I. Introduction

The NRC is amending its regulations in parts 1, 2, 26, 32, 40, 50, 51, 52, 72, and 73 of title 10 of the *Code of Federal Regulations* (10 CFR). The NRC is making these amendments to update organizational information, revise an address, and correct reference, spelling, and grammatical errors. This rule also makes updates to replace gendered terms with inclusive, gender-neutral language.

II. Summary of Changes*10 CFR Part 1*

Update Organization and Functions. In § 1.42 concerning the Office of Nuclear Material Safety and Safeguards, this final rule revises the introductory text for paragraph (b)(26). The rule also revises paragraph (b)(30) to list financial assurance activities and adds a new paragraph (b)(33) to list duties for environmental activities. This final rule updates the regulations to align more closely with Commission direction in SRM–SECY–15–0143, “Project Aim and Centers of Expertise,” dated February 22, 2016 (Agencywide Documents

Access and Management System ML16053A500) regarding Centers of Expertise.

Update Organizational Functions. In § 1.43, this final rule moves responsibility for review and evaluation related to reactor facilities insurance, indemnity, and antitrust matters from the Office of Nuclear Reactor Regulation to the Office of Nuclear Material Safety and Safeguards.

10 CFR Part 2

Revise Nomenclature. This final rule revises 10 CFR part 2 to replace gendered terms with inclusive, gender-neutral language.

Correct Reference. In § 2.1202(a)(1), this final rule removes the incorrect reference to 10 CFR 50.12 and replaces it with the correct reference 10 CFR 50.10.

10 CFR Parts 26, 50, 52, and 73

Revise Street Address. This final rule amends §§ 26.11, 50.4(a), 52.3(a), and 73.4(b) to add the mailing zip code for the hand delivery method for communications.

10 CFR Part 32

Correct Reference. In 10 CFR 32.72(a)(2)(i), this final rule removes the incorrect reference to 21 CFR 207.20 and replaces it with the correct reference 21 CFR 207.17(a).

10 CFR Part 40

Correct Spelling. This final rule amends Appendix A to part 40 to remove the text “meterology” and add in its place the text “meteorology.”

10 CFR Part 50

Correct Typographical Error. This final rule removes a duplicative phrase in the introductory text of § 50.55a(b)(2)(xliii).

Correct Reference. This final rule reverts an inadvertent change to a reference in Appendix H paragraph III.B.1 that occurred during a direct final rulemaking (85 FR 62199) by removing the incorrect reference to ASTM E 185 and replacing it with ASTM E 185–82.

10 CFR Part 51

Correct Reference. In § 51.77(a), this final rule removes the incorrect reference to appendix M and replaces it with the correct reference subpart F.

10 CFR Part 72

Correct Spelling. This final rule amends § 72.3 to remove the text “radioactive” and add in its place the text “radioactive.”

10 CFR Part 73

Correct Grammatical Error. In § 73.50, this final rule adds the indefinite article “a” before the words “nuclear reactor” in the introductory text.

III. Rulemaking Procedure

Under section 553(b) of the Administrative Procedure Act (5 U.S.C. 553(b)), an agency may waive publication in the **Federal Register** of a notice of proposed rulemaking and opportunity for comment requirements if it finds, for good cause, that it is impracticable, unnecessary, or contrary to the public interest. As authorized by 5 U.S.C. 553(b)(3)(B), the NRC finds good cause to waive notice and opportunity for comment on these amendments, because notice and opportunity for comment is unnecessary. The amendments will have no substantive impact and are of a minor and administrative nature dealing with corrections to certain CFR sections or are related only to management, organization, procedure, and practice. Specifically, the revisions update organizational information and correct references, grammatical and spelling errors, and make updates to replace gendered terms with inclusive, gender-neutral language. The NRC is exercising its authority under 5 U.S.C. 553(b) to publish these amendments as a final rule. The amendments are effective September 25, 2023. These amendments do not require action by any person or entity regulated by the NRC and do not change the substantive responsibilities of any person or entity regulated by the NRC.

IV. Backfitting and Issue Finality

The NRC has determined that the corrections in this final rule would not constitute backfitting as defined in § 50.109, “Backfitting,” and as described in NRC Management Directive (MD) 8.4, “Management of Backfitting, Forward Fitting, Issue Finality, and Information Requests.” These corrections also would not constitute forward fitting as that term is defined and described in MD 8.4 or affect the issue finality of any approval issued under 10 CFR part 52. The amendments are non-substantive in nature, and include updates to organizational information, corrections to references, grammatical errors and spelling, and make updates to replace gendered terms with inclusive, gender-neutral language. They impose no new requirements and make no substantive changes to the

regulations. The corrections do not involve any provisions that would impose backfits as defined in 10 CFR chapter I, or that would be inconsistent with the issue finality provisions in 10 CFR part 52. For these reasons, the issuance of this final rule would not constitute backfitting or be inconsistent with any of the issue finality provisions in 10 CFR part 52. Therefore, the NRC has not prepared any additional documentation for this correction rulemaking addressing backfitting or issue finality.

V. Plain Writing

The Plain Writing Act of 2010 (Pub. L. 111–274) requires Federal agencies to write documents in a clear, concise, and well-organized manner. The NRC has written this document to be consistent with the Plain Writing Act as well as the Presidential Memorandum, “Plain Language in Government Writing,” published June 10, 1998 (63 FR 31885).

VI. National Environmental Policy

The NRC has determined that this final rule is the type of action described in § 51.22(c)(2), which categorically excludes from environmental review rules that are corrective or of a minor or nonpolicy nature and do not substantially modify existing regulations. Therefore, neither an environmental impact statement nor an environmental assessment has been prepared for this rule.

