis contained here and in the referenced documents, NMFS has determined the following: (1) the required mitigation measures will effect the least practicable impact on marine mammal species or stocks and their habitat; (2) the authorized takes will have a negligible impact on the affected marine mammal species or stocks; (3) the authorized takes represent small numbers of marine mammals relative to the affected stock abundances; (4) The City's activities will not have an unmitigable adverse impact on taking for subsistence purposes as no relevant subsistence uses of marine mammals are implicated by this action, and; (5) appropriate

monitoring and reporting requirements are included.

National Environmental Policy Act

This action is consistent with categories of activities identified in Categorical Exclusion B4 (incidental take authorizations with no anticipated serious injury or mortality) of the Companion Manual for NOAA Administrative Order 216-6A, which do not individually or cumulatively have the potential for significant impacts on the quality of the human environment and for which we have not identified any extraordinary circumstances that would preclude this categorical exclusion. Accordingly, NMFS determined that the issuance of the initial IHA qualified to be categorically excluded from further NEPA review. NMFS has determined that the application of this categorical exclusion remains appropriate for this renewal IHA.

Endangered Species Act

Section 7(a)(2) of the Endangered Species Act of 1973 (ESA: 16 U.S.C. 1531 *et seq.*) requires that each Federal agency insure that any action it authorizes, funds, or carries out is not likely to jeopardize the continued existence of any endangered or threatened species or result in the destruction or adverse modification of designated critical habitat. To ensure ESA compliance for the issuance of IHAs, NMFS consults internally whenever we propose to authorize take for endangered or threatened species.

No incidental take of ESA-listed species is authorized or expected to result from these activities. Therefore, NMFS has determined that consultation under section 7 of the ESA is not required for this action.

Renewal

NMFS has issued a renewal IHA to the City of Seattle for the take of marine mammals incidental to construction activities associated with the Pier 58 Reconstruction Project in Seattle, Washington effective from August 10, 2023 through July 31, 2024.

Dated: August 14, 2023.

Kimberly Damon-Randall,

BILLING CODE 3510-22-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; Office of Marine and Aviation Operations: Occupational Health, Safety, and Readiness Forms

AGENCY: National Oceanic & Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of information collection, request for comment.

SUMMARY: The Department of Commerce, in accordance with the Paperwork Reduction Act of 1995 (PRA), invites the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. The purpose of this notice is to allow for 60 days of public comment preceding submission of the collection to OMB.

DATES: To ensure consideration, comments regarding this proposed information collection must be received on or before October 16, 2023.

ADDRESSES: Interested persons are invited to submit written comments to Adrienne Thomas, NOAA PRA Officer, at NOAA.PRA@noaa.gov. Please reference OMB Control Number 0648-xxxx in the subject line of your comments. Do not submit Confidential Business Information or otherwise sensitive or protected information.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or specific questions related to collection activities should be directed to OMAO Policy Program, Attn: Joselyd Garcia-Kramer, NOAA, 1315 East West Highway, Silver Spring, MD 20910, omao.policy@noaa.gov.

SUPPLEMENTARY INFORMATION:

I. Abstract

This is a request for a new collection of information.

The National Oceanic and Atmospheric Administration's (NOAA) Office of Marine and Aviation Operations (OMAO) manages and operates NOAA's fleet of 15 research and survey ships and nine specialized environmental data-collecting aircraft. Comprised of civilians and officers of the NOAA Commissioned Officer Corps, OMAO also manages the NOAA Diving Program, NOAA Small Boat Program,

and NOAA Uncrewed Systems Operations Center.

The research and survey ships operated, managed, and maintained by OMAO comprise the largest fleet of federal research ships in the nation. Ranging from large oceanographic research vessels capable of exploring the world's deepest ocean, to smaller ships responsible for charting the shallow bays and inlets of the United States, the fleet supports a wide range of marine activities including fisheries surveys, nautical charting, and ocean and climate studies.

NOAA aircraft operate throughout the world providing a wide range of capabilities including hurricane reconnaissance and research, marine mammal and fisheries assessment, and coastal mapping. NOAA aircraft carry scientists and specialized instrument packages to conduct research for NOAA's missions.

Housed within the NOAA Office of Marine and Aviation Operations and staffed by the U.S. Public Health Service (USPHS) Commissioned Corps officers, the Office of Health Services (OHS) is charged with directly supporting all personnel within the National Oceanic and Atmospheric Administration (NOAA).

NOAA medical officers work to maximize deployment readiness and minimize medically related disruptions to fleet, aircraft, and diving operations. OHS programs assess and promote mental and physical readiness within their operational medical discipline. Given the austere and geographically remote operational environments OHS supports, our officers are also responsible for preventing and containing disease in operational environments as subject matter experts in travel medicine. The forms contained in this collection will be used to make medical readiness recommendations for individuals and to key leadership in operational environments.

II. Method of Collection

The primary method of collection is electronic, although some hard copies may be mailed or faxed.

III. Data

OMB Control Number: 0648–XXXX.

Form Number(s): Medical: 57–10–01, 57–10–02, 57–10–05. Safety: 57–17–02, 57–17–09. Small Boat: 57–19–04.

Type of Review: Regular submission [New information collection].

Affected Public: Individuals using OMAO platforms and facilities.

Estimated Number of Respondents: 1,515.

Estimated Time per Response: Response time varies based on the form. Forms may take as little as 5 minutes to complete or as long as 30 minutes.

Estimated Total Annual Burden Hours: 537 hours.

Estimated Total Annual Cost to Public: \$0. Although some forms may be mailed or faxed, they account for only a handful of submissions annually.

Respondent's Obligation: Required to Obtain or Retain Benefits.

Legal Authority:

IV. Request for Comments

We are soliciting public comments to permit the Department/Bureau to: (a) Evaluate whether the proposed information collection is necessary for the proper functions of the Department, including whether the information will have practical utility; (b) Evaluate the accuracy of our estimate of the time and cost burden for this proposed collection, including the validity of the methodology and assumptions used; (c) Evaluate ways to enhance the quality, utility, and clarity of the information to be collected; and (d) Minimize the reporting burden on those who are to respond, including the use of automated collection techniques or other forms of information technology.

Comments that you submit in response to this notice are a matter of public record. We will include or summarize each comment in our request to OMB to approve this ICR. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you may ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Sheleen Dumas,

Department PRA Clearance Officer, Office of the Under Secretary for Economic Affairs, Commerce Department.

SUPPLEMENTARY INFORMATION:

I. Abstract

This is a request for approval of a collection currently in use without OMB approval.

The NOAA Diving Program (NDP) is administered by the U.S. Department of Commerce, National Oceanic and Atmospheric Administration (NOAA), and is headquartered at the NOAA Western Regional Center (WRC) in Seattle, Washington. The NDP provides the guidelines, policy, and training for all NOAA Divers, which includes all NOAA employees who dive, as well as contractors and volunteers, among others, who conduct diving operations.
