SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this action apply to me?

You may be potentially affected by this action if you are a pesticide manufacturer, North American Industrial Classification System (NAICS) (Code 32532) or involved with the International Space Station. This listing is not intended to be exhaustive, but rather provides a guide to help readers determine whether this document applies to them. Other types of entities not listed could also be affected.

B. What should I consider as I prepare my comments for EPA?

1. *Submitting CBI.* Do not submit this information to EPA through www.regulations.gov or email. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD–ROM that you mail to EPA, mark the outside of the disk or CD–ROM as CBI and then identify electronically within the disk or CD–ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. *Tips for preparing your comments.* When preparing and submitting your

comments, see the commenting tips at <https://www.epa.gov/dockets/commenting-epa-dockets>.

3. *Environmental justice.* EPA seeks to achieve environmental justice, the fair treatment and meaningful involvement of any group, including minority and/or low-income populations, in the development, implementation, and enforcement of environmental laws, regulations, and policies. To help address potential environmental justice issues, the Agency seeks information on any groups or segments of the population who, as a result of their location, cultural practices, or other factors, may have atypical or disproportionately high and adverse human health impacts or environmental effects from exposure to the pesticide(s) discussed in this document, compared to the general population.

II. What action is the Agency taking?

Under section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) (7 U.S.C. 136p), at the discretion of the EPA Administrator, a Federal or State agency may be exempted from any provision of FIFRA if the EPA Administrator determines that emergency conditions exist which require the exemption. NASA has requested the EPA Administrator to issue a specific exemption for the use of ortho-phthalaldehyde (OPA) in the coolant of the internal active thermal control system (IATCS) of the International Space Station (ISS) to control aerobic/microaerophilic bacteria in the aqueous coolant. Information in accordance with 40 CFR part 166 was submitted as part of this request.

As part of this request, the applicant asserted that it has considered the registered biocide alternatives and has concluded that OPA is the most effective biocide that meets the requisite criteria including: The need for safe, non-intrusive implementation and operation in a functioning system; the ability to control existing planktonic and biofilm-residing micro-organisms; a negligible impact on system wetted materials of construction; and a negligible reactivity with existing coolant additives. The ISS would not have an adequate long-term solution for controlling the micro-organisms in the IATCS coolant without the use of OPA. The OPA is incorporated into a porous resin material contained in a stainless-steel canister. The canister containing the OPA-incorporated resin is inserted into a coolant system loop, using flexible hose and quick disconnects and is placed in line for 8 hours to deliver the OPA into the fluid. As the coolant fluid flows through the canister, the

OPA elutes from the resin material into the coolant fluid. The total volume of the circulatory loops of the IATCS is 829 liters. The maximum concentration would be 350 milligrams (mg) of OPA per liter of coolant fluid. A total of 290,150 mg would be needed for the entire system. The OPA is incorporated into the resin at 210 mg OPA per cm³ resin, resulting in a potential total use of 1,382 cm³ of the OPA-containing resin. The level of OPA in the coolant is monitored periodically, and because OPA degrades over time, the concentration decreases to a level that is no longer effective in about 1 to 2 years. At this point, replenishment with new OPA-containing canisters is required. EPA has authorized similar emergency exemptions for this use since 2011. With the decision to extend the mission of the ISS to 2030, the need for this use is expected to continue for the duration of the program.

This notice does not constitute a decision by EPA on the application itself. The regulations governing FIFRA section 18 require publication of a notice of receipt of an application for a specific exemption proposing the use of a new chemical (*i.e.*, an active ingredient) which has not been registered by EPA.

The notice provides an opportunity for public comment on the application. The Agency will review and consider all comments received during the comment period in determining whether to issue the specific exemption requested by the NASA.

Needs and Uses: FCC Form 301, used by AM broadcast stations, and Form 2100, Schedule 301–FM, used by FM

broadcast stations, are used to apply for authority to construct a new commercial AM or FM broadcast station and to make changes to the existing facilities of such a station. They may be used to request a change of a station’s community of license by AM and non-reserved band FM permittees and licensees. In addition, FM licensees or permittees may request, by filing an application on FCC Form 301, upgrades on adjacent and co-channels, modifications to adjacent channels of the same class, and downgrades to adjacent channels.

Form 2100, Schedule 301–FM also accommodates commercial FM applicants applying in a Threshold Qualifications Window (TQ Window) or a Tribal Allotment. A commercial FM applicant applying in the TQ Window, who was not the original proponent of the Tribal Allotment at the rulemaking stage, must demonstrate that it would have qualified in all respects to add that particular Tribal Allotment for which it is applying. Additionally, a petitioner seeking to add a new Tribal Allotment to the FM Table of Allotments must file Form 2100, Schedule 301–FM when submitting its Petition for Rulemaking. The collection also accommodates applicants applying in a TQ Window for a Tribal Allotment that had been added to the FM Table of Allotments using the Tribal Priority under the “threshold qualifications” procedures.

Similarly, to receive authorization for commencement of Digital Television (DTV) operations, commercial broadcast licensees must file FCC Form 2100, Schedule A for a construction permit. The application may be filed any time after receiving the initial DTV allotment and before mid-point in the applicant’s construction period. The Commission will consider the application as a minor change in facilities. Applicants do not have to provide full legal or financial qualifications information.