VII. Paperwork Reduction Act

This final rule does not contain a collection of information as defined in the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*) and, therefore, is not subject to the requirements of the Paperwork Reduction Act of 1995.

VIII. Congressional Review Act

This final rule is not a rule as defined in the Congressional Review Act (5 U.S.C. 801–808).

IX. Compatibility of Agreement State Regulations

Under the “Agreement State Program Policy Statement” approved by the Commission on October 2, 2017, and published in the **Federal Register** (82 FR 48535), NRC program elements (including regulations) required for adequacy and having a particular health and safety component are those that are designated as Categories A, B, C, D, NRC, and H&S; and those required for compatibility include those regulations and other legally binding requirements

designated as Compatibility Categories A, B, C, and D. Compatibility Category A are those program elements that include basic radiation protection standards and scientific terms and definitions that are necessary to understand radiation protection concepts. An Agreement State should adopt Category A program elements in an essentially identical manner in order to provide uniformity in the regulation of agreement material on a nationwide basis. Compatibility Category B are those program elements that apply to activities that have direct and significant effects in multiple jurisdictions. Compatibility Category B pertains to a limited number of program elements that cross jurisdictional boundaries and should be addressed to ensure uniformity of regulation on a nationwide basis. The Agreement State program element should be essentially identical to that of NRC. Compatibility Category C are those program elements that do not meet the criteria of Category A or B, but the essential objectives of which an Agreement State should adopt to avoid conflict, duplication, gaps, or other conditions that would jeopardize an orderly pattern in the regulation of agreement material on a national basis. An Agreement State should adopt the essential objectives of the Category C program elements. Compatibility Category D are those program elements that do not meet any of the criteria of Category A, B, or C, above, and, thus, do not need to be adopted by Agreement States for purposes of compatibility. Compatibility Category NRC are those program elements that address areas of regulation that cannot be relinquished to the Agreement States under the Atomic Energy Act of 1954, as amended, or provisions of title 10 of the *Code of Federal Regulations*. These program elements should not be adopted by the Agreement States. Category H&S program elements are not required for purposes of compatibility; however, they do have particular health and safety significance. The Agreement State should adopt the essential objectives of such program elements to maintain an adequate program.

The final rule is a matter of compatibility between the NRC and the Agreement States, thereby providing consistency among Agreement State and NRC requirements. The compatibility categories are designated in the following table:

SUPPLEMENTARY INFORMATION:**Introduction**

On September 27, 2022, the EEOC published in the **Federal Register** a Notice of Proposed Rulemaking (“NPRM”) announcing its intention to amend 29 CFR part 1614 by authorizing the EEOC, the Office of Federal Operations (“OFO”), and the EEOC’s Administrative Judges (“AJs”) to issue and receive documents electronically instead of, or in addition to, using first class U.S. mail (“first class mail”). Currently, 29 CFR 1614.109(i) provides that an AJ “shall send copies of the hearing . . . decision to the parties.” Section 1614.405(a) requires that a Commission appellate decision be “transmitted to the complainant and the agency by first class mail.” The NPRM proposed authorizing the Commission to transmit its hearing and appellate decisions, orders, and related documents to registered complainants through the EEOC Electronic Public Portal (“Public Portal” or “Portal”). It also was proposed that complainants could file hearing requests, appeals, and related documents through the Portal. The NPRM further proposed requiring agencies to notify complainants that they can use the Public Portal to file hearing requests and appeals. Finally, the NPRM asked commenters to address when an EEOC decision transmitted through the Portal should be considered to be received.

The final rule formalizes the current use of electronic communications between the EEOC and its stakeholders by explicitly providing for the digital transmission of complaint files, hearing requests and associated documents, appeals and associated documents, and Commission decisions. The final rule confirms that the digital receipt of hearing requests, appeals, Commission hearing and appellate decisions, and related documents, is equivalent to

receipt by first class mail. Nevertheless, the final rule makes clear that a complainant’s use of the Portal is voluntary.

Thus, for complainants who choose not to establish a Portal account, or who establish an account but do not agree to receive EEOC communications only through the Portal, OFO will use first class mail to communicate with, and send documents to, complainants, even while transmitting the same documents to agencies via FedSEP (the EEOC’s separate electronic Portal for agency-only use); AJs also will use email to transmit documents. These same complainants will be able to file hearing requests, appeals, and related documents through the current methods available (first class and registered mail, facsimile, personal delivery, and email).

Comments Generally

The EEOC received five comments about the NPRM, four from individuals and one from an attorney organization (“organization”). The commentors generally favor authorizing the EEOC and its AJs to transmit decisions and orders through the Portal. They also approve of allowing complainants to use the Portal to transmit hearing and appellate requests and documents. The organization opposes certain proposals while it and some of the individuals recommend specific modifications. Most provided suggestions regarding determining a receipt date for Portal-transmitted decisions.

Specific Comments and EEOC’s Response*Complainant Opt-In To Communicate via the Portal*

The NPRM provided that, where a complainant registers with the Portal, the EEOC will communicate with the complainant only through the Portal unless and until the complainant informs the EEOC that they want to receive EEOC documents by first class mail. The organization argues for a final rule specifying that a complainant will receive documents electronically only after the complainant affirmatively consents, or opts-in, to receive documents through the Portal. It further proposes that, even when providing consent, the complainant should retain the option to send and receive documents by other methods, such as first class mail, in addition to receiving these same documents through the Portal. To this end, the organization proposes that a final rule should require agencies and the EEOC to provide complainants with relevant contact information for all filing methods
