

responsibilities among the various levels of government.” This proposed rule directly regulates growers, food processors, food handlers, and food retailers, not States. This proposed rule does not alter the relationships or distribution of power and responsibilities established by Congress in the preemption provisions of FFDCA section 408(n)(4). For these same reasons, the Agency has determined that this proposed rule does not have any “tribal implications” as described in Executive Order 13175, entitled “Consultation and Coordination with Indian Tribal Governments” (65 FR 67249, November 9, 2000). Executive Order 13175, requires EPA to develop an accountable process to ensure “meaningful and timely input by tribal officials in the development of regulatory policies that have tribal implications.” “Policies that have tribal implications” is defined in the Executive Order to include regulations that have “substantial direct effects on one or more Indian tribes, on the relationship between the Federal Government and the Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.” This proposed rule will not have substantial direct effects on tribal governments, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes, as

specified in Executive Order 13175. Thus, Executive Order 13175, does not apply to this proposed rule.

Synopsis

1. The Bureaus seek comment on a Petition filed by the Competitive Carriers Association (CCA) and USTelecom—The Broadband Association (USTelecom and, together with CCA, Petitioners). Petitioners request that the Bureaus renew for an additional three filing cycles the *BDC Limited Waiver*, which temporarily waives the requirement that Broadband Data Collections (BDC) filings be verified by a licensed Professional Engineer (PE), thus allowing BDC submissions to be certified by an otherwise qualified engineer who does not hold the PE credential.

2. The Commission’s rules require that a certified PE or a corporate engineering officer review and certify the accuracy of the broadband availability data submitted by mobile and fixed providers as part of the BDC. This requirement was adopted to ensure
